A press release

It is right that Zelensky speaks at the Sanremo Festival

The prosecutor is strongly in favor of Zelensky's intervention at the Festival we will disanare. The President of the Republic of Ukraine represents a country independent and sovereign attacked and partially invaded by the neo -Nazi warning from the Putin warflower, so Rai did well to allow him to speak at Festival. Cantal fun and information on an event that could be able to coexist in a new world war.

The masked friends or in fact of the Russian imperialism supported by Chinese Chinese, such as Salvini, Dinucci, Rizzo, Acerbo, Vauro, Mattei, Di Battista and De Magistris, I scream, in particular through the "fact" of Travaglio, Conte and Putin, because They do not want the spectators of the festival to know war crimes, especially neiconfronti of civilians, which the new Tsar Putin is making in Ukraine. They are existing their servility towards Putin under the cloak of peace, but Lace can only be obtained with the victory of Ukraine. Just as it happened, in the 70s of the last century, in Vietnam and Cambodia attacked the American imperialism.

Long live the resistance of Ukraine!

Firenze, 31 January 2023

A comment

The one shown above is the text of the delusional [Communicatostampa](#) Beded by the self -styled Maoist of the Italian Marxist party Italian Leninist Interaction in the participation of the ... President of the Council in Power Inucraine, Vladimir Aleksandrovic Zelensky.

These "gentlemen" support with all their own - fortunately very limited - the right of the first citizen of the country with capital Kiev to make war of war also during one of the most followed television programs most followed by the Italians.

Not only that, but to go to the dose they heavily insult a whole series of dipersonality, of different political connotations, claiming that there would be a congregation of friends of the son of putin supporters of the special operation. Ever since he settled in power, he has offered fourteen political, trade union and mass organizations related to the traditionist traditional, while among his most avid supporters there are characters - [Azov battalion](#) , [Centuria](#) , [Misanthropic division](#) , [Freedom](#) , [Sector Settle](#) - openly worshipers of fascismmahitlerian.

PC February 17 - The working and wage condition, which is always worse in official data

Author: maoist

Description: Inapp, employment: "Extraordinary unpaid for a worker out of six. But it is the tip of the iceberg: half of the employees works in time ...

Time: 2023-02-17T10:04:00+01:00

Images: []

INAPP, Occupation: "Extraordinary unpaid for a worker out of six. ma is the tip of the iceberg: half of the employees works at Orierantisociali "

FADDA: " The problem in general invests the regulation of ramper times. There is a risk of eroding and significantly distorting the dismissed needs. It is urgent to start a serious reflection on the eart -articulation organization of the working time, but also on his quantity edistribution. "

Rome, 10 February 2023 - One in six employee worker(15,9%)unpaid fastraordinaries. A worrying figure, if we consider that Glistordinari interest six employed out of ten(60%), mostly men(64.7% against 54.1% of women). Le motivazioni sono di vario tipo: nella

maggior parte dei casi (51,2%)For excessive workloads or dural deficiency, in 18.4% to earn more. Then there is 8.1% who declares Dinon to be able to refuse.

It is one of the phenomena detected by the Inapp Plus investigation(*Participation, Labour,Unemployment Survey*), which involved 45,000 individuals from 18 to 74 years old, he concluded in 2022, whose final report will be presented to the institute's headquarters soon.

The problem of the extraordinary, however, is inscribed in the more generally theme regulation of life and work times that see a data of the employee emerge: about half of the employees carry out their activity at hourly hours could be defined as antisocial. Specifically, 18.6% of the deidnts work *sia at night that on holidays* (about 3.2 million people), 9.1% also on Saturdays and holidays(but not the night), while 19.3% *and* The night(but not on Saturday or holidays). Gli uomini sperimentanodi più sia il solo lavoro notturno, sia quello svolto sia di notte che neifestivi; le donne, invece sono impegnate più il sabato o nei festivi.

"Spesso la domanda di lavoro richiede disponibilità che confliggono con leesigenze di vita - ha dichiarato il professor Sebastiano Fadda, presidentedell'Inapp - È vero che per alcuni settori economici, come il commercio o lasanità, e per alcune professioni, come quelle dei servizi, il lavoro notturnoo nei festivi è connaturato alla natura della prestazione, ma è anche vero chequesta modalità sembra diffondersi anche dove non è strettamente

necessaria. È urgente avviare una seria riflessione sull'organizzazione e articolazione del tempo di lavoro, ma anche sulla sua quantità e distribuzione".

"While elsewhere we are discussed, and you start experiments, of reduced time short host - Punctuated Fadda - in our country they still remain dasing old work organization models that heavily affect life times. The world of work is increasingly digital, faster , inconstant evolution, but for most of the "traditional" workers, still unresolved problems on the level of the distribution of the hourly work. The permanence of uses and habits of the past often often prevails on finding balanced organizational solutions, both in terms of adding where necessary, and and In terms of lightening of the weight of hours of hours in general, which allow a sustainable balance between work and private-social life in the perspective of "work, and yet, the combination of new technologies, high skills both organizational organizational models should generate levels of productivity they do not make you need "inhuman" work of work, but guaranteed quality: well paid, protected, with high productivity ".

Moreover, always according to the report, a certain rigidity is also recorded in front of the permits: 21.3% of employed (about 4.7 million) Declare you cannot or not want to take permissions for personal reasons, 54.8% can be able to modulate them and the remaining 23.9% can modulate work commitment. Men's greater autonomy, while for women the pressure of context that disincentive the use of permits is highlighted. And they are above all gli autonomas that carry out their activity in a condition of Para -ubordination to declare that in their own work contexts or no permits are expected to be well seen to take them.

Then there is the other side of the medal, that of the consistent altitude disagreements, or employed that would like to work a greater number of diorship than those actually carried out. This unduoring is more of women - also for the greater concentration of the component female in part -time - among the workers with low study qualifications, between irescents in the north -west and south and islands and for those who carry out their own activity in small companies dimensions.

PC February 17 - Naples - unemployed in struggle and repression of state - information and solidarity

Author: maoist

Description: Down on the hands of the unemployed and the unemployed! We learn, since there are many companions in the square, of what is ...

Time: 2023-02-17T10:06:00+01:00

Images: ['[napoli-polizia-contro-disoccupati.jpg](#)']

JUST HANDS from the unemployed and the unemployed!

We learn, since there are many companions in the square, of what is now being in Naples. Even today, further unmotivated postponements have turned on the deidisoccupa anger. Clashes, parades, blocks and displaced actions have raised laterals from the morning throughout the city center.

They will speak of violence of the unemployed, the reality is that violence is institutional. Several wounded among the unemployed and the unemployed and now IlMovimento has returned under San Giacomo.

The struggle of the organized unemployed denounces wages from hunger, ladsoccupation, cutting the citizenship income and the increase in expenditure and privileges for a few. In the meantime, it clearly indicates the resources, training and work projects in the perspective of tying the salary with the demanding and urgencies of our class.

We support, as always, without if and without but, the heroic tireless struggle of the change.

[Movement of struggle - unemployed "7novembre"](#)

by Antonio Mazzeo *

(The images of Italian troops and vehicles in Latvia are [diesecito.difesa.it](https://www.esecito.difesa.it))

_ Foreign APPLE, 10 January 2023_ - In less than a year, the number of Italian soldiers lined up in Eastern Europe with Ukrainian, Russia and Belarus has increased by five, the number of Italian military. **On the 7,000 actually employed in international missions almost 1,500 operate in the field born in the "containment" of the Russian Armed Forces.** Starting in 2014, Alleanzaatlantica gave birth to a war escalation on the east side as never before in its history In the Baltic republics, in Poland, Romania, Bulgaria and Hungary, large terrestrial, aerial and naval installations were created, the most advanced war technologies have been transferred, the strategies of global conflicts of the 21st century have been tested with the use of drones and entirely automated weapons, enuclear cyber-spatial.

Following the Russian invasion of Ukraine of 24 February 2022, the trial rearm and militarization of Eastern Europe is dangerously dilated and still appears

unstoppable today. And Italy is there with its troops, the emergency brigades, the Obici, the tanks and icacciabombardieri "Death Jewels" of the military-industrialnactional complex and foreign partners-partners, first

We try to tell who the Italian departments are sent by sending an irresponsible political and government class as *topolino apprendestregone*. The largest component is the terrestrial one: today there is inhlectonia, Hungary and Bulgaria, framed inside the NATO quick intervention forces, the so-called *battlegroup*, groups. "In front of a deteriorated perception of safety and following a specific request made by the Baltic countries and Poland, Alsummit of Warsaw in July 2016, NATO considered it appropriate to strengthen the premium presence on the east side of the Euro-Atlantic space, wandering unaamy of *enhanced Forward Present* (eFP) which contemplates the deployment ofquattro *battle Group* respectively in Estonia, Latvia, Lithuania Eipolonia, supported by the other allies ", recalls the General Staff of the ADIFESA." EFP is a measure of a defensive nature, proportionate and fully inline with the international commitment of NATO who intends to strengthen the

reprint of the deterrence of the alliance. In particular, having strengthened lapresenza on the east side represents a clear example of the determination of the primary collective security mission of the Euro-Atlantic integrity against any possible aggression and threat, as well as the reaffirmation of cohesion and solidarity between the villages ".(1)The version of the NATO Generaldella Command is less sweetened and more realistic. "These Battlegroups are multinational and ready for Combattoe demonstrate the strength of the transatlantic bond", explain the verticidlies. "They operate together with the defense forces of the host country, conducting exercises and supervisory activities. Their presence rendezes that an attack on one of the allies will be considered an attack on the entire alliance. Battlegroups are part of the largest reinforcement of NATO collective building From a generation this part ".(2)

Italians in Latvia

All the operational and training activities conducted by the Armedltitalia on the Eastern NATO Eastern Forces are arranged by the head of Statomaggiore della Defense and are coordinated by the Operational Command of Vertex Interforze(Covi), established - certainly not casually - in July 2021 perrtimodular national military architecture and "embrace the concept of themults -dominated, terrestrial, maritime, plane, spatial and cyber".(4)Commander of the Covi is the gen. **Francesco Paolo son** , the *padre-alpine* to cook large powers in socio-health management and post emergency from Covid19.

The Italian army has been working uninterruptedly for almost a two -year period inside Battlegroup born in Latvia(*EFP Baltic Guardian*), the one that includes the largest number of participating nations: in addition to Aitalia and Latvia there are Canada, Albania, Czech Republic, Iceland, Montenegro, Northern Macedonia, Poland, Slovenia, Slovakia and Spain. Actually the national contingent employed is 250 belongings belonging Bersaglieri Brigade "Garibaldi" stationed in Campania and other assets from the 17th "Sforzesca" artillery artillery regiment(Sabaudia), from 132 ° tank regiment(Cordenons, Pordenone), from the 7th "Cremona" Defense Regiment(Civitavecchia), from the 3rd mountain artillery regiment(Of mapcco, UDINE)and from the 11th transmissions regiment(Civitavecchia).Ingente è il numero di mezzi nella disponibilità di questi reparti: 139 traveicoli da combattimento "Dardo", carri armati "Ariete" e blindo "Centauro".

Always in June the "Taurinense" Alpine troops were used in close air support inactivity(*Close air Support*)Outside Daiconfini Lettoni: In Estonia with the "Furious Wolf" exercise(*lupofurious*), _jointly to the Battlegroup lined up there and the hunting of the hunt in the Baltic; In Slovenia with "Adriatic Strike 22", aerial cooperation exercises that involved 28 countries of the alliance. Immediately after arriving in Latvia in mid -June, the "Garibaldi" brigade trained individual altitude and with the "Dardo", "Centaur" and "Aries" means. "Furthermore, as part of the initiatives aimed at showing NATO lapresenza in Latvia, several static exhibitions have been carried out and materials in favor of the population but also of the students of the National Defense Academy Latvian", adds the Army General Staff, emphasizing the role of their departments as ambassadors-weapons of weapons _Made in Italy.

