with the mining companies, out with FFAA and the national police

Thousands of soldiers and police have released a bloody oppression campaign against the community members of Buenos Aires, imbabura, as contradicts mining in their area.

Despite the fact that society has on several occasions expressed resistance to the presence of the mining companies in the country, especially the Australian The subsidiary Hancine, releases these foreign companies, with consent from Lasso's corrupt government and support from the armed forces and police, loose persecution, imprisonment and oppression with firearms against the members of society which resolutely opposes the suppression and the state's suppression apparatus.

Currently, the members of society report on injuries, disappearances and Death.

El Frente De Defensa de las Lucha's del Pueblo del Ecuador is in solidarity with the community members of Buenos Aires who brave fighting for the earth say and to expel the invaders, in this case the mining companies, the armed forces and the national police, who have become real occupation armies at The land of poor farmers.

We condemn the armed forces and the national police as murderers and oppressors; inept and cowardly to organized crime, brave and furious against the unarmed population.

Inflation has risen dramatically in the runningest of the last year and this affects Especially also people whose 'life and health depends on fixed expenses of medicine and treatment every month.

Not only that the prices of medicine for various diseases, treatment and rehabilitation in professional therapists increases, then the prices of one rise Lots of other fixed expenses such as rent, heat, gas, food, transport and debt for the masses, leaving even less money for the rising medicine.

This leads to more forced to directly opt out medicine while sitting back in cold houses and apartments, with one modest amount of food, to avoid total bankruptcy in the light of the crisis.

Many have fixed expenses on medicine and therapy of up to several thousand dollars every month that they have to pay from their own pocket. This is a huge burden on The masses in the country. Meanwhile, the bourgeoisie may where a thousand kroner to or from Medicine expenses a month can't even be felt the system works well, Because they can pay for the medicine without any problems, jump in front of the queue to Treatment by using private hospitals and therapists.

But this characterizes an odd health system that repeatedly fails Especially the deepest and widest masses in the country.

At the same time, the bourgeois state is repeatedly cutting down on the health care system, for to create tax cuts for the bourgeoisie and to throw more money after weapons and imperialist aggression.

At the same time we live in a country with some of the most advanced Productive forces within the pharmaceutical industry, with tons of pills produced every single day. At the same time, pharma companies hold like Novo Nordisk, Artificial price of vital medicine high for the masses both in Denmark, but Especially for the masses in the oppressed nations.

Life and Health-Nedic Medicine is a international right and expenses for it to Don't pull the masses that need it down in misery. That Imperialist bourgeoisie should not be allowed to take advantage of people being willing to put their lives at risk to get advice for vital to medicine, or die because they can't afford, for profit.

All this reveals the bourgeois health system, the bourgeois Danish state And its role. It will not help the proletariat to demand »a nationalization by Novo Nordisk «because the current old state is the yields. It's still A yield state and state monopoly capital is still as parasitic and yielding.

Novo Nordic, a Danish -owned imperialist company, holds, among other things. insulin which is necessary for the treatment of diabetes, expensive for the masses in the oppressed nations.

Our rights can only be won through battle, not by voting and hoping and wait for change. No right that the working class has been achieved without a fight.

The fight for our rights must harden us and earn the reconstitution of DKP Under Maoism and thus the introduction of the People's War for the Conquest of Power in the country. Only then, by a socialist revolution through folk war and a new Working State, a new health system that really serves the people can be created.

**¡ALERTA!**

29/Enero/2023  
14:05

Tacho Canasta y su grupo armado están atacando en estos momentos la comunidad de Rincón Tagolaba, perteneciente a los bienes comunales de Santa Cruz Tagolaba en Tehuantepec.

Los compañeros están defendiendo sus recursos naturales contra los talamontes que bajo las órdenes de Tacho han explotado ilegalmente el bosque.

Responsabilizamos a Anastasio y Sergio Gutierrez, así como a la organización FUCO, de la integridad física y emocional de nuestros compañeros.

We document an unofficial translation of a news note from the website [Sol Rojista](#), About the Mexican repression of repression State and its lackeys against folk resistance against imperialist Large projects .

The war against the people prolonged and the operations of the old Large landowner-bureaucratic state focus on the workers and Volker in resistance. Despite all the productions of the self -proclaimed "Fourth Transformation" after

the arrest of Ovidio Guzman, the process Against Genaro Garcia Luna or the progress in the underground of Mexico City The truth that the main efforts of the regime are directed to it, the popular movement, in particular the anti -capitalist left, to interpret, To isolate, contaminate, criminalize and destroy. If we take a short look at the youngest events in the country, additional The youngest militarization of the subway through the national guard, we can give us a clearer picture. The comrades are Ricardo in Michoacan Lagunes Gasca and Antonio Diaz Valencia, the former a democratic lawyer and the latter is a municipal event that visible at the top of the resistance Stand against the "Las Encinas" mining project. In the isthm of Tehuantepec were various attacks in less than 15 days registered; The first was the arduous arrest of David Hernandez Salazar from the municipality of Binniza 'de Puente Madera, district of San Blas Atempa; On January 17th, David became investigative officer in Tehuantepec arrested and brought into the prison of tanivet, where he later was released because he was building an industrial area for the interocean corridor of the Isthmus from Tehuantepec(CIIT)contradictory had. The second reason was the harassment against Ejidatarios and Community members in the northern zone of the iSthmus, the railway tracks Blocked after the company's workers, the CIIT construction work drove through. As a retaliation, parts of the Mexican Navy to try to add the population, What drove to new protests and the arrival of other farmers who fight strengthened. Finally yesterday, on January 29th, armed people arrived Board of 10 pick-ups to the municipality of Rincon Tagolaba, Tehuantepec, tore them Access chains to the community, the posts and fence of the Hauser, shot down In the air and set fire to the possession of the population. The soldier "Tacho" Canasta and his brother Sergio Gutierrez led the attackers who wrongly acquired the title "Komissariat" by Santa Cruz Tagolaba; Their goal was to pick up the population to the landerings of the To be taken over and negotiate with the Ciit. Many hours later A deployment of the National Guard arrived after public Had complained of human rights organizations, but the attackers were already left off and had the evidence for the armed raid taken away.

# **Slaughter in Nova Mutum/RO: New complaints point to torture and deprivation of rights during PM attack**

Author: Gabriel Artur

Time: 2023-01-31T17:42:11-03:00

Images: ['[esticado-nova\\_11.jpg](#)', '[IMG-20230128-WA00560.jpg](#)', '[esticado-nova\\_21.jpg](#)', '[Screenshot\\_from\\_2023-01-31\\_17-14-5612.jpg](#)', '[Screenshot\\_from\\_2023-01-31\\_17-12-5712.jpg](#)', '[Screenshot\\_from\\_2023-01-31\\_17-16-0312.jpg](#)', '[esticado132.jpg](#)', '[esticado21.jpg](#)', '[Screenshot\\_from\\_2023-01-31\\_17-11-50.jpg](#)', '[Screenshot\\_from\\_2023-01-31\\_17-10-5812.jpg](#)', '[assassinados\\_112.jpg](#)']

Raniel Barbosa Laurindo(conhecido como “Mandruvá”)24 years old and Rodrigo Hawerroth(conhecido como “Esticado”), 34, were murdered after torture by the PM of Rondônia. Photo: Database and

On the morning of January 28, in the middle of Saturday, the Operations Battalion Special(Bope)of the Military Police(PM)from Rondônia murdered two peasants and led to terror to over 100 families(300 camponeses)in a new attack that reached part of the peasants of the area Tiago Campin dos Santos, in Rondonia. On 01/31, the Brazilian Association of Lawyers of the People - Gabriel Pepper(Abrapo) [released a Report](#) and the League of Poor Peasants(LCP)of the Western Amazon published [one note](#) About the slaughter. Both documents exposes the coward and terrorist acting in this that is the third attack since the occupation in 2020.

The brutal attack on peasant families occurred during a Reintegration of possession at the headquarters of Norbrasil Farm. Three Battalions of the PM

They moved on 01/28 with dozens of vehicles and drones. The troops reactionary military personnel shot three peasants, assaulted physically hundreds of peasants and stole the individual belongings of the peasants. Two of the workers died after torture. Marcos Rocha, Governor of state, is denounced by LCP for positioning itself alongside the landlords land grabbers. The peasant movement also states that the operation was for defend the "illegal privileges and interests of the old rooster."

The macabre slaughter perpetrated by the killer PM of Governor Colonel Marcos Rocha took place in the area of the area Tiago Campin dos Santos, located on the farms Rainbow and Norbrasil. According to Abrapo, the supposed owner of those lands is the Company Leme Employment, of the Latifundia Antônio Martins. "Old Rooster", As it is known in the region, it is quoted in the "White Book of land grabbing" as one of the largest land grabbers in the country, it is being investigated by the police Civil and federal, together with the Public Prosecution Service, for the financing of gunmen in the region for land grabbing and expulsion of peasants.

Peasants and lawyers reported a crime against the people. Photo: Reproduction  
**The occupation of the headquarters of Norbrasil Farm**

In the same place had already been an attack on January 22. According to LCP, military gangs of Galo Velho gunmen went to the area in a black truck and fired at men, women and unarmed children

The day before, the hundreds of families, which total more than 300 Peasants occupied the headquarters of Norbrasil Farm, which is on the edge of BR-364. Interest in occupying that portion of land was shared not only by these 100 families, but by all of the area Tiago Campin dos Santos because the The only alternative to get to the houses is a walk of over 100 km. In addition, that portion of land is the main point for draining production Peasant, due to the proximity to the federal highway.

Police invasion: slaughter and illegalities

The police arrived at BR-364 shooting and launching bombs of moral effect and tear gas. Other groups of police were in other points, Tocaia. Next to these were

also gunmen who provide service to the rooster Old, according to complaints from the peasant movement and Abrapo.

The murdered peasants, Rodrigo Hawerroth(conhecido como “Esticado”), in 34 years old and Raniel Barbosa Laurindo(conhecido como “Mandruvá”)24, were in the group of peasants that moved away from the bombs. The group decided to cross the Cotia river, making the boat crossing. At this time, they were surrendered by cops. Three peasants were shot(além de Rodrigo e Raniel, Kenedy também foi alvejado e levado para o hospital João Paulo II).

Children were hit by rubber bullets and tear gas. Photograph: reproduction

Families stayed all day without sunshine. Photograph: reproduction

Truck transporting peasants to Vila Alípio de Freitas, in the area Tiago Campin dos Santos. Photo: Reproduction

The three peasants hit were still brought alive by the police, But two of them were executed summarily after suffering severe torture. Abrapo's report points out that "the peasants surrendered were tortured, the marks are in their bodies, and Rodrigo presented bruises on the body and face -based face with arms, cut in the mouth, a bullshit and will be included in the cadaveric report(documento que é de responsabilidade da Segurança Pública do governo do estado de Rondônia).