In the height of summer the "Rampart Forge" multinational exercise was held(*Forgia of the bastion*) With the aim of "consolidating the state of readiness and increase the combat capabilities of units on a compartmentally compartmental soil". A "cell" for the cyberneticadist war in Latvia from the Interforce Command for the operations on the network(COR)of Rome has

conducted Cyber operations with its partners in order to "detect, contrast and neutralize threats that can limit the freedom of maneuver in the cybernetic domain". At the end of August, the contingent of the "Garibaldi" Haerison with the Army of the United States of America, Spain and Latvia on the occasion of terrestrial and plane combat with the use of attack by attack Bell AH-1 "Cobra" and UH-1 "Iroquois Huey".

From 28 October to 2 November the Italian Army has been engaged in a fire exercise on sea targets jointly with the Maritime Group 1 (SNMG-1), Naval Group of Pronto Intervento of War Unit of the Marine of Denmark, Norway and Netherlands, the attempt to "increase the mutual knowledge between terrestrial forces and Naval forces on the east side", as well as the press office of the ADIFESA. "Iron spear" (As of iron) It was the training activity of mid-November planned and directed by the contingent, which was attended by the armored and armored units from 12 allied contingents stationed in the Baltic countries. "It was a real demonstration of the fire, night and daytime power, of all the means of means of course (...) With assessment of both the precision and the time of the time of

the maneuvers ", explains the Army the General Staff. The Italian contingent have edited a course for the staff belonging to the Battlegroupnato in a series of gymnastic activities in the sports areas of Campi Adazi. "aimed at showing the effectiveness of the Italian individual military fighting of the Italian military combat in a contextual context(*MCM Academy*)" of white weapons and "percussion combinations aimed at counteracting the forzenemics in opposition, with fast reaction times and disadvantaged conditions". "The instructors - adds the General Staff - highlighted the psychological FortaComonontonent who involves the military fighter, analyzing the main techniques of stress management, implementing a force of force in adherence to the concept of *force escalation* ".(5) (Fineparte 1).

(Part 2)

by Antonio Mazzeo *

Foreign pages, 11 January 2023 - in August 2022 Italy - together with the Hungarian, Croatian and American army - has joined the new war battalion activated by NATO in Hungary to "strengthen the" anti- Russia in the south-eastern side. **"The Enhanced Vigilance Activity operation(eVA)** In Hungary it is a measurement of a defensive nature, proportionate and fully in line with the commitment of NATO ", notes the General Staff." With the adhesion of the initiative, after the expected parliamentary processive process, the Siconferry Italy among the main contributors' countries , in terms of men, Erisarse means, to strengthen the posture of deterrence and defense of NATO sul fianco east ".

(1) **To cannon in the Hungarian Puszta**

The maximum annual consistency authorized for the contingent in Hungary is a dicerca 250 unit of the army; It is composed - once again - dapersonal of the "Taurinense" Alpine Brigade, in particular of the 3rd regimentalpini, reinforced by components of the 1st Terrestrial Artillery Regiment, of the 1st "Nice Cavalry" Regiment and the 32nd Genioguastatori Regiment, beyond to a military police nucleus of the 1st "Tuscania" paratrooper regimentocarabinieri. Numerous

tactical vehicles supplied, from the "Centauro" blind to the VTMM(Multural Middle Tactical vehicles), ai VTLM(Multural light tactical vehicles)and to the BV206(Tactical vehicles with high -emotibility)typical of alpine troops. To complete the powerful devicebellic device there are also the weapon systems supplied to the artillery units, such as the FH70 Oblici, the 120mm "Thomson" mortars and the "spike" generation counter -color systems with long -range missiles produced by the Companylyian company Rafael Ltd .. "All the departments involved in the operation evaporates from an intense training cycle that saw them participate, solonel'Ad last semester, in the Volpe Bianca 22 exercises in the upper Val Disusa, Cold Response 22 in Norway, Maurin 22 in the 'in Alta Valle Maira and Candelo22 in Baraggia Biellese, not to mention the continuous training splendor to live, move and fight in the mountains ", reports the Army General Staff with Bellica Malcelataenfasi.During the first week of September, the Italian contingent has two different training activities at the same time: the exercise for opposing the opposite named **"Patrol Storm"(storm patrol)** To "combine" the skills of fire and "acquisition of enemy objectives inhabit the environmental condition"; and "Fire Observer Concentration" Persontardize the procedures for the observation, request and management of terrestrial "disburseable by means of an enchanted artillery systems". Immediately after the Alpini underwent four days of shooting, daytime and night and "under stress", individual and department co -ward at the Hungarian polygon of Ujmajor.

At the end of September, in the extensive Hungarian training area of Varpalota, it is turnaround instead **"Brave Warrior"(valiant warrior)** For the validation of the Battlegroup and its passage under the NATO command. The contingents of Hungary, the United States, Croatia Eslovakia also participated in "Brave Warrior", for a total force of over 1,200 soldiers and 300 between ruling, armored and artillery. **Guests and observers "excellent" to the great maneuvers the NATO military leaders, the commander of the JointForce Command born in Brussum, gen. Guglielmo Luigi Miglietta and the commander of the Interforze Covi Interforze, Gen. Francesco Paolo son.** "allow me to say that it is a personal pride to see you engage in this collective Alpine tree of the Taurinense brigade, units that I had the princely to drive between 2010 and 2011," said son the conclusive underground of the War Games. "It is no coincidence that in a mission like this has been chosen a unity of the troops Alpinel'Arcito, proof of the versatility and resilience of a body that written glorious

pages of national and military history, with an employment goes from the desert To the mountain and arctic territories, to which we are more voted, up to the Hungarian plain. Furthermore, you are bearers of those who are the same values of NATO, values that enhance cohesion and solidarity that make you a bulwark in defense of democracy e of freedom ".(2)

On 29 October 2022 the Military Medical Personnel of the Alpini trained themselves trained in Camp Croft at the "first line" jointly with Croatian and US army(Combat Medic Concentration).

"Fondamentale, per i soccorritori militari, la conoscenza delle corrette procedure mediche, oltre che la capacità di operare con lucidità mentale anche in condizioni di elevato stress fisico, dovuto dal peso dell'equipaggiamento edell'armamento in dotazione, nonché psicologico, derivante dall'impatto emotivo del ferimento, in questo caso simulato, di elementi della propria unità", spiega l'Esercito. "Numerosi gli scenari di fronte ai quali si sono trovati ad operare i soccorritori, dagli scontri a fuoco con la presenza di feriti da colpi di armi leggere fino all'esplosione di ordigni quali mine e razzi controcarro a danno degli equipaggi dei veicoli".

Novembre è ricordato per l'esercitazione a fuoco con obici e mortai "Noble Strike" (noble shot), oriented to the "forced of active and passive obstacles by the enemy (mined and reticulated fields) For the following assault, fortified positions "and for" Noble Freedom ", an "offensive "training operation with the participation of over 500 units and 100 war vehicles. The staff of the 3rd Alpine Regiment conducted two weeks in December dedicated to "Combat in "Urbanized areas "at the Command of the 25th armored brigade of the Hungarian army, located in the city of Tata. IL2022 ended with the " Noble Defender "exercise also an orientated urban war oriented and in particular" to the taking of a housing center occupied forces forces enemies with the presence in the area of both non -militant civil staff and explosive traps located by the opponent ".

Antonio Mazzeo è un ecopacifista and anti -militarist journalist who writes of the militarization of the territory and the protection of human rights. Conantonello Mangano, he published in 2006, *The monster on the strait. Seven reasons for building the bridge* (Edizioni Punto L, Ragusa). Del 2010 è il suo *I Padrini del Ponte. Affari di mafia sullo stretto di Messina* (Alegre editions).

Type: article

There are situations, in politics, where the most powerful forces of the modern classes are compelled to resort to opportunistic forces in the Popular Movement to govern their system of exploitation and oppression in the face of dangerous instability to their maintenance. This occurred, for example, Nalemanha, in the period after the First Imperialist World War, when social democracy was raised to the government. In Brazil today - with all devivable proportions - similar phenomenon is observed: in the face of catastrophelolist in the management of pandemic, the profound overall crisis of capitalism and its state apparatus, and in the face of Bolsonarist attempts to precipitate an institutional rupture in the face of an offensive recuitory in Course, the most important sectors of the adominant classes conflined with the election of Lula, even though seeking to impose on him his government program, than derived contradictions and disputes.

Faced with scenarios such as these, opportunists and revisionists always raises the need to intervene in order to change the composition of the government, supporting "more progressive" aspect and seeking to weaken its "real estate aspect", "throwing it" to the left. It is the flag erected, now, by several political

departments of the false opportunist left. This controversy, which is not new either unknown its disastrous results.

One of the experiences emerged from a similar context was in Indonesia. In 1945, he triumphed the national liberation struggle with the active participation of that country's partisanist(PCI). Instaurou-se a República, num governo decoalização que abarcava as classes dominantes e o Partido Comunista, governoliderado por Sukarno – figura reacionária com palavreado nacionalista emedidas reformistas. Influenciado pelo revisionismo, o PCI definiu que erapreciso apoiar Sukarno já que seu governo de coalizão supostamente produziauma mudança de qualidade na situação, e que, naquela coalizão, havia doisaspectos: um progressista e outro reacionário. Os revisionistas definiram,portanto, a tática daquele momento: a conquista de ministérios e gabinetes pelos setores “progressistas”, a derrubada dos setores reacionários dogoverno, a ser garantido pela mobilização constante de massas.

The PCI, after these events, carried out a self -criticism of the “theory of the two government aspects” and to have been deluded on the reformist reform measures and for forgetting that the armed reaction can only be defeated by the revolution.

Revisionists and opportunists advise us to go this way, but conservative differences in conditions: historically, the current government is far behind what was the reactionary government of Sukarno, including the political accumulation of mass mobilization that had produced the proclamation of the public at that time; Just as our opportunists are much more right than the PCI itself. Offering expectation in the current reactionary government government is even worse than expected something at Indonesia from 1948.

Revisionists can see no more than what is low to their nurses, revealing that they are supporters of US pragmatism emoidology and unionism in politics. The revolutionary path remains: fighting the coup and the far right, boosting the claims of masses and, at the same time, making the masses see that they can and do not even expect from the reactionary coalition of opportunists and the right-wing, but to count on their own revolutionary organizations themselves and class independence.

BANNEDTHOUGHT - Time: 2023-02-17T99:00:00-04:00

Except for volume 16, we now have all the first 26 volumes of the massive series, *Documents of the Communist Movement in India*, published by the Communist Party of India (Marxist). Although this has long been a notoriously revisionist and establishment party, whose documents are not normally banned, these hard-to-find volumes are being made available here for reference.

We hereby publish a joint statement signed by the Swedish Communist Association, Anti -Imperialist Federation [Finland], anti -imperialist collective [Denmark] and Red Front [Norway]

Proletars in all countries, unite!

Against Swedish and Finnish NATO membership!For Socialist Revolution!

After Russian imperialism's war of aggression against Ukraine started on 24. February, the Swedish and Finnish imperialism decided to join the Sigden North Atlantic Treaty Organization(NATO). NATO er et redskab for USA-imperialismen - i dag den eneste hegemoniske supermagt - til sin hegemoni, der primært er rettet mod de undertrykte nationer, i overensstemmelse med hovedmodsatningen i verden, og sekundært er det præget af de imperialistiske modsætninger, primært mod atomare supermagt af russisk imperialism.

NATO har ført og fører stadig aggressionskrige mod de undertrykte nationer over hele verden. Det har f.eks. mange igangværende »fredsbevarende« operationer i Afrika, og det blev også brugt i den berygtede krig mod Afghanistan (2001-2021) And in Yugoslavia in the 90s.

To understand the Swedish and Finnish NATO processes, we must look at the interests of US imperialism, ie. That it needs to counteract the Russian aggression to consolidate its gains in so-called Eastern Europe after the collapse of Soviet social imperialism in the early 90s, and it is also in competition with its European energetic "allies," especially German imperialism. On the other hand, Den American Imperialism is moving its focus to East Asia to combat Chinese imperialism and try to curb its ambitions, and for this purpose, the United States needs a secure base in Europe. Therefore, it is the need of

US imperialism to strengthen NATO's "eastern flank" by incorporating Sweden and Finland.

But it is not against the will of these less imperialists. On the contrary, DEDEN utilizes interimperialist competition between the larger imperialists, and they also have their own interests in Eastern Europe, especially in the Baltic.

Swedish and Finnish NATO membership will mean greater reactionarization and militarization of the ancient states, greater decay of imperialism and the size of all the basic contradictions. Thus, the objective conditions of anti -evolution are even more mature, which emphasizes that revolutions are the main trend. In this great and delayed task, the Communists in Sweden and the Finnish eyes have rigidly aimed at the most advanced battle in some NATO country, namely the Power War led by TKP/ML, following its mighty example and letting sig-inspirers of it.

down with NATO, an Imperialist Alliance!

live the revolution and the People's War!

For the reconstitution of the communist parties!

SIGNATRERS:

Sweden's Communist Federation

Anti -imperialist federation [Finland]

Anti -imperialist collective [denmark]

Red front [Norway]

PC February 18: Italy's steel sheet/contract: "The interests of the workers are not at the Odg of the tables"

Author: fannyhill

Description: None

Time: 2023-02-18T10:30:00+01:00

Images: [['foglio%20ilva%20x%20apa_page-0001.jpg'](#), ['foglio%20ilva%20x%20apa_page-0002.jpg'](#)]

Foglio Acciaierie d'Italia/Appalto Taranto Roma e dopo

Netta insoddisfazione per gli esiti dell'incontro romano Governo Meloni/Urso e AM e di quelli successivi con la Morselli/Acciaierie.

Governo e Azienda hanno ancora risposto negativamente alle istanze ed esigenze espresse dai lavoratori nelle assemblee e nello sciopero del 19 gennaio.

Il comportamento del governo e di AccelorMittal continua ad essere arrogante, reticente sugli effetti verso i lavoratori dei loro piani immediati e futuri, ma nessuno smentisce che la prospettiva è di migliaia di esuberanti nell'ordine di 2500 lavoratori, permanenza, oltre che aumento da subito, della cassintegrazione, con ricadute gravissime nell'appalto (altro che rientro delle attuali Ditte in sospensione, che doveva avvenire a metà gennaio), e mancato rientro dei lavoratori in cigs in Ilva AS.

Il governo dice solo: Sì al decreto, Sì alla Morselli, Sì ai soldi senza garanzia all'azienda, Sì allo scudo penale; No all'estensione dell'intervento pubblico e ad ogni ipotesi di nazionalizzazione.

Ha detto a Roma ai sindacati di presentare proposte di modifica del decreto, ma al Tavolo convocato il 27/1 per questo chi ha fatto da padrona è stata la Morselli che ha chiesto sì modifiche ma per peggiorare il decreto, affinché le aziende siderurgiche abbiano mano libera, si riconosca il "principio di libertà dell'iniziativa economica privata"; che sia il socio pubblico a mettere i soldi per il rafforzamento patrimoniale dell'azienda perché "AccelorMittal ha già dato"; che la confisca, il sequestro di impianti inquinanti o pericolosi non deve riguardare siti di interesse strategico.

Che fare allora?

Occorre rilanciare la lotta unitaria degli operai, ma se questo i sindacati confederali e l'Usb dopo Roma stanno facendo "luna francese e ritirata spagnola", e si continuano a fare Tavoli inutili per gli operai: alle "alte grida" di Roma corrispondono niente fatti. E le denunce/lamenti dei segretari di Fiom, Uilm diventano di fatto delle sceneggiate.

Nello stesso tempo gli obiettivi portati ai Tavoli: aumento dell'intervento pubblico e maggiore produzione mettono in ombra i veri obiettivi e i veri interessi dei lavoratori su cui bisogna ottenere risultati concreti:

- 1) rientro di tutti i lavoratori delle ditte dell'appalto sospesi a seguito della lettera della Morselli;
richiesta scesa di integrazione salariale per tutti gli operai cassintegrati esistenti attualmente;
rientro di tutti i cassintegrati; effettiva ambientalizzazione della fabbrica sotto il controllo operaio;
all'appalto, contratti a tempo indeterminato e contratto unico metalmeccanico con clausola sociale;
- 2) Si deve aprire una nuova trattativa con l'azienda ma nella quale riprendere quantomeno i contenuti e le rivendicazioni già decise nel coordinamento nazionale della Rsa FIM/FIOM/Uilm di questa estate e quelli posti dalla piattaforma operaia proposta dallo Slai cobas sottoscritta alle porcinerie da oltre 400 operai, unita alla ripresa della lotta per aumenti salariali a fronte del caro vita/carobenzina, ecc.
- 3) Si facciano vere assemblee generali di tutti i lavoratori all'esterno delle porcinerie
- 4) Decidere una giornata di sciopero generale dei lavoratori acciaierie/appalto estesa a tutti i metalmeccanici e a tutte le categorie in sofferenza, che fermi davvero fabbrica e città.
- 5) Chiamare a questo le masse popolari tarantine che hanno bisogno di lavoro, reddito, salute altro che "Accordo di programma" come quello firmato da Emiliano e Melucci a Roma fatto non di aria buona ma di "aria fritta" e che riempira le tasche solo di padroni di ditte turistiche, commercianti, ecc.

Chiaramente lo Slai cobas propone ai lavoratori di farsi sentire anche verso i propri vertici sindacali, di sviluppare iniziative autorganizzate dal basso sulle condizioni e problematiche esistenti nei reparti e nelle ditte d'appalto.

Occorre però un cambio, gli operai lo devono capire, perché non va bene neanche tra gli operai non partecipare agli scioperi o incalzarsi a Roma, parlare a Roma di continuazione e indurimento della lotta poi venire Taranto e accettare che tutto continui come prima.

Lo Slai cobas porterà la questione di una iniziativa nazionale a Taranto in occasione dell'Assemblea nazionale anticapitalista a Roma 18 febbraio

Gli interessi degli operai non stanno all'OdG nei Tavoli

Le dichiarazioni di Fiom, Uilm, Usb dopo incontro al Mimit

Di Palma Fiom, sottolineando positivamente l'apertura di Urso sulla possibilità di modificare il decreto su proposte delle organizzazioni sindacali, ha detto che i nuovi scioperi devono servire ed essere finalizzati a questo scopo, a "convincere Ministro e governo a prendere in mano l'azienda". Lì dove Urso vuole operare solo nella direzione posta dal decreto e ha detto un chiaro No ad aumentare l'intervento pubblico prima del 2024 e chiaramente No ad una nazionalizzazione; lì dove, quindi, Urso e il governo continueranno nella strada voluta da AccelorMittal, 680 milioni ora e poi 1 miliardo per sostenere l'azienda e la produzione.

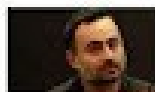

Quindi questa modifica del decreto è un bluff, che darà fatto solo ad azienda, parlamentari e addetti ai lavori. Inutile e deviante invece per la lotta degli operai e gli obiettivi operai.

Rizzo/Usb, pur parlando di avviare iniziative di lotta senza escludere niente, di fatto anche l'Usb ha sottolineato la disponibilità del governo/Urso a modificare il decreto, e quindi gli obiettivi della lotta sarebbero soprattutto questa modifica; poi ha criticato Urso che prima aveva detto una cosa sull'anticipazione del capitale pubblico e poi all'incontro avrebbe detto il contrario (ma in realtà le vere intenzioni del governo si erano già ben capite). Fermo restando che sia privato sia pubblico la prospettiva resterebbe comunque di 2500 esuberanti, licenziamenti negli appalti, non rientro dei cassintegrati Ilva AS. Rizzo poi denunciando a Roma l'"accordo di programma" voluto da Urso e accettato con entusiasmo da Sindaco e pres. della Regione, ribadisce la sottoscrizione di un accordo di programma tipo Genova per i lavoratori in cigs di Ilva AS, che di fatto è un abbandono della lotta per il rientro in fabbrica e da come sola prospettiva di lavoro i Lps, e per ridurre il peso di produzione di acciaio per una ipotetica riconversione produttiva.

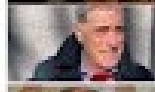

Palombella/Uilm. Ma il massimo del sistema di alzare un polverone per poi proporre... un'esposto alla Magistratura, lo ha fatto Palombella. Sì continuare la lotta... ma le iniziative di lotta devono soprattutto servire a "impugnare davanti alla Magistratura l'accordo del 2018, perché quell'accordo va rispettato". Quindi, nessuna concreta indicazione per proseguire scioperi e iniziative di lotta ma... costruire subito un "pool di avvocati" per questa impugnazione. Così, ha aggiunto, li metteremo in difficoltà...

Questo è ingannare gli operai. Che cosa dovrebbero fare gli operai, aspettare anni per avere un risultato nel Tribunale? Mentre andrà avanti a tappe rapide l'estensione della cassintegrazione, il peggioramento dei salari, possibili licenziamenti nelle ditte, la continuazione dei gravi problemi della sicurezza e dell'inquinamento, il futuro prossimo di esuberanti, l'aumento dello sfruttamento di chi sta in fabbrica con l'aumento della produzione, ecc?

PAGLIACCIE 1

A Roma Fiom, Uilm si erano sbraocchiati a dire che la Morselli se ne doveva andare, che la Morselli era il guaio di tutto quello che succedeva a Taranto...

improvvisamente nell'incontro del 30/1 Fim, Fiom, Uilm parlano di clima "costruttivo", che la Morselli era "combata", che si era stabilito un clima disteso, di disponibilità alla discussione da parte aziendale a trattare sui numeri dei cassintegrati...

Ma... neanche due giorni dopo Acciaieria/Morselli annuncia un prossimo aumento della cassintegrazione

PAGLIACCIE 2

Alcuni giorni dopo che la fabbrica andava chiusa l'assemblea nazionale per il 2024 che la destra/corrente socialista, la frangente ecologica socialista, perché sostituisce ad un esempio dell'ecologia, rappresenta un'immagine piena di contraddizioni di Slai cobas di Taranto...

Ma ora, con in tasca un accordo di programma che non dice nulla, e dopo aver detto Sì a Roma al decreto Dva, dichiara: nessuna nasconde che la transizione ecologica comporterà esuberanti, sacrifici...

La Regione Puglia mandata nel giudice penale dell'associazione Sbarbari Taranto contro la Rsa e Acciaierie d'Italia presso il tribunale di Bari...

Ma ora, con in tasca un accordo di programma che non dice nulla, e dopo aver detto Sì a Roma al decreto Dva, dichiara: nessuna nasconde che la transizione ecologica comporterà esuberanti, sacrifici...