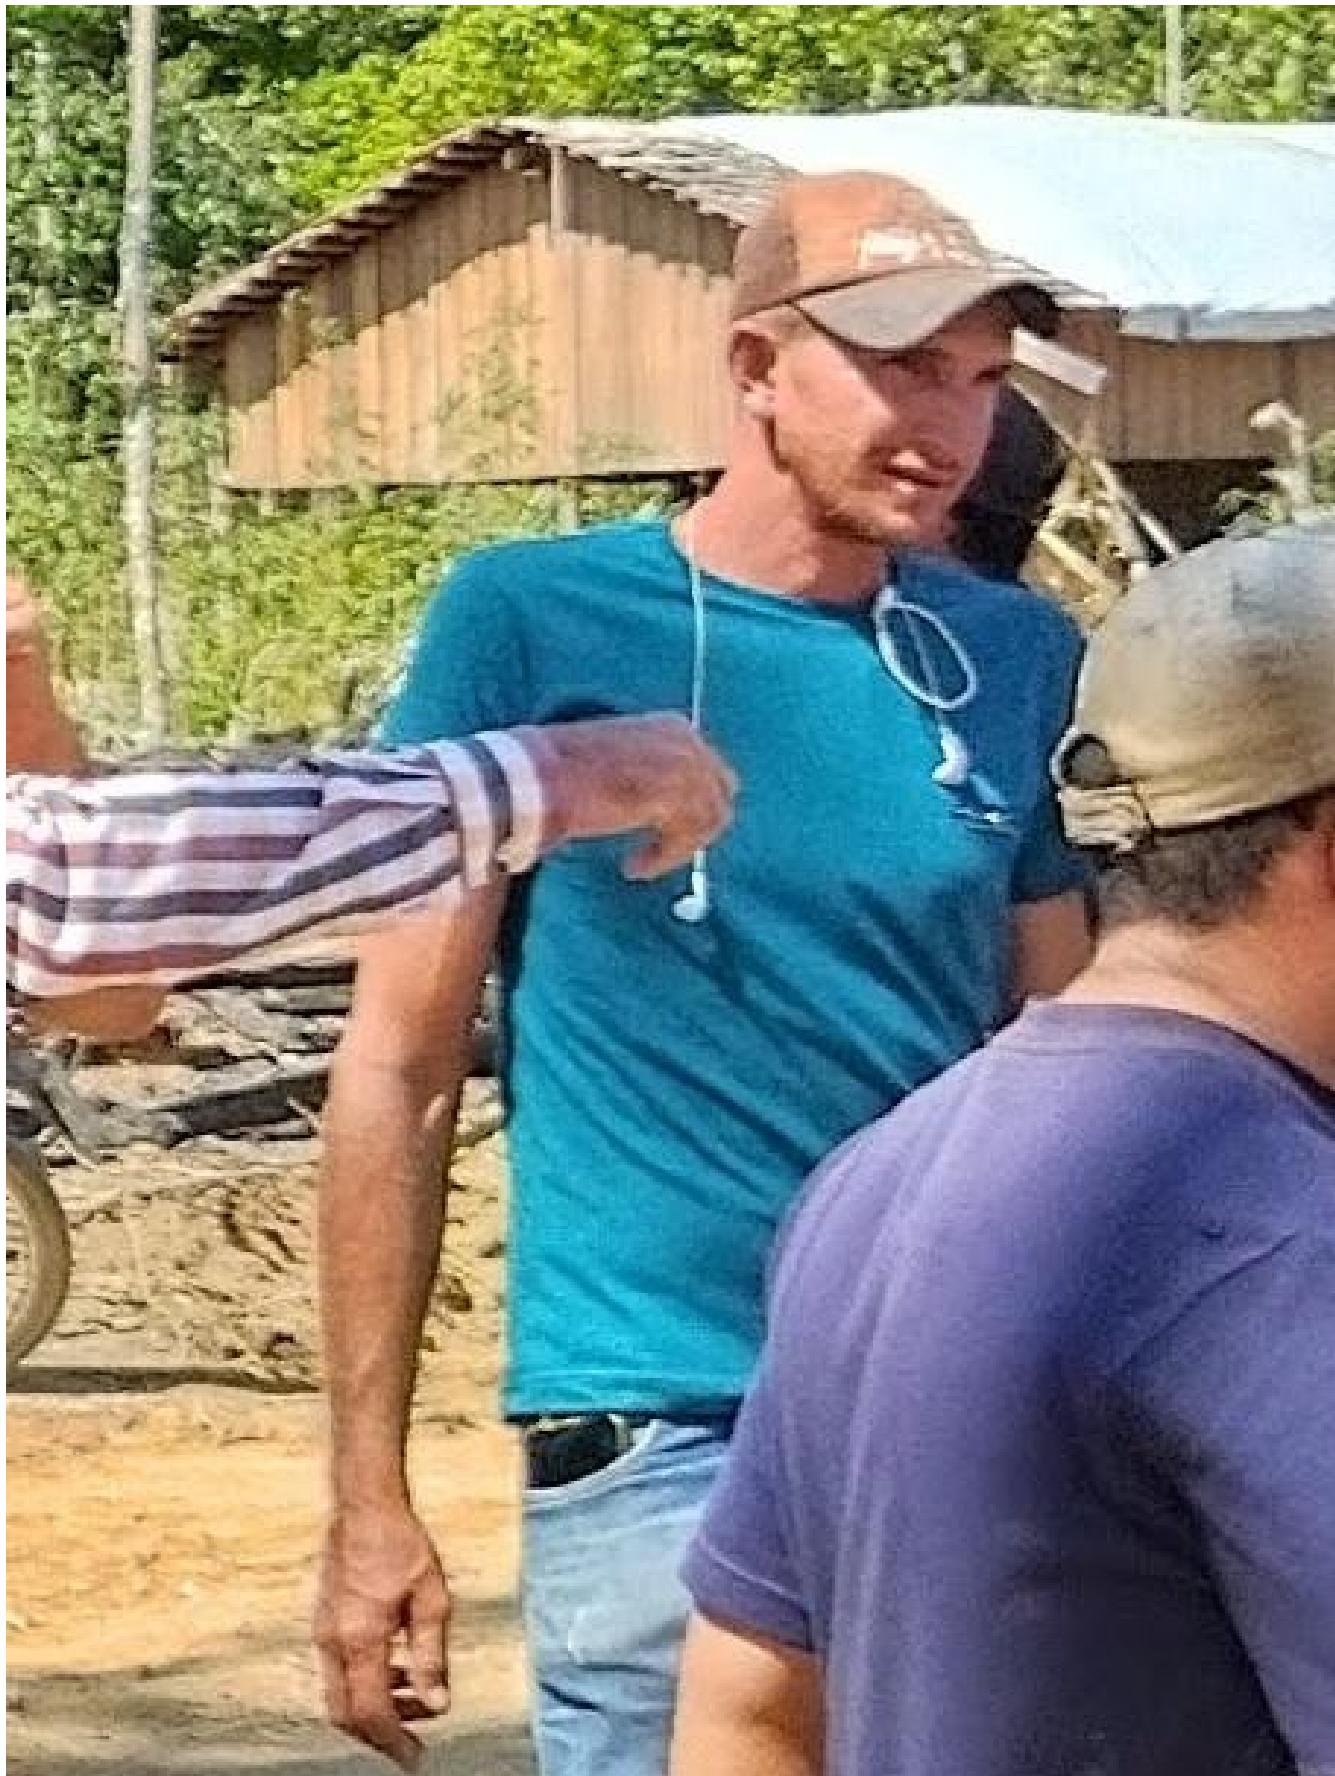

After this attack, the police started a siege of the families camped in the Barracks of the machines, at the headquarters of the farm. The families present tried Return toward Rio, but were prevented by the reactionary military. You peasants resisted, shouting that there were women, including pregnant women, and children in the place, which was ignored by the PM, which promptly began "

shoot rubber bullet, throw bomb of moral effect, where children were affected and presented suffocating reaction ", denounces the report.

The peasants claim that the police were all unidentified in the uniforms and were accompanied by farm gunmen. The responsible for troops(tenente-coronel Pontes)insulted the peasants of criminals and the Reactionary military personnel stated that the orientation was to "kill everyone." Families resisted the attempt to throw them on a bus without informing destination and were assaulted again. Moral effect bombs were released and Families retreated, this time to the bank of BR-364(na frente da fazenda). And they stayed there in the scorching sun, without access to water or food. One Peasant was referred to the same hospital because he had heart attack. Many They were injured by rubber bullets and suffocated by tear gas. Women fainted and children were without food.

Rodrigo Hawerroth during collective activity Photo: Reproduction

Rodrigo Hawerroth during collective activity. Photo: Reproduction

Only a few peasants were allowed to remove a bag clothes from inside the shed. The rest of the clothes, food, freezer with foods, gas cylinders, cell phones, mattresses, medicines and other belongings personal were not authorized. Most peasant objects They stayed in the barracks, which were all destroyed by the police. You peasants denounced to lawyers that they saw the reactionary military stealing your belongings(celulares e dinheiro). In addition, the police also poisoned dogs and contaminated water wells, and photographing the peasants who were on site.

In order to intimidate the peasants, the police passed with the bodies of Peasants murdered on the cars. Also with the same goal, some peasants were taken to the farm headquarters and threatened and assaulted. Families that were on the roadside were also beaten For the PM and gunmen who were on the spot making ostensive rounds. Some peasants were filled and signed a circumstantial criminal term and will Respond for disobedience in the Special Criminal Court(JEC).

In the late afternoon of 01/29, the families left the place and went to the village Alípio de Freitas, located inside the area Tiago Campin dos Santos. In according to the report, the peasants showed “a lot of indignation with the executions and the way of acting of the PM in protection of the landlord. ”.

# **PC 31 January - Still on the Assembly of Genoa against the war: the assessments of the companions of communist proletarians who participated in it**

Author: prolcomra

Time: 2023-01-31T18:51:00+01:00

Images: ['[Ass%20CALP%20GE.jpg](#)']

The opposition to the interimperialist war exploded in Ukraine begins to do A few steps forward in our country in terms of mobilizations on the plan national, in units with the initiatives that are taking place at the level international.

This step forward was undoubtedly the assembly of January 28 against the war promoted by the port workers of GE's Calp, very participatory, with Comrades from the South(Taranto), from Sardinia, from the center(Roma), from the north(Pisa, Livorno, Firenze, Padova, Bergamo)The appeal of the port for one national mobilization on February 25, one year after the beginning of the conflict Imperialist war in Ukraine, led to a debate and decisions on how to give continuity to the opposition to the war. One was decided day of national struggle, in Genoa there will be an event with a procession who will aim to enter the port, and that the mobilization will be supported by proclamation of the strike in ports promoted by the USB and that, who cannot Come to Genoa, will promote initiatives at the local level on this day.