Ma non è detto che all'appalto deve andare sempre peggio

Per i lavoratori Triton srl porto appalto

Acciaierie con lo Slai cobas si è scongiurato un passaggio d'appalto peggiorativo e si è tutelato il lavoro di tutti e preparato un futuro migliore

Un'esperienza pilota

Al porto nell'appalto Acciaierie i lavoratori portuali della Triton srl si sono organizzati tutti nello Slai cobas per il sindacato di classe a fronte della situazione determinatasi sul loro posto di lavoro, nel quadro più generale di quello che sta succedendo nell'appalto Acciaierie.

La Triton srl aveva messo in cassintegrazione tutti i lavoratori e affidata la ripresa del lavoro ad una nuova commessa di Acciaierie; ma per motivi legati a ragioni generali di Acciaierie e particolari del Porto, questa continuità con la Triton non è stata possibile.

Ci si è trovati, quindi, ad un cambio d'appalto con la nuova azienda (Belyum Castiglia che ha espresso la volontà di assorbire tutti i lavoratori Triton, inizialmente però per tre mesi.

I lavoratori e lo Slai cobas hanno chiesto invece che questa assorbimento avvenisse a tempo indeterminato dato che, a fronte della continuità dello stesso lavoro e sostanzialmente con la stessa attrezzatura, era la forma più giusta di questo passaggio, per tutelare lavoro, salari e diritti dei lavoratori operanti al Porto da molti anni, e che hanno dato in tutti questi anni il massimo affidamento e professionalità nel svolgere questo lavoro.

La trattativa, dopo fasi di confronto e anche di divergenze tra i lavoratori organizzati nello Slai cobas e la nuova azienda, si è conclusa con un accordo che assorbe dal 1° febbraio tutti i lavoratori a tempo determinato con contratto metalmeccanico per un anno e con una proroga per il secondo anno. Si è sventata ogni ipotesi di contratto Multiservizi e nell'accordo sindacale è contenuto l'impegno dell'azienda al futuro passaggio a tempo indeterminato a tutti i lavoratori e una garanzia di parità salariale rispetto alle attuali retribuzioni.

Si tratta nel panorama di crisi, licenziamenti, cassintegrazione, precarietà, perdita di diritti e di salari dei lavoratori di un accordo in controtendenza, ottenuto con una partecipazione compatta dei lavoratori ad ogni momento della discussione e della trattativa.

Una esperienza pilota che dovrà essere generalizzata in tutte le aziende, in particolare in quelle degli appalti nello stabilimento e al Porto operanti per Acciaierie/ArceclorMittal.

Naturalmente importante sarà sin dal 1° febbraio mantenere forte l'unità, la partecipazione e la democrazia autorganizzata dei lavoratori dello Slai cobas.

Alla Pellegrini a partire dalla denuncia dello Slai cobas si comincia a modificare un'accordo discriminatorio

Sono stati stabilizzati 70 lavoratori della ditta Pellegrini, che si occupa di pulizie nell'ambito dello stabilimento siderurgico di Taranto, nonché l'incremento delle ore lavorative settimanali che salgono a 24.

La platea di lavoratori è stata dapprima inserita nel ciclo lavorativo, in piena pandemia Covid, con contratto a tempo determinato, poi prorogato anche oltre la fase calda dell'emergenza sanitaria, ma sempre con contratti a termine..."

Questo risultato è venuto dopo l'aperta contestazione di un accordo sottoscritto a marzo scorso tra la Pellegrini e Cisl, Uil, che invece non garantiva il passaggio a tempo indeterminato per tutti i lavoratori interessati, e soprattutto legava per tutte le lavoratrici e lavoratori a meno di 24 ore prima del lockdown, il mantenimento dell'orario dell'orario ottenuto nei due anni di lockdown al non superamento di 48 ore di assenza anche per malattia, in un periodo di circa un anno, attuando di fatto una grave discriminazione e una violazione del diritto di malattia, che colpisce soprattutto le donne.

Memoriale Processo Ilva "Ambiente svenduto"

**Nessun passo indietro.
Contro i padroni assassini e i
loro complici giustizia per
operai e popolazione**

Nocivo è il capitale non la fabbrica

Questo "Memorial processo Ilva "Ambiente svenduto" raccoglie quasi giorno per giorno, udienza per udienza quello che è avvenuto durante il lungo processo.

Un processo che inevitabilmente, sia pur nei limiti di aule giudiziarie in cui la "legge non è uguale per tutti", ha messo in luce tutta la ferocia dei padroni e della corte al loro servizio.

Un maxi processo a padron Riva, ma in realtà al capitalismo, al suo sistema economico, politico, legislativo; ai complici e servi dei padroni, che traggono il loro profitto e il loro potere dallo sfruttamento e dal sangue degli operai, schiacciando lavoratori e masse popolari.

"il capitale, come diceva Marx, viene al mondo grondante di sangue e sporcia dalla testa ai piedi, da ogni foro..."

Ma il capitale genera esso stesso la propria negazione, forgiando le forze, la classe operaia, che lo rovescerà.

Manifestation of the nurses occurred in the region of Shopping da Bahia, in Salvador. Photo: Reproduction/Internet

In great national mobilization, nursing professionals performed a whole of protests in defense of their attacked rights. Nurses, assistants and technicians from all over the country held demonstrations, blockages and paralities on February 14 with the unified agenda that requires the tax salary, barred by decision of the Supreme Court.(STF)in September 2022.

The acts took place in the states of Bahia, Minas Gerais, Amazonas, Rondônia, Piauí, Rio Grande do Norte and Pernambuco. They clash with the decision of the Dominator Luís Roberto Barroso of the Supreme Federal Court(STF). O ato foiconvocado nacionalmente pelo Fórum Nacional da Enfermagem (Fne), which stateshaver indicative of national nursing strike for March 10 if workers' claims are not fulfilled.

The suspension of the law occurred after it was questioned by the private health billionaires and reactionary politicians who present the excuse that “there is no money” to ensure a worthy salary for health professional. There are more than 2.5 million health professionals at nobrasil affected by the outdated salaries. Like other sectors of work in the country, they are being subjected to exhausting working hours, often without vacation and paid rest.

They exercise their profession in scrapped and crowded hospitals from patients, in a profession with a high degree of unhealthiness. The national movement equals hypocrisy that, during the Covid-19 pandemic, all the reed sectors, including the monopolistic press, criticized Bolsonaro's military government for “not valuing health professionals” and now they do the same.

The application of the floor would guarantee nurses the amount of R \$ 4,750; for auxiliary and midwives, 50% of the value, ie R \$ 2,375; and for de -nursing technicians, 70% of it, equivalent to R \$ 3,325. Only for comparison, Odieese points out that for a Brazilian family to live with dignity the value of the minimum overcoat should be \$ 6,575.30.

While the nursing salary remains outdated, a salary increase of18% to the STF ministers was approved with peace of mind and will be made from April 1 this year, in the amount of R \$ 41,650.92.

Nursing professionals perform demonstration in the center of Belo Horizonte, in national stoppage of the category. Photo: Database and

Nurses, technicians and nursing assistants performed a manifestation in the center of Belo Horizonte on February 14, requiring the payment of the Daenfermage Salary Floor. In an interview with **and** , Leide Fernandes, a nursing technician, stated that “[this] is a historical struggle of this category and needed a pandemic and several workers die so that our category was remembered and remembered, including by the government" " , adding that "we

are here together and strong and we will not get out of the streets while our floor does not effectively in our paycheck."

Professionals of nursing in protest in Juiz de Fora. Photo: Reproduction/ G1

In Juiz de Fora, dozens of nursing professionals held a 14/02 morning protesta in the city center. With banners and posters, they sang: **If the floor does not arrive, the nursing will stop!**

One of the members of the Judge Defora Municipal Public Servants Union(SinserPu)He said, on the protest, the G1 Press Monopoly: "Today is a stoppage with a possible indicative of strike if there is no progress due to the government. We also want Juiz de Fora to follow many municipalities to adopt, which is already implementing the floor, since today we receive less than a community health agent. "

On February 14th, as part of the national nursing mobilization by the Thighs, students and professionals in the field performed an act in front of the health of health in Brasilia.

[See here the **and** doat] coverage](<https://www.youtube.com/watch?v=D7tN4mkFli0>):

Nurses, technicians and nursing assistants performed a 24 -hour stoppage at services in Rio Grande do Norte health facilities on the day14/02. According to the category, the measure aims to charge the implementation of the padonational of nursing. It is maintained in the units only the percentage of 30% of work.

According to the Health Workers Union(Sindsaúde), the state has about 46,000 nursing professionals, considering nurses, and auxiliary technicians. Only nurses, there are 16 thousand. All of these professionals today see the salary outdated.

Nurses, assistants and nursing technicians conducted a nation of Recife. The act began around 10am, in Derby Square and followed Avenida Conde da Boa Vista, one of the main bus corridors of the state government palace.

Protesters demanded from Governor Raquel Lyra(PSDB)The fulfillment of a campaign promises, which was the implementation of the floor in the state from January. "Raquel Lyra promised in the campaign our floor. We are always

service in the pandemic or carnival, and we want the Queee promised," said worker Edvânia Rodrigues to the Monopoly Defansion G1.

Professional nursing work is carried out in Caruaru. Photo: SEEPE
Decommunication Advisory

Already in the city of Caruaru, in the Agreste de Pernambuco, the act of nurses passed through the main streets of the Center and headed towards the Secretariat of the DECAUDE, in the São Francisco neighborhood. In the fight for the fair salary for the Owners, the primary health care services were paralyzed at 100%.##### **RO: Professionals make manifestation and require their rights agovernador**

Nursing professionals in Rondônia performed a stoppage on the day 14/02. The demonstration began in front of the political-administrative center of Rondônia. The gifts required the implementation of the Salary Floor questioned the state government's allegations that "there are no funds" for the realization.

On the morning of February 14, nurses, technicians and nursing assistants parted with an act in Felix Pacheco Square, downtown, gathering fees of professionals.

Raising posters, professionals report that non -payment of the floor is a devaluation of the profession. Nurse Iago Carvalho, in an interview as a local city green newspaper, emphasized that the category will continue to go to the streets to be wage update: "It is a very important time for nursing, where we are looking for, aiming for this floor. streets, manifesting ".

Nursing protest in Manaus. Photo: Nainy Castelo Branco/Amazon Network

In Manaus, the manifestation of professionals started in the Square of Conjunto Eldorado and walked to the Legislative Assembly of Amazonas (Hazard). A manifestação foi realizada pelo Conselho Regional de Enfermagem do Amazonas (Coren-AM), together with the Amazon Nursing Entities Forum (Feeam).

PC February 18: the first lesson of the Marxist training. "... science asks for commitment ..."

Author: fannyhill

Description: From the presentation we begin this cycle of training that we called Marxist training, a sort of "class university", for ...

Time: 2023-02-18T11:00:00+01:00

Images: []

from the presentation

Let's start this cycle of training that we called EducationMarxist, a sort of "class university", because the workers, lelavrators, workers must know, must know for having analysis autonomy, of evaluation that serve above all not to pert for us this knowledge , but to arm us, to transform reality, because this reality is not immutable, it is not that there must always be who knows and who is exploited, who dominates and who is dominated.

It is important to have a scientific knowledge, but it is known that it clearly also asks for commitment, attention, that we need it precisely to do precisely or not to be like sponges that absorb ideas, the dialytrs analyzes, which are 99% ideas and analyzes that analysis that They want to make current laesuitation eternal, the reality of the bourgeoisie, of the capitalist system.

This decision to make these basic Marxist training cycles with the Abiamopresa together with Rome in the anti -capitalist proletarian assembly of 17 -sixtembre. So this is only the beginning.

Each time the cycles will be made on a seat in a city, but with collegamentocon the other locations, with the other cities.

The "lesson" of prof. Marco's

Tonight we have to start this demanding cycle of work, so we have a few bluntly to work, I will try to be as clear as possible, clear Pusnon can mean simple, they are two different things, because the matter is overcomplicated, it is a science and therefore it is complex and science yes she studies.

We decided on this new course between the Rome Assembly and a meeting that we had on the net. Other years we have made meetings of this kind, however, dedicated to the study of a text by Marx, Engels or Lenin. This year, instead we do a different thing, that is, we do not do a rampant cycle on a single text, a single book by Marx Or Engels or Lenin, we make a themed speech, we try to isolate a problem, a theme.

Let's start from Marx's critical work to the science of the political economy. Marx has passed great And then I begin by saying that Marx at 26 wrote in Paris, after being away from Germany, three notebooks dedicated to the political economy in which he, in one of the salary, capital, interest, profit of the CAPITAL and land income, in another of private property and in another of private property and communism. These three texts, this one manuscript were published only in 1932 and were known for economic-philosophical such as 1844.

Then the motions of 1848 broke out, therefore, and we are in 1849, he and Engels funded a magazine, the new *Rena Gazzetta* where Marx wrote a series of the DIESTORIAL who were taken by conferences that kept the workers on the report waged work and capital and you can find it in a *Agile* volume, *Lavoro salariato and Capital*, for example, a volume that during the course of Editadi I would suggest you to read this year. In these conferences he kept on the Operai he explains the waged work, the capital, even if he had not made the fundamental discoveries he then did.

When he went into exile he studied money in London. He stood 10 years old (In the meantime he had begun to get sick) To work to clarify the enigma of money, because here we have to talk about money, in short, but to arrive at the goods, to the capital.

In August 1857 a great capitalist monetary crisis broke out, and Marx wrote: here is the opportunity, and that was the *Stura* to publish seven notebooks on 1857, the outbreak of the crisis, and 1858: 7 Notebooks where he made a blaze of his criticism in the 'Political economy, not published: they are called the fundamental

links of the criticism of the political economy, _ were unplugged with the German name *grundrisse*. Then the long study on the political economy began.

Marx had made a great project for the scheme of the political economy, located in the following topics: the first, the capital, the second, the annuity, the third topic, the salary.

The first two are the masters ... the salary are always the masters who ciaboard workers and exploit them ... therefore capital, land and salary annuity. Esono, said Marx, the three parts of civil society: capitalists, ownership(The owners of the earth)and wage workers.Then, after capital, land income, salary, we have three other parts: state, foreign trade, world market, and then the crises. So six parts, these were the sections.

Then the project had to be financed, but there were difficulties(The fact that he was sick, the fact that he had no money, at a certain point Ifigli who died him ... then received a small inheritance after the death of the Madre and then the project ended up)Under pressure from the publisher in 1859 he published a first part. Then he had to start this very first part of this galactic thing, the capital, Ecio is two chapters dedicated to goods and money. The Grundrisse begins Coldenaro to get to the goods, but then Marx understood that in the exhibition to understand, we had to speak before the goods and then of money; leave more complex and then break it and go to simple thing.

He wrote these first two chapters, the goods and the money; He gave them to the publisher because he needed money, later he stopped. But, he said then the workers had read and understood them.

In the early years of 1860 he finally began to splash all the other parts, that is, capital, land income, salary, state, foreign trade and marketing market. But at this point he understood that he had to find a point that binds these things and understood that if he traced everything to the concept of capital, you understand better: the capital, *ist* , is, *der inbegriff* , means the laquinasnce of the thing, because it collects.

So what started to do? First of all he began to write about about the political economy, after which what does he do? "Caregiappa" thisocapital and sees that it is made first of all. The profit, made of course, with the sweat of the workers, the master lords if they are loyal between the actual profit of the industrial capitalist, the banker interest, and land income, that is, of the land owner, that is,

of the earthly reproducentaire which can also be the owner of the mines, The Property of the properties(For example, Mr. Mittal has all the things: the profit part of the industrialist, that of the owner, we do not know banks). Quindi qui c'è la spartizione tra queste classi che, dice Marx, sono fratelli nemici, che però quando si devono spartire il bottino si comportano come una vera massoneria verso gli operai.

In 1867, another economic crisis, another commercial crisis, and Marx pubblica finally made another work that spoke of the capitalist process of the Diproduction, entitled *The capital, criticism of the political economy*, here is i'capitale', but as regards the process production capitalist.

Then after him he began to work on circulation, that is, the product, the goods, must be sold, and then he began to study circulation(To make you understand: the logistics, the warehouse where the goods station before being was).

Nel 1871 ci fu la Comune di Parigi, cioè gli operai si impadronirono per un momento del potere, e questa cosa naturalmente cambiò tantissimo l'organizzazione della Internazionale per cui Marx ed Engels avevano avviato i lavori. Dopo la Guerra franco-prussiana e dopo la sconfitta della Comune di Parigi il centro del movimento operaio, delle lotte operaie si trasferì dalla Francia alla Germania dove nel 1889 si arrivò alla Fondazione della Seconda Internazionale.

Marx, vuoi per motivi di salute, vuoi perché anche quel genio aveva già scritto queste cose in appunti, non poté chiudere per la pubblicazione i suoi scritti, proprio perché aspettava sempre qualche crisi che gli confermasse le sue ipotesi.

Poi nel 1883 morì, e allora Engels che cosa fece? Engels pensò bene di pubblicare queste parti non pubblicate. Pubblicò la parte sulla circolazione e lo fece diventare il secondo libro del capitale, intitolato *Il processo capitalistico di circolazione*. In verità Marx gli aveva detto di fare così prima di morire, ne avevano parlato. La terza parte, la spartizione del profitto tra i vari capitalisti, per cui Marx aveva lavorato al contrario di quello che uscì fuori, perché aveva studiato tutta la spartizione del profitto, poi s'era guardato la produzione, poi si era guardata la circolazione, cioè era partito dal più complicato per arrivare alle parti... proprio come un biologo che piglia un animale e prima lo guarda tutto intero, poi lo comincia ad anatomizzare, a spezzettare nelle sue parti, e poi ha

dinuoovo l'intero (So I explained to you the Chesi scientific exposure technique calls dialectic, dialectic is precisely this way of proceeding: there is first of all, as they say technically, an immediate intuition, then I break, here is the analysis, then you have a new synthesis who gives you back the previous one, but but you have passed through it).

In fact Marx before he died was interviewed by an American journalist who asked what he really is, being? And Marx replied: The struggle, because the movement is.

This method had also intuited it, even if he did not know what he did, Darwin, who had studied the organic world and had actually discovered this, but he since Marx says, he was a bourgeois influenced by the marketing jetting of the "case": It happens by chance, instead there is an internal law, Emarx discovered it for society but we see that it also works throughout wool.

Now we have to extract from everything these things that I said what Ciserve to continue gradually to penetrate this story: capital, land income, wage work, state, foreign trade, world market, bearing in mind that the quintessence is to bring it back to of capital.

So now let's try to take a step forward again.

Before, however, I must say something that I had forgotten, that of mentioning the most important twooperes for Marx: one came out in the years 1843-44 and was called Lectures of criticism of the political economy - but only that it was Marxche was not Marx, he had A mask and his name was Federico di surname Engels ... without this work Marx would not have started working, Engels anticipated him, prepared the job. Then another economic work of Engels always: *lasiation of the working class in England* , a milestone on Cuimarx builds his work. In the first book of the capital, the production processionary process, in the eighth chapter on the working day, which is the heart of the whole problem, Marx explicitly refers to _ " _la s__ station of the working class in England" _ of Engels, who in the Suogeniale Written presents us the champion for the fight of the working day, the English working class.

However, all the genes do this, that is, they start from the work already prepared here da altri, in fact Engels said of Marx: he is a genius we are talents, if I would like to say what is the most important thing from which to start a path inmarxism must be started from *la Situation of the Ayninghilterra working class.* _The

political economy is responsible for defining what wealth is. This is an object of political economy, and in this sense it is a modern science. Evi will answer me: and why in antiquity, in the Middle Ages, there were no poor rich, there was no wealth? Answer: Yes and no! There was, but it was another, modern wealth presents itself as follows: each has it in their own money. This is why the political economy must be started by Daldenaro, because this is the specific form of modern wealth; Ancient larica was another thing, it was probably not called even, because Marx says in the _grundrisse: _ "at the ancients I did not find an investigation on which form of land ownership [because the property was clearly there, there were no industries evidently] Create the productive wealth, greater. Wealth does not appear as the purpose of production ... the investigation is always aimed at establishing which form of properties creates the best citizens ". So the problem of the ancients was not what the production formation was, but which production creates the best citizens, because ancient ancient had the problem of forming the best citizens(The best entrances of the _aristoi, aristocrats) _, _ the best citizens of spiritual insane.

But why, do you say, those didn't struggle? The slaves worked!The ones called like this, *instrumentarium vocal* , production tools, while the animals were *instrumentarium semi -vocal* , semivocal tool tools; And the slave is not a citizen, he was below equindes, democracy was the democracy of whom? Of these citizens who eranomed land owners, not large landowners, non -landowners, medium, the average class. A great great theorist, poet, governor, of antiquity - was called Solone - he had made the division of the lands Ele had distributed equally among these average citizens who could also poigrazie to this landed property armed by himself and make the army perceiving the base Army to protect the citizens who armed themselves from himself this was ancient democracy, that is, the democracy of these proprietarimeds, in fact Solone had put stunned stones that marked the variouspropriety. So you see that here wealth is not the problem, IlProblema is of the best citizens, that is, wealth is not the purpose of the production but the purpose of production is to form the best citizens.Marx continues, "therefore the ancient conception of the world according to which man, what his limited national, religious, political determination is the purpose of the production, seems very high towards the mondomoderno, in which production presents itself as The purpose of man and the wealth of the purpose of production ".

It seems that the ancient conception for which man is the purpose of the production is high of the modern conception for which production is the purpose of man and wealth the purpose of production and below there is a sharing, but modern to arrive for Understanding that there is a losfrutation, for the ancients no, because the ancients appeared natural, the order of nature appeared.

This is why political economy can only be born in the modern world, where man is the purpose of production, but production is the purpose of man, and wealth the purpose of production ...

So, what should we get to go to socialism? You must get to the production that has man has the purpose of the production, but Nonci you can get on the assumption of the ancients if you do not ask slavery, you have to arrive through everything that produced the shit.

Many of the "companies" think of overcoming capitalism returning to who knows the ideal world that has never existed, the small producer, no. You have to do this step to get to find the man, this is Ilpunto. Therefore Marxism has argued with anarchism.

Our problem is to understand this paradox, which is not a paradox, that is, to go through the negative to get to the world in which man is as the purpose of production; But passing through this, why? Why do you have the world market, the great industry, the mobile phone, etc., all that you can build rationalism on rationalism. But it is not only the trade, we have made progress, because trade is universal of gold, because marketing means money, goods, the commodity of prosperity, says Marx: in moments of prosperity, Ilgido resounds "only the goods is money", That is, the rich man who holds the goods and checommercia, is the moment of the first colonization, the Eastern Indies, the Netherlands; Instead in moments of crisis only money becomes important. Imonetharisti understand the bank, the merchant understands the exchange.

But there is one, however, this is also unilateral, why yes, trade, but who produces the merchandis commercial? does not go down from heaven? There is someone who Ladeve produce. Behind the goods who is there?