For us, communist proletarians who participated and intervened in Assembly, the initiative of the ports of the 25th puts the battle in the center right and central who sees the protagonists of this mobilization with the direct action to combat ships(così come è stato fatta negli aeroporti come a Pisa)who transport direct weapons in the war areas and with The strike that starts from the ports. This tool of struggle is an indication from also follow for all trade union realities, in opposition to confederals that are part of the conciliation front with the war choices of governments,

Yesterday Draghi and today Meloni. We have to work for this, the "strikes general "of the basic unions have been absolutely isolated e counterproductive, self -referential, who even led to the rift of the procession of 3 December in Rome.

We think it is a useful fight tool to extend in the places of I work the worker motion against the war which, as a Slai Cobas SC union, It was signed by the workers of the Italian steelworks of Taranto, of the Fincantieri of Palermo, from the Marcegaglia of Ravenna, of the Dalmine of Bergamo and that we are spreading in other factories, which leads the workers to take sides in the fight against the imperialists in war and, as regards the Italian workers, the opposition to our government, to our imperialism.

The Assembly of the Ports of Genoa had as a positive data in addition to the participation also the attention to our interventions that have from a side brought the work, small but concrete, with the factories and the Question of the bases in Taranto.

On the other, he clarified the political complaint towards the government, ours imperialism and the character of the anti -imperialist war, which, due to the composition of the room and the numerous interventions of the network area Communists/USB/Cremaschi/Up/Rc/Pap, etc., had not been put at the center. These forces hinder the anti -capitalist antimperialist class front and are a damage for the same struggles as workers who say they represent politically or directly directing, without the right line of the indissolubility of the economic and political struggle. At the same time we do not believe that movementism/expienzism serves promoted by the GKN collective and the solidarity area of "converge to arise"(CPA-FI)where the worker direction of a class movement is watered.

A negative aspect was the lack of workers' realities starting from the former Ilva. At the end of the Assembly, a Calp worker, anti -fascist, who had been to Bergamo also for FN, asked us for an opinion on how the assembly had gone, This was an opportunity to share the need to involve the also workers of the other factories, for example those of Ilva where they have contacts, and the useful tool of the worker motion to discuss on reasons of the imperialist Inter war and the proletarian opposition.

The assembly of 28 in Genoa also had the merit of carrying out the construction of the unit of the opposition movement to war, come on workers to students, from antimperialists to antimilitarists to pacifists.

The appeal of the Calp, also with an analysis of the government that remains on the surface, has put the need for mobilization against the war on the plan at the center national: how do you boycott war from the territories when those who send the Is weapons the Italian government and the imperialist state? While the antimilitarist reduction with the password "we boycott the our imperialism and our government, at the service of the bourgeoisie Italian imperialist. It is not just about economic effects on the masses but of reactionary political effects towards the formation of a regime: the Fascism brings war, war brings fascism. We must strengthen the struggle policy against our imperialism, for the defeat of

ours imperialism., seeing the step forward of the Meloni government and the modern fascism.

It is therefore necessary to think from a proletarian and class point of view for mobilize the factories to truly create a force to make war of class.

The pacifist and antimilitarist positions have always had the limit not to see the link with the armed struggles directed by the Maoist communists, with The popular revolts, which are the substance of proletarian internamentalism.

We will bring this struggle within the proletarian assembly national anti -capitalist who is held on February 18 in Rome to enhance it, For a step forward in the formation of a united front against government, masters, imperialist war.

## **Editorial of TWO-LINES STRUGGLE N°1 on marxist-leninist-maoist tunisian blog**

Author: maoistroad

Description: Monday, January 30, 2023, the conflict between ...

Time: 2023-01-31T23:46:00-08:00

Images: [

[%D8%B5%D8%B1%D8%A7%D8%B9%20%D8%A7%D9%84%D8%AE  
%D8%B7%D9%8A%D9%86-1.png](#) ]

**Criticism of the Arab readers, the Arabic translation, for the opening of the first number of the magazine The new global of the Mawlid Leninist Marxist movement, which has the title of conflict Between the linear.**

For the revolutionaries of all countries, global proletariat and the peoples of the world, the first issue of the magazine The conflict between the two lines.

The Mawwin Leninists, but rather the decision of various parties and organizations to reinforce The conflict between the two lines between the Communists, as its title and slogan indicates, and contributing to Their unity, especially with the preparation of the Marxist Leninist seminar, Maoism Unified.

World to face the challenges imposed by the global situation, given the severity of contradictions The most important of the capitalist imperialism: the contradictions between the proletariat and the bourgeoisie, The contradiction between the imperialist states, peoples, and oppressed nations, and the contradiction between states Various imperial monopolies.

Popular masses in the world, aggression against oppressed countries and resistance wars, And the increasing preparations for a global war for a new division of the world, and to all of this The scandalous destruction of nature ... these facts confirm the state of advanced imperialism The capitalism and the excellent circumstances of the progress of the revolution, which requires the Communists to unite Their efforts to form a global center to lead the revolution and progress in building the working class party in Each country, which is necessary to ensure the victory of the global proletarian revolution.

An appropriate manner among the Marxist Leninist Communists Mawwin: Hajjaji controversy searches for The truth is in actions, rejection of the logic of the factions, previously formed blocks, and conspiracies Political maneuvers, and defection situations; and work to unite to implement the program The subscriber to call for a unified global symposium for a new international organization for the proletariat.

Ideology, politics and organizationalism related to preparing for the unified global symposium For the Mawwin Leninist Marxists.