And another great current arrives, now we are in the 18th century, now people arrive, smart, a current arrives called the physiocrats, who are they? There is a great exponent, it's called François Quest. Work called *Tableau é économique* , economic table; These are very digrand economists behind the French

Revolution. What do you do? They presented themselves as a feudal economists, defended the earth, but behind these faces, behind these signs, these present themselves medieval clothes dresses, instead below they said a very modern thing, these say: the real wealth is the earth, the source of wealth It is the agricultural_lavoro_, it begins to come out _The work, _ the agricultural work. For the products of the earth you create the means of subsistence to eat with the products and the woods of the mines you create the means of production to pearly, so you see that the earth And agricultural work are the source of technician. And here Marx says: this is a great progress, compared to the Aimonatristi and to the mercantilists we have made enormous progress, because we have been arrivaricated to something that is truly universal, that is, without agricultural work without work in the mines, etc., you may have means of production Emezzi of subsistence? You already see the constant and capital capital here already, means of production and means of subsistence; You have llsalario in a nuce and you have the capital in a nuce. At this point what discovered this this question? That the earth is commendable, and the French revolution was born on this prerequisite, that is, the thieving of the feudal lands and the possibility of selling the earth. It is not Comevi they taught at school that at some point the French revolution. What does it mean? Do you get off the sky? It is prepared! It means that already Louis XVI was now taking place. Lenin writes a very step on the failure of the international II when he says: "Unarivoluration why breaks out"? Not only because there are those who are exploited and do not be exploited more, but also because the exploiter can no longer be kept old relationships ... ".

Marx is very good at understanding the importance of these who begin to discover the plus value. And how did they find out? A great Italian physiocratic, Ferdinando Paoletti said it: "Look at the superiority of the agricultural worker: we put a plate of peas in the hands of a cook who takes these eti peas makes an exquisite dish, put it in the hands of a farmer and lets out unquital" ... Here is the agricultural work it produces.

But there was still unilaterality and now we come to the culminating point of political economy, now it can come from the outside world, from the industrialist, the first prince of the political economy, the largest Adam Smith, author of a book, coincidentally: *The wealth of nations* . _And here comes the political economy, where the problem is however: that _I economy remains at this point , that is, established that wealth is work, why Marx says, but before Marx others had said

it, the worker, that is He who works and goes from one job to another more produces epiù wealth impoverishes? To this the political economy had not given response.

And then, at this point, all of people who were called social reformers began to appear in England, who before Marxsi began to ask for all this, that is, why the utmost wealth of the maximum misery, as never right in England, in The one where the utmost wealth traders, producers, there was the Maximamiseria.

This is all the problem that the economy understands, and it is the greatness of questions. Adam Smith, and then later another, David Ricardo, cynical erare, says Marx Cinici, but who said the truth, because they were doing well produces misery. So? *Q Uesto* is the way of producing ... without concern, the political economy itself shows us with the Suecami that the production of maximum wealth is the production of maximum misery, feel this piece of the manuscripts of 1844: "But since according to Smith it is not a happy society The one in which the majority suffers and since the state's weight loss state leads to this suffering of the majority and the political economy that leads to this stage of maximum wealth, Ilfine of the political economy is therefore, he says, the unhappiness of society. "What does it mean: it is true, Marx tells us, in antiquity man was the purpose of reproduction, in modernity production is the purpose of man and the wealth of production aims and then the ancient world presents itself as an ancient world, while The modern one presents ourselves empty ... and empty us ... it's true, says Marx; But once you have erased the bourgeois form it is not wrong that production is the purpose of man, so wealth is the purpose, it is enough to understand that we want to understand by wealth, if by wealthy bourgeois, that sucks, but if wealth means the full hestrunt of man, of his creative faculties, an end in himself, that is, I work as well, but it is not that I have to work to be exploited, I do it because that creates me and therefore it is I who want to give up the rest for it as I want to do it , I can, Marx says, perform the most tiring activity that is there but because I decide it. Then this most authentic sense that production is the purpose of man, because this time production becomes the production of man himself.

But you see that you can do it only on the basis of the modern world, you have to pass through all this because capitalism has created the conditions pending ahead.

You see how the practice lies in science, so I'm not telling you any residence, I'm not telling you the sixth commandment, I am saying that reality necessarily brings you there because through the alienation we have created these conditions. It is, says Marx, to be aware of it, but the condition is there and this is this, here is the criticism of political economy.

Brigade members sold hundreds of editions across the country. Photo: Database and

In recent weeks, supporters of support committees have sold hundreds of **and** during sales and advertising activities at universities, squares and union congresses. Sales were made during a central protesta from Brazil, in Rio de Janeiro(RJ), in a Congress of Workers of Education in Belo Horizonte(MG), in Macaé Roads and Bus Terminals(RJ), no *Campus* of the Federal University of Pernambuco(PE)and at the Maringá State University of University(PR). Segundo os brigadistas, houve granderecepção das brigadas por parte das massas e diversos trabalhadores e estudantes que avistaram os brigadistas já conheciam o jornal de outrascoberturas e se prontificaram a levar edições e realizar doações de apoioativo ao jornal.

MINAS GERAIS

Banking set up by Belo Horizonte Support Committee sold books, peasant production and products. Photo: Database and

During the XII Congress of SIND-UTE/MG(Single Union of Workers EMEDUCATION), held in the city of Contagem, between January 29 and February 1, the BH and Region Support Committee has performed intenseagitation and propaganda of the newspaper and the democratic press.

More than 130 copies of the special edition, number 250 and dozens of books are popular in Brazil and worldwide were sold, as well as supporting products in support of the struggle for land in northern Minas Gerais. During the event, the committee's member were very well received and were able to talk to dozens departigrants at the event on subjects such as: privatization of education and student -to -universityocurgers, the fight against water privatization and the player's accusation against the player Daniel Alves, among other issues related to the political situation in Brazil and the world. Many workers have already claimed to know Jornal das Greves, protests and _internet_. Several contributed by donating the change and some stayed for almost one starting with the brigade members and in the bank. An example of the good repercussion was the comment of a lady who sold handicrafts alongside the dojournal banking, who told a partner that she was "having a class about how to apply and treat people." In the Congress Fighting Plan, a Calendar of Protests and Activities that the Committee will continue to follow up, reverberating the struggle of Minas Gerais education workers and widespread the popular and democratic press was defined.

Newspapers and books were exhibited for sale. Photo: Database and Brigadiers were well received by university students. Photo: Database and

In the late afternoon of 09 /02, the and support committee of the and held a fighting of the 250 edition at *Campus* Headquarters of the State University of Maringá(Um). Além da última edição, também havia edições anteriores, livros e cadernetas.

The agreement with the political line of the and was widespread and several studies admitted not to have voted in the last elections, adding to the almost 50 million Brazilians who also rejected the "great feast of [bourgeois] democracy". During the interventions, the brigade members also denounced Opapel of the Armed Forces in the maintenance of the old state and, more relevantly, in the crime against the Yanomami people.

The and was recognized by some students as "the newspaper that covered asmanifestations against the cuts of funds and the manifestations for the reopening Doru," and one student came towards the stool saying "Look, it's the Novademocracy!" Aloud, which greatly raised the mood of the brigade members. Some studies even asked what dates the committee would be in a naum again, showing genuine interest in participating in the next activities eating their telephone contact to receive more information.

Pernambuco

During a UFPE, worker stated that he was looking for a university to contribute. Photo: Anco

On 02/07, in the early afternoon, there was a brigade of and at UFPE, EmRecife. Students, teachers, staff and passers-by were approached by Recife Committee to introduce them to the and. The reception was very warm and student masses constantly approached to ask more about the work.

A former UFPE student, graduated in Social Work, who today works with university, spotted from afar the brigade and approached to stop his edition. The server also said she already knew the newspaper, agreed with her political line and was looking for the Nauniversity Committee. Among the many approached, there were others who knew the work and made a point of supporting one or more than one copy. Sheltered at UFPE was very successful and 55 copies of the last edition were sold.

RIO DE JANEIRO On 02/09, a sales brigade was held at the Fontenelle Bus Terminal and in Central do Brasil, in Rio de Janeiro, during [a Protect against the increase in the Dotrem ticket](#) . Os brigadistas venderam aomenos 40 jornais e realizaram denúncias contra o aumento abusivo da passagemdo transporte público e da precariedade dos serviços ofertados ao povo. Ostrabalhadores foram muito receptivos à propaganda dos brigadistas e concordaram com a necessidade de realizar manifestações e greves em defesa dosdireitos do povo.

No dia 10/02, o Comitê de Apoio de Macaé realizou uma brigada de 9h30 às 11h30que foi iniciada no bairro Barra de Macaé e encerrada no terminal central,local de ampla circulação de trabalhadores.

Macaé Support Committee(RJ)held brigade on the city's boardwalk. Photo: Bank Dedados and

Also in Macaé, on 02/04, a successful sales brigade Quese began on the boardwalk, a place of wide circulation of people in the center of macaé and ended in the neighborhood of Barra de Macaé. The activity was realized by 4 brigade members in the morning and lasted about 2:30. Naocasion, 14 newspapers of the 250 edition were sold and 5 of the 248 edition distributed.

The brigade members stressed the enormous amount of people who boycotted electoral opprocems and denounced that this old way of doing politics, along with this old democracy, does not meet the interests of the people and do not even have the ability to solve their problems. It was also highlighted that Work needs a revolution and a new democracy, the only and true democratic. The masses addressed were very receptive to the brigade speeches and showed agreement and support with the ideas exposed, besides praising and expressing that it is necessary to continue doing this work demed.

UFC Rectory. Photo: Reproduction

On the morning of last Saturday, 11/02, the superior administration of the Fofderal University of Ceará(UFC)He launched a note with criticism of the umbrella organized by the Union of Teachers of Federal Universities Doceará(ADDUCS). O evento em questão ocorreu no dia 09/02 e fez parte do ciclode debates promovido pela Adufc. O professor e filósofo Vladimir Safatle, daUniversidade de São Paulo (USP), also participated in the event.

The note issued by the higher management of the university draws attention by its Content. The ADUFC was accused of instrumentalizing the use of the Auditorium Dareló, in addition to the accusation of offending the dean and university community. Criticism of the current UFC rector is already made in various spaces of the university and also on social networks for university community, as it is a scholarship teacher who was put in the position of rector without being elected, was the 3rd place naelection for the Rectory.

Offense to the university community is the permanence of the current rector in the main chamber of the most important federal university in Ceará. The rectory uses a specific situation to justify greater bureaucratization of university, making it difficult to access the university's spaces: "Such an attacker the purpose of the public good and leads management to take measurement, as regularly regulating the enjoyment of equipment to enable its equipment. Institutional Legal Advisory to hold the promoters and those involved in offensive acts, "the note of the university bureaucracy says.

The Carcará Collective, a democratic movement of students, said in a note to the Support Committee that "political debates are part of the context of the Brazilian and South American universities themselves in general. Much to the taste of the current UFC management, which maintains a hypocritical attitude by launching such an absurd and criminalization grade. "Written by: Support Committee - Fortaleza/CE

By a commentator for the Earn Folket Media.

Our comrades in Bandera Roja(Red tab)Has published an important statement dated January 2023, from Peru's Communist Party Committee in Lima. VIKEGOVER OUR READERS TO TRY TO READ THE WHOLE TEXT BUT HARD NUMBERED SOME OF THE CONTENT HERE.

The Peruvian comrades write that the general crisis of imperialism, mainly because of an acute and deep economic crisis, once again tightening the basic contradictions of imperialism, and in particular the main contradiction: imperialism -underprinted nations.

This creates very good objective conditions for developing the national liberation movements, writes the comrades, and the folk wars have contributed to the Åmeners International Communist Federation, as a historical and transcendent step towards a communist international under the command of Avmaoism.

The comrades describe how the interimperialist contradictions are also sharpened, and how the world's only hegemonic superpower, Yankee imperialism, is in decline with inflation, recession, protectionism and "danger of civil war" and "separatism". On the other hand, the scriptures, the Russian nuclear sustained power have recovered some positions, and develops strategic plans to undermine Yankee imperialism, along with the Chinese Social Memperialism. The change for rivalry is the oppressions in Asia, Africa and Latin America. Russian and Chinese imperialism's influence especially through bureaucratic factions of bourgeoisie oppressed countries in these continents.