Various varieties, it is our duty to develop a general conflict of opinions, based on identity The ideology of Marxism, Leninism, to clarify the differences within Marxism The Maoism Leninism. At the same time, we need to spread an ideological and an ideological struggle about The methods and effects created by the split sectarian positions in this conflict, By clarifying the class character of the aforementioned positions, until the global communist movement reaches Supreme level, unit level.

And the common tasks that are part of the process of struggle for ideological unity The political and organizational of the Communists in various countries. In

the same way, reports will be published And special calls to introduce the common struggles of global proletariat and the most important struggles The proletariat and the peoples of the world against imperialism and reactionary.

The magazine of the conflict between the two lines will also include some historical documents of the Communist movement The global that will be adopted as a guide and inspiring to solve the major issues facing our movement.

The magazine belongs to it, to use it as a tool for the struggle for unity, because every party and organized Marxian Leninism, Maui, according to her level, can and must make a major contribution In achieving the Marxist Leninist seminar, the unified global Muawiyah.

These efforts should continue by various parties and organizations to hold meetings Bilateral and multi -party conferences and seminars ... necessary to do joint and assistance They are mutual mutual to solve problems in order to achieve the major step of the Marxist symposium The unified global Leninism claimed by the proletariat

## **On the 80th anniversary of the victory in the battle of Stalingrad**

Author: COMMUNIST INTERNATIONAL MARXIST-LENINIST-MAOIST ONLINE NEWSPAPER

Time: 2023-01-31T99:00:00

Images: ['[stalin-1024x576.jpg](#) ']

Categories: ['Articles']

*Proletarians of all countries, unite!*

## On the 80th anniversary of the victory in the battle of Stalingrad

The International Communist League correctly stated in its 'Political Declaration and the Principles of the International Communist League': "*We assume the position of Chairman Mao on the role of comrade Stalin that he was a great Marxist. Furthermore, we must bear in mind that he was the one who brilliantly defined Leninism. We, the communists, today have the task to assume the defense of his role in World War II within the Communist International, particularly its 7 th \_\_World\_ Congress.*" The latter will be central for this article celebrating the tremendous victory in the battle of Stalingrad.

The weight and significance of this great and heroic battle was correctly established by Chairman Mao Tse-Tung: "**This battle is not only the turning point of the Soviet-German war, or even of the present anti-fascist world war, it is the turning point in the history of all mankind.**"

The war fought by the USSR, as it was absolutely correctly defined, was a Great Patriotic War, a just war of defence. Additionally to the glorious and heroic

defence, in which the USSR under the leadership of Comrade Stalin had to apply scorched land to defend its territory, to defend the socialist motherland, what costed more than 25 million lives, the anti-imperialist struggle unfolded vastly in the oppressed nations during this period.

Chairman Mao Tse-Tung just and correct thought us: **“The Soviet Union’s sacred war of resistance against fascist aggression is being waged not only in its own defence but in defence of all the nations struggling to liberate themselves from fascist enslavement. For Communists throughout the world the task now is to mobilize the people of all countries and organize an international united front to fight fascism and defend the Soviet Union, defend China, and defend the freedom and independence of all nations.”**

The peoples of the world rose for the just cause and spilled their precious blood not only in the war against the axis, but also against their respective imperialist masters, what initiated the great anti-colonial struggle in the second half of the 20th century.

In the winter 1941/42 the Soviet Union under the leadership and command of Comrade Stalin had already successfully rebuffed a vicious Nazi-German attack on the western part of the country, aiming to take the capital Moscow. The Nazi-Wehrmacht, not able to understand that every attempt to crush the Bolshevik steel tempered by the great Lenin and Stalin was doomed to fail, mounted an offensive on southern Russia in the summer of 1942. They set their sights on Stalingrad, because the city served as an industrial center in Russia, producing, among other important goods, artillery for the country's troops. The Volga River, which runs through the city, was also an important shipping route connecting the western part of the country with its distant eastern regions. The Nazis wanted the Wehrmacht to occupy Stalingrad, seeing its value for propaganda purposes, given that it bore Stalin's name. For similar moral reasons there was a special need to defend it. The 6th Army of the Wehrmacht began their assault on 23 August 1942.

Comrade Stalin, as the highest command, issued personally the Order 227, at the end of July 1942, in order to elevate the level of sacrifices and fighting spirit of the armed forces to the level of the people:

" The enemy throws new forces to the front without regard to heavy losses and penetrates deep into the Soviet Union, seizing new regions, destroying our cities and villages, and violating, plundering and killing the Soviet population. Combat goes on in region Voronej, near Don, in the south, and at the gates of the Northern Caucasus. The German invaders penetrate toward Stalingrad, to Volga and want at any cost to trap Kuban and the Northern Caucasus, with their oil and grain. [...] Part of the troops of the Southern front, following the panic-mongers, have left Rostov and Novochercassk without severe resistance and without orders from Moscow, covering their banners with shame.

The population of our country, who love and respect the Red Army, start to be discouraged in her, and lose faith in the Red Army, and many curse the Red Army for leaving our people under the yoke of the German oppressors, and itself running east. Some stupid people at the front calm themselves with talk that we can retreat further to the east, as we have a lot of territory, a lot of ground, a lot of population and that there will always be much bread for us. They want to justify the infamous behavior at the front. But such talk is falsehood, helpful only to our enemies.