Latin-America is the "backyard" of Yankee imperialism, and here their hegemonia-diminished Russian and Chinese military, political and economic support offers fields in Cuba, Venezuela, Nicaragua, Boliva and so on. From mining, but it contributes only to 10% of GDP. Peru is the world's second largest manufacturer decobs and zinc, and the third largest manufacturer of silver and tin in Latin America, although only 1.07% of the country is used for mining. More than 98% are considered "virgin territory" and this is a cake the United States will have for itself, but where Chinese and Russian imperialism penetrates. The comrades write: "We are part of their prey, but we cannot give our consent. Let's defend the Federation with the war!". They describe how the Folk War in Peru reached the strategic equilibrium, the other political and military stage of the war, in 1991, which awakened fear and brutal rage from Yankee imperialism.

Through their Lakeialberto Fujimori, they conducted a "self-coup" on April 5, 1992, as a joint IYANNE plan to further develop the so-called Lav-intensive war against the denomination war. In this way, they could put in an even more Yankee-dominated, fascist, crowded and traitor-stained regime, with long-term plans for decades of counter-revolutionary extermination war. A new Constitution blend in 1993, as part of the so-called "fourth restructuring" and the preparation in the middle of the genocide, a constitution adapted to the needs and interests of the Yankee imperialism.

This Constitution became a backbone of the crowded, fascist and country - traitor regime, which struggled to give the bureaucratic capitalism new impulse,

to relaunch it, under the cover first of "social market economy" also of "free market economy". This so -called "neoliberalism" erased away -nationalized industry, increasing the penetration of foreign imperialism of the imperialism of the imperialism even more. Politically, the President's power, the presidential absolutism, and the Constitution also opened to freer hands inheritance and navy, in order for these to develop their folk murderer war against the war led by Peru's Communist Party.

The fascist click of Fujimori and Montesinos fell in the year 2000, and the CIA Ogoas helped establish a transitional government. Opportunists applauded, writes the comrades, as it advocated for superficial changes, with support from the citizenship. At the same time, the semi -Føydals character in the economy is strengthened, and a rotten bureaucratic capitalism is developed on assistance, among other things, by the free trade agreement with the United States. Russian and Chinese imperialism are now undermining US imperialism with increased penetration into Peruvian economy. It has an impact on the split in the citizenship of the interconnection fraction and the bureaucrat fraction.

The comrades in the party write that all this forces the people to go the only way: the democratic path developed as the path of public liberation, led by the vendor who is Peru's Communist Party, a path to establish power to the proletariat and the Peruvian people. Camera writer: "Is there any other way? That's why we say: Folk War to Communism!" The election in 2021 was held in this context, and the bandit and anti -communist pedro Castillo were chosen. The comrades write that he is an opportunist across, who has defended the interests of the bureaucrat fraction in the bourgeoisie, on behalf of the Castroist party PL dominated by the Cerrón family. The Denne character was supported by all kinds of revisionists and opportunists, among the rats in Movadef and Vraem. Thanks to this support, Castillo Funning the long-planned murder of chairman Gonzalo, the great-theme of our time of our time.

Castillo's presidency intensified the faction struggle in the citizenship. Unsetuated outward Castillo, but at the same time planned for his fall, in conspiracy with the Keiko-leden fascist combador fraction. The armed forces supported this fall, and it was blessed by the church.

The comrades greet the heroic Peruvian people, who have risen to combat the pro-imperialist, bourgeois and reactionary powers. There is a wave of protests throughout Peru.

The enemy, for his part, is led by Yankee lackeys such as Dina Bolarte, Otarola, Zapata and Gómez de la Torre, with a dream of splitting Peru and diverting the growing revolutionary struggle from especially the poor farmers and the proletariat in particular. Dederal, writes the comrades, about crushing the proletariat's voter, oral communist part. The comrades write: "They dream that with the help of the revisionists and opportunists of all kinds, can continue to save their ownly -made regime. We say: Dream on. "(Our translation.)

The comrades write: "The genocide they have begun in the south now goes through the country. The blood that runs will never be forgotten!The more blood, the more oppression, the more the war, the more revolution !!Only the people judge and punish the men!Against oppression and genocide, for national rights and the war!"

And further: "They aim to destroy all resistance from social and popular movements, trade unions and parties and so on, but mainly they dream of preventing the party's advancement, which today goes on and puts a solid basis in its general reorganization and in the restructuring of People's Employment Army. "

The comrades write that we live in historical times, where the country and the people fell into the worst crisis in their history. They are reminiscent of chairman Gonzalosord that the nation is again in danger and that the enemy will tear it to pieces. Fills so that there is no stone back on stone. They write they live in a revolutionary situation, as defined by Lenin. Describe that chairman Mao teaches us that the revolutionary situation affects the basis of the basis, and closes all ways out than one: the revolutionary path.

The comrades eventually greet a number of slogans to the proletariat and the people, and they greet the first United Maoist international conference and the foundation of the International Communist Association(Ekf).

Central Azucarera De Don Pedro Inc.(CADPIPIPIPIPI)and a farm worker in Batangas is the closure of the Power this year. They formally filed a resolution, along with the Makabayan bloc, Sahouse of Representatives on February 15 to

investigate the sudden turn of Roxas Holdings Inc. They also interviewed the representative in Congress to gain support for their call.

According to Sugarfolks Unity for Genuine Agricultural Reform(SUGAR)-Batangas, approximately 12,000 farm workers and more than 7,000 small plantaries have lost their livelihood due to unjust closure of the sauce. "It destroys the local sugar industry not only in the province, but across the country," the group said.

Prior to that, the government's sugar-bangas insisted on buying and overseeing the CADPI operations to save it to strengthen the local sugar industry in the province.

According to Christian Bearo, Sugar spokesman, it will greatly affect the Batangas plantators because only 4,500 metric tons of sugar can be grown by the remaining sugar mills in the province compared to the Cadpi's 12,000 metric tons per day. At the forefront of 2020, the CADPI covers 10,980 hectares of the province.

Bearo explained that the local government of Batangas had earlier pledged to pay the transportation cost of ₱ 30,000 per truck to travel to the Central Azucarera de Tarlac(CAT). Subalit anito, hindi kayangsagutin ng lokal na gubyerno ang gastos para sa 200 trak kada araw na umaabotsa halos ₱6 milyon.

Naiulat din na magbibigay ng ₱80 milyong ayuda sa 2,000 manggagawa at maliliitang plantador para makaagapay. Reklamo ng SUGAR, di ito sapat at kaunti lamangang masasaklaw nitong manggagawa at plantador. Giit ni Bearo, dapat itongmagbigay ng subsidyo sa paggawa sa lahat ng mga manggagawa sa tubuhan nabahagi ng produksyon at sapat na kumpensasyon laluna sa maliliit na plantador.

Insulto umano ang kainutilan ng Sugar Regulatory Administration (SRA)It says all it can do is to convince Cadpi to reopen for this year.

According to Sugar, the government should give the Small Plantadors a subsidy of production, especially fertilizer. This is in addition to buying the grinder.

Description: The plans to build the waste-to-energy (WTE) incinerator of the local government of Davao City will only exacerbate the climate crisis. It will burn plastics and will create this greenhouse gas and turned

Images: ['[wte-sdm-photo-from-sustainable-davao-movement.webp](#)']

Categories: ['Environment', 'People's Struggles']

Type: article

The climate crisis will only exacerbate the Waste-to-Energy plan(WTE)Incinerator of the local government of Davao City. It will burn plastics It will create greenhouse gas and toxic smoke, according to the environmental groups.

“The answer to the limited capacity for the collection at segregation is not(Separate)Davao City waste, ”according to EcoWaste coalition, one of the

projects. Instead it should implement ecological solid waste management and promote zero waste systems(waste reduction)and innovations that are fair and appropriate for cooperative waste. They also referred to it against the Clean Air Actof 1999.

In accordance with local government data, the city is creating 600 to 650Onelades of waste daily. It is a bit of a viodegradable and therefore does not have to burn. Currently, they are taken to a dump in Barangay New Carmen in the Tugbok District. In 2016, the dump was filled with a capacity of 700,000 to 800,000 tons. According to the city, there are 900,000 tons of garbage in the area.

The incinerator is set to build in the 10-hectare agricultural land in Biaoescuela which is still covered by the Tugbok District. Burning waste here will affect the health of residents in 20 communities within the project's 10-kilometer radius.

Debt and costly project

Except for the destructive, the incinerator project is expensive for ₱ 5.23 billion. ₱ 3.5 billion will come from the city of the city, equivalent to 60% of the entire Department of Environment and Natural Resources. ₱ 2.052 billion will be owed from Japan.

In January, a statement was signed by 71 group members to call on the Japanese government to stop its support projects. It criticized the Japan International Cooperation Agency with its lack of accountability to "wrong wasteManaagement solutions" in Davao City. This was after Jica denied that the project was funding it.

AGAINST SWEDISH AND FINNISH NATO MEMBERSHIP!FOR SOCIALIST REVOLUTION!

Author: lipunkantaja

Time: 2023-02-18T97:00:00-04:00

Images: []

Categories: ['Yleinen']

We publish a joint statement signed by the Communist League of Sweden, the Anti-imperialist League (Finland), Anti-Imperialist Collective (Denmark) and Red Front (Norway).

Proletarians of all countries, unite!

AGAINST SWEDISH AND FINNISH NATO MEMBERSHIP! FOR SOCIALIST REVOLUTION!

After the war of aggression by Russian imperialism against Ukraine started in February 24th, Swedish and Finnish imperialisms decided to join the North-Atlantic Treaty Organization (NATO). NATO is a tool of US imperialism – today the sole hegemonic superpower – for its hegemony, directed principally against the oppressed nations, conforming to the principal contradiction in the world, and secondarily it is characterized by the inter-imperialist contradictions, mainly against atomic superpower of Russian imperialism.

NATO has been waging and is waging wars of aggression against the oppressed nations all over the world. It has for example many on-going "peace-keeping" operations in Africa, and also it was used in the infamous war against Afghanistan (2001–2021) and in Yugoslavia in the 90s.

To understand the Swedish and Finnish NATO processes, we need to see the interests of US imperialism, that is, it needs to counter-act the Russian aggression in order to consolidate its gains in the so-called Eastern Europe after the collapse of Soviet social-imperialism in the beginning of 90s, and in this it is also in competition with its European NATO "allies", especially German imperialism. On the other hand, US imperialism is shifting its focus to the East Asia to combat Chinese imperialism, trying to contain its aspirations, and for this the US needs a secure base in Europe. Hence it is US imperialism's need to strengthen NATO's "Eastern Flank" by incorporating Sweden and Finland.

But it is not against the will of these smaller imperialists. On the contrary, they are using the inter-imperialist competition among the bigger ones, and they too have their own interests in the Eastern Europe, especially in the Baltics.

Swedish and Finnish NATO membership will mean greater reactionarization and militarization of the old states, greater decay of imperialism, and greater sharpening of all the fundamental contradictions. Thus the objective conditions for revolution are even more ripe, emphasizing that revolution is the main tendency. In this great and delayed task the Communists in Sweden and Finland have their eyes closely on the most advanced struggle in any NATO country, that is, the People's War led by TKP/ML, following its mighty example and drawing inspiration from it.

Down with NATO, an imperialist alliance!

Long live revolution and the People 's War!

For the reconstitution of Communist Parties!