Each commander, Red Army soldier and political commissar should understand that our means are not limitless. The territory of the Soviet state is not a wives, brothers, children. The territory of the USSR which the enemy has captured and aims to capture is bread and other products for the army, metal and fuel for industry, factories, plants supplying the army with arms and ammunition, railroads. After the loss of Ukraine, Belorussia, Baltic republics, Donetsk, and other areas we have much less territory, much less people, bread, metal, plants and factories. We have lost more than 70 million people, more than 800 million pounds of bread annually and more than 10 million tons of metal annually. [...] To retreat further - means to waste ourselves and to waste at the same time our Motherland. Therefore it is necessary to eliminate talk that we have the capability endlessly to retreat, that we have a lot of territory, that our country is great and rich, that there is a large population, and that bread always will be abundant. Such talk is false and parasitic, it weakens us and benefits the enemy, if we do not stop retreating we will be without bread, without fuel, without metal, without raw material, without factories and plants, without railroads. This leads to the conclusion, it is time to finish retreating. Not

**one step back! [...] It is impossible to tolerate commanders and commissars permitting units to leave their positions. It is impossible to tolerate commanders and commissars who admit that some panic-mongers determined the situation on the field of combat and carried away in departure other soldiers and opened the front to the enemy. The panic-mongers and cowards should be exterminated in place.**

**Henceforth the solid law of discipline for each commander, Red Army soldier, and commissar should be the requirement - not a single step back without order from higher command. Company, battalion, regiment and division - commanders and appropriate commissars, who retreat without orders from higher commanders, are betrayers of the Motherland. These are the orders of our Motherland. To execute this order - means to defend our lands, to save the Motherland, to exterminate and to conquer the hated enemy."**

Our heroic red soldiers were initially able to slow the Wehrmacht's advances during a series of skirmishes north of Stalingrad, offering more than 200,000 lives, and successfully held off the Nazi hordes. It was decided not to flee but withstand and therefore not to evacuate the more than 400,000 inhabitants of the city. The men and women, even the youngest, of Stalingrad were incorporated into war related activities – combat, construction, espionage, supply, etc. Even when the walls of Stalingrad bursted by the Luftwaffe's constant bombardments or the heavy artillery strikes, the people stood steadfast.

The Operation Uranus led by Georgy Zhukov and Aleksandr Vasilevsky organized Russian troops in the mountains to the north and west of the city. From there, they launched a counterattack. Paying the necessary price the Red Army was able to encircle the city by late November 1942, trapping the nearly 300,000 German and Axis troops(mainly Italian and Romanian), choking off the enemy forces from vital supplies and essentially surrounding them in an ever-tightening noose.

Close to Stalingrad the Red Army won important battles, including in Rostov- on-Don, about 250 miles away from Stalingrad. Thus the enemy forces were thinned and stretched at that part of the front and the Operation Little Saturn in the west of Stalingrad was successful. With men, not arms, proving the Marxist principle about what is most important correct once again, they strangled the

invaders to death and fought the greatest battle of war in cities ever seen. It was a war not only from street to street, nor from house to house or cellar to cellar, not even floor by floor, but room by room, generating the most heroism, chapters that have shaken the world.

On the significance of the battle of Stalingrad for the whole course of the war Chairman Mao stated: “**...in this present war the attack on Stalingrad is the expression of the last desperate struggle of fascism itself. At this turning point in history, too, many people in the world anti-fascist front have been deluded by the ferocious appearance of fascism and have failed to discern its essence. For forty-eight days there raged an unprecedentedly bitter battle, unparalleled in the history of mankind—from August 23, when the entire German force crossed the bend of the River Don and began the all-out attack on Stalingrad, through September 15, when some German units broke into the industrial district in the northwestern section of the city, and right up to October 9, when the Soviet Information Bureau announced that the Red Army had breached the German line of encirclement in that district. Ultimately this battle was won by the Soviet forces. During those forty-eight days, the news of each setback or triumph from that city gripped the hearts of countless millions of people, now bringing them anxiety, now stirring them to elation.** of the present antifascist world war, it is the turning point in the history of all mankind. Throughout these forty-eight days, the people of the world watched Stalingrad with even greater concern than they watched Moscow last October. [ ... ] following the battle for the defence of Stalingrad, the situation will be totally different from that of last year. On the one hand, the Soviet Union will launch a second winter counteroffensive on a vast scale, Britain and the United States will no longer be able to delay the opening of the second front(though the exact date cannot yet be foretold), and the people of Europe will be ready to rise up in response. On the other hand, Germany and her European accomplices no longer have the strength to mount large-scale offensives, and Hitler will have no alternative but to change his whole line of policy to the strategic defensive.”\*\*

We all know, and we must remember, that the fascist offensive led by the Nazis, to which the Italian and Spanish fascists as well as others like the Romanians, Hungarians and also Bandera's bunch of rats from Ukraine contributed, and which used all the economic might of subjugated Europe, threw millions over

millions, the cream of the German army, 75% of its air force, into the invasion. But comrade Stalin had wisely handled diplomacy with great subtlety.

It is worth noting the sagacity and penetration of the Soviet intelligence service. What an intelligence service. They knew the exact day of the Nazi- invasion.

The Soviet Union applied a strategic defence together with scorched earth, leaving them nothing but bare earth, mud, ashes and the most brave, determined and resolute partisans behind the enemies lines. They had the audacity, the courage to blow up monumental works such as the famous dam that links the Volga with the Don that took so many years of effort. The Germans never dreamed, they thought that this work would not be blown up, because it was too important and had cost a lot.