Signatories:

Description: The Supreme Court's abolition of the Supreme Court's abolition of graft was filed against Juan Ponce Enrile in 1990. The court's decision dated January 16 was released

Images: ['[20130201_cocolevy_farmers-aa.jpg](#)']

Categories: ['Peasants']

Type: article

The Supreme Court's abolition of the Supreme Court's abolition of the Supreme Court was filed against Juan Ponce Enrile in 1990. The decision of the dated January 16 was released on February 8. It was related to the condemnation of millions of Coco Levy funds while Sierrile in the leadership of the United Coconut Planters Bank(UCPB).

Liban kay Enrile, pinaburan din ng Korte Suprema ang mga negosyanteng sina Jose Concepcion, Rolando dela Cuesta, Narciso Pineda, at Danilo Ursua. Kaugnayang kaso sa paggamit ni Enrile sa kanyang pusisyon sa UCPB para ilipat ang ₱840 milyong pondo ng coco levy tungo sa Agricultural Investors Inc, negosyong pag-aari ng kroni ni Marcos Sr na si Eduardo Cojuangco Jr.

Ang pondong coco levy ay nagmula sa buwis na ipinataw ng gubyrerno sa mgamagniniyog noong panahon ng batas militar na ibinulsa ng mga kroni ni Marcos Sr. Sa kasalukuyan, tinatayang lampas ₱100 bilyon na ang pondo.

Ayon sa grupong Pinagkaisang Lakas ng mga Magbubukid sa Quezon (Piglas)" The Guinengan Massacre was one of the Malgal and Butan massacre of the Marcos Sr regime during the dictatorship.

On February 1, 1981, two were killed while hundreds were injured after the Philippine Constabulary shot Quezonins who were traveling to the town of Guanyangan to protest the uneven farmland owner, low copra prices and Coco recovery Levy Fund.

For the Carmma group(Campaign Against the Return of the Marcoses and Martial Law), it was shocking that after a seven -year -old decision on the preliminary investigation into the case, the graft of the graft of the Bombudsman had just pushed it to dismiss it.

"The recovery of the stolen wealth of the Marcos and their tenants atkroni is a difficult fight, now that there is a new Marcossa Malacañang," Carmma said.

However, they say, nothing is impossible in the efforts of the Filipino people who have justice and hold the Marcos and their chronic sagrandsyos stealing the people's funds.

Description: Farmers under the Philippine peasant movement called "Ferdinand Marcos Jr.

Images: ['[hybrid-seeds.webp](#)']

Categories: ['Peasants']

Type: article

Farmers under the Philippine peasant movement called Ferdinand Marcos Jr. "unknowingly" and "numb" after it suggested that the hybrid seeds have 1.9 million hectares for the next four years. It is targeted to implement in Panay, Eastern Visayas, SOCCSKARGEN and BARMM.

"It is just like a hybrid seed program in Marcos SR's Masagana 99 Join Farmers in High-Yielding Seeds (Production is high) And it relies on chemicals, expensive fertilizers and pesticides," said Ka Paeng Mariano of the KMP.

The farmers can always buy the peasants if it is a hybrid, according to Ka Paeng. This is because its seeds cannot be pushed, unlike inbred or certified seeds.

"It's different (certified bones), the hybrids (na bone) is not able to be bred. The farmer will always buy. The hybrid seed company has a certain income here," he said. SL Agritech Corporation, a company that sells hybrid seeds, has been criticized for the leading program.

"We should reproduce a rice seed class, just keep (Bone development) Rice and strengthen local production," Ka Paeng explained. "When gardening, the peasants can keep the seeds, they can also replace the seed (seed exchange). Kapag hybrid rice seeds lang ang ipatanim, hindi na pwede ito."

"Huwag lang iisa o ilang klase binhi ng palay ang dapat itanim. Kapag ganito, magkakaroon ng erosion of genetic diversities (loss of diversity). Kung may genetic uniformities o iisa lang ang binhi, kapag tinamaan ng sakit, peste o

virus ang palay, salanta agad. Ganun ang nangyari sa IR8 sa Masagana99ni Marcos Sr. 'Yung resistance (or ability to fight)The crop is also weakened over time so the breeding atconservation of the seeds should continue. We also have many improved inbred varieties of the free so that hybrid rice should not be forced. ”

Large chemical and agribisnes angagricultural companies began to control by promoting the International Rice Reseachinstitute of genetically modified rice seeds that killed more than 4,000 traditional and old rice classes.

All seeds should be freely used, stored, mixed and consumed, according to the KMP.

Against NATO membership in Sweden and Finland!For the Socialist Revolution!

Author: lipunkantaja

Time: 2023-02-18T99:00:00-04:00

Images: []

Categories: ['Yleinen']

We will publish a joint statement signed by the Swedish Communist Association, the Anti-Imperialist Federation(Finland), Anti-imperialist collective(Denmark)and the red front(Norway).

Kaikkien maiden proletaarit, liittykää yhteen!

RUOTSIN JA SUOMEN NATO-JÄSENYTTÄ VASTAAN!SOSIALISTISEN VALLANKUMOUKSENPUOLESTA!

Venäläisen imperialismiin aloitettua hyökkäyssodan Ukrainaa vastaan 24.helmikuuta, ruotsalainen ja suomalainen imperialismi päättivät liittyäPohjois-Atlantin puolustusliittoon (NATO). NATO on yhdysvaltalaisenimperialismin – tänään maailman ainoa hegemoninen supervalt – väline senhegemoniaa

varten, suunnattu pääasiassa sorrettuja kansakuntia vastaanvastaten
pääristiriitaa maailmassa ja toiseksi sitä luonnehtivat ristiriidatimperialistien
välillä, pääasiassa venäläisen imperialismiin ydinasesupervaltaavastaan.

NATO on käynyt ja käy hyökkäyssotia sorrettuja kansakuntia vastaan
kaikkiallamaailmassa. Sillä on esimerkiksi monia käynnissä olevia "rauhanturva"-
operaatioita Afrikassa, ja sitä on myös käytettyäpahamaineisissa sodissa
Afganistania vastaan (2001–2021) and in Yugoslavia in the 90s.

In order to understand Swedish and Finnish NATO processes, we need to see
the interests of imperialism in the state of the state, it is, its need to make a
counter-office attack in order to strengthen its achievements in so-called Eastern
Europe after the collapse of Soviet social imperialism in the 90s, and here is
also in competition with its European "Alliance" with German imperialism. On the
other hand, US imperialism is moving its focal point to East Asia against fighting
for imperialism, trying to damn its pursuits, and the USA needs a secure position
in Europe. Therefore, there is a need for US imperialism to strengthen NATO's
"eastern site" by incorporating Swedish Finland.

But it is not contrary to the will of these smaller imperialists. On the contrary,
they use inter-imperialist competition among the larger ones, and they also have
their own interests in Eastern Europe, especially in the Baltic States.

NATO membership in Sweden and Finland will mean greater recession and
militarization, rottenness of greater ultra-profit, and greater implementation of all
basic conflicts. Thus, objective circumstances for the revolution are increasingly
cooked, emphasizing that the revolution is the main endurance. In this great and
delayed task, the communist eyes of Sweden and Finland are strictly attached
to the most sophisticated battle, which even in one of the NATO countries, in
one of the NATO countries, the TKP/ML-led People's War, following a fading
example and seeking inspiration from it.

down NATO, imperialist alliance!

Live the Revolution and the People's War!

for the reconitory of communist parties!

Jujuy: Perpetua for the femicide of the pata femicida.

Author: carga

Time: 2023-02-18T99:00:00-04:00

Head Description:

Description: On Friday, February 17, at noon, the Criminal Court No. 1 of the province of Jujuy condemned Juan Carlos Gutiérrez to the perpetual prison sentence for the femicide of Marina Rosita Patagua perpetrated on February 12, 2021 and for the minor injuries aggravated by gender violence & Hellip;

Images: [' [Jujuy-Perpetua-para-el-femicida-de-Marina-Patagua.jpg](#) ']

Type: article

On Friday, February 17, at noon, the Criminal Court No. 1 of the province of Jujuy condemned Juan Carlos Gutiérrez to the penalty of perpetual deprivation for the femicide of Marina Rosita Patagu for gender violence also perpetrated against her two months before taking her life.

Simultaneously, the caesarean section was scheduled in which one of the daughters demarin would give birth to her third grandson, without a child and grandmother could know.

Among the new stage of duel and that birth, Marina's family returned Arecoration with details of the mouth of the femicide and the parts that the perpetual prison raised, the circumstances in which the violenciamachista charged her life.

It was an announced death, where the Provincial Council of Women did not act, and paradoxically, it was also complainant in the case thanks to the governor of Governor Morales(Formulation of complaint that marina's familia opposed through the particular complaint exerted by the lawyers Valeria Medina and Mariana Vargas)that he wanted to simulate that being part of the femicide processes relieves the Executive for the state omission to enclose the deaths of women for gender violence.

Gutiérrez had been arrested for minor injuries against Marinael November 30, 2020, but was released despite the fiscal opposition of January 21, 2021.

Freedom lasted little, since the loss of marine control -with the prior complaint, The separation and what he was unanueda relationship with another person-determined to take control by removing it life. The brutality of the blows and stabs account for the homicidiomisogin and the determination to kill.

This trial was held after a long history of fighting the women of Jujuy, which flooded the streets breaking the isolamient of the pandemic with the villages of the 2020 by the femicides in which they saw direct how the state did not do what it should To save the young women from death destiny. Given gender violence, the State annotated by the way, a state intervention must exist that slows the violence of the male and accompany the victim, guaranteeing with the wide assistance necessary put cessation to those events and the possible escalation, taking into account all that all that which implies a fertile sertrara so that the manipulation and extortion of the male make. The direct approach of economic issues, housing, or the ideas internalized by women with respect to society, romantic love and so many other issues that the circle of violence are essential.

The condemnation achieved closes a stage but implies a new door that opens. As in the case of Nahir Mamani, also killed before the negligence, it is necessary Yerradicar the gender violence that another of the children's victims in our country had in Marina.

Description: We denounce the arrest by the anti -terrorist agency of the Turkish state of three Greek left young youths who went to the earthquake -stricken areas of Turkey in solidarity with the Turkish people and the earthquake -stricken neighboring country.

Images: [['_seismos-tourkia-syria-kourdistan.jpg'](#)]

Type: article

We denounce the arrest by the anti -terrorist agency of the Turkish three Greek left young youths who went to the earthquake -stricken areas of Turkey in solidarity with the Turkish people and the neighboring country.

It is not enough that the Turkish state condemned and buried the lives of millions under the debris ... It is not enough that its policy has led to it inappropriate tragedy with the tens of thousands of dead ... It is not enough to have a total of

condemnation of the neighboring people. Poverty, tone and poverty ... Now criminalizes the practical solidarity with the tested people, describes solidarity as "terrorists", while trying to control or even close any diodebells. In addition, he imprisones journalists, while threatening to arrest as many talks to the media.

Through such moves, the Turkish regime and the Erdogan government want to hide their enormous responsibilities and attribute them to a "natural destruction", as Erdogan hastened to describe it. They want to comply overall the character of the capitalist system of exploitation and oppression. Indifference, the legalizations of the building buildings meet anti -seismic standards, burned under the ruins of the poor in the neighboring country.

Despite the efforts of the Turkish regime and despite the preachers of nationalist hatred by the dependent bourgeois classes on both banks of the Eujae, **Our people stand by the side of the Turkish people. Against the nationalist poison, but also in complete contrast to crocodile tears, the local ruling class and the Mitsotakis government are launching tears, hoping to exploit this dramatic situation for their advantage.** International and class solidarity does not fit into hypocritical bourgeois sermons. Is the only one -off hope within this unprecedented tragedy. **