The dictatorship of the proletariat was at stake, the revolution was at stake, we cannot stop to think, nor can we simply allow ourselves to be hindered, as Chairman Mao said, by the defence of inches of land. They crashed at the gates of Leningrad, at the gates of Moscow and Stalingrad; but not only

scorched earth was carried out, but guerrillas and even simple individual men and women with their rifles, their ammo and their vodka awaited the enemy. To annihilate one of those brave heroes and heroines, the Germans lost 10 men, averagely.

The fascist offensive was a military plan of very high quality, thus, the highest and most enlightened German military leaders elaborated this plan and the German school has a many times proven war tradition: in three months they planned to conquer the USSR.

Comrade Stalin's foresight, he had already taken measures since the 1930s when there was the great transformation of the countryside and industry, they had already transferred factories beyond the Urals, even foreseeing the possibility of leaving as far as Moscow, for it is true, everything was

already in place in case they could not ultimately defend Moscow, even if that was the decision taken, it was already planned to move the leadership and the centre to the Urals; So the first thing that was done was to make arrangements for Lenin's transfer, because he could not fall into the dirty hands of the wretched sons of hell, he could not fall.

But the order, after they had penetrated to the above mentioned gates, the order was not to retreat any further! It is very memorable, and we must always remember how on November 7, the anniversary of the revolution, they had nowhere to celebrate it and it was considered impossible to carry it out; comrade Stalin said: "to the station", "but there is no platform there, there are no seats there", comrade Stalin stepped on a box and spoke in celebration of the revolution, saying: "how many of us were there when we seized power, what forces did we have when we repulsed the imperialist aggression immediately after the October Revolution? We will crush them, and we will annihilate the beast in its own den, in Berlin."

These are things one must remember, to appreciate comrade Stalin one must look at the Second World War. We all know how then came the great resistance, the breaking of the German lines, the siege of Stalingrad where the German commanders, Hitler himself, commanded them not to retreat to those inferior subhumans. Those inferiors, the barbarians, the Mongols, hunted them down like rats and they had to surrender.

It is always good to reiterate this: Stalin, the skillful and wise manager of war, always took the moral element into account and paraded all the defeated, surrendered Nazis and threw their flags, their eagles, their swastikas at the foot of Lenin's mausoleum; not only a great military defeat, but a great moral defeat! The Nazi arrogance had been sunk in the mud and trampled beginning of the breakdown of the Nazi Wehrmacht.

In February 1943 Comrade Stalin analysed: "**Three months ago the troops of the Red Army began their offensive at the approaches to Stalingrad. Since then the initiative in military operations has remained in our hands and the pace and striking power of the offensive operations of the Red Army have not weakened. Today, in hard winter conditions, the Red Army is advancing over a front of 1,500 kilometres(950 miles)and is achieving successes practically everywhere. In the north, near Leningrad, on the central front, at the approaches to Kharkov, in the Donets Basin, at Rostov, on the shores of the Sea of Azov and the Black Sea, the Red Army is striking blow after blow at the Hitlerite troops. In three months the Red Army has liberated from the enemy the territory of the Voronezh and Stalingrad regions, the Checheno-Ingush, North Ossetian, Kabardino-Balkarian and Kalmyk Autonomous Republics, the Stavropol and**

**Krasnodar Territories, the Cherkess(Circassian), Karachaisu and Adygeisu Autonomous Regions and almost the whole of the Rostov, Kharkov and Kursk Regions.**

[...] in the winter of 1942-43 alone, the Germans lost over 7,000 tanks, 4,000 planes, 17,000 guns [...] since the beginning of the war, has put out of action about 9,000,000 German-fascist officers and men, of whom no less than 4,000,000 were killed on the battlefield.

[...] first, the weakness of the German army is the shortage of man-power reserves, and consequently it is not known from what sources these losses will be replaced. [...] the Red Army has become a seasoned army. [...] millions of Red Army men have become masters of their weapons [ ...]

It cannot be considered an accident that the Red Army Command not only liberates Soviet soil from the enemy but does not let the enemy leave our soil alive, carrying out such important operations as the encirclement and annihilation of enemy armies which can well serve as examples of military art. This is undoubtedly a sign of the maturity of our commanders.

There can be no doubt that only the correct strategy of the Red Army Command, and the flexible tactics of our commanders who execute it, could have resulted in such an outstanding fact as the encirclement and annihilation at Stalingrad of an enormous picked army of Germans, numbering 330,000 men.”

Our Brazilian comrades pointed out: The victory against fascism in the Second World War is one of the great historical events of the process of the Proletarian World Revolution, the imperialist camp found itself deeply beaten, three important imperialist powers were defeated - Germany, Japan and Italy - which has to be seriously studied for its just and correct comprehension, it has to be highlighted and celebrated.

The Communist Party of China affirmed, regarding the evaluation of this historic experience:

**“ In the first place, the history of anti-fascist war shows that the socialist system has an enormous vitality that can resist the most severe test and that a state of the dictatorship of the proletariat is invincible.**

**In second place, the history of the anti-fascist war shows that imperialism is the source of all wars in modern times, that the aggressive nature of imperialism will not change and because of that, to defend world peace it is necessary to persist in the struggle against imperialism.**

**In third place, the history of the anti-fascist war shows that the peoples war sure to attain victory, that it is completely possible to defeat the imperialist aggressors, that imperialism is a paper tiger, who is apparently strong, but in reality is weak, and that the atomic bomb is also a paper tigress and it is the people and not the arms, of any class, who decide the outcome of the war.**

**In fourth place, the history of the anti-fascist war shows that, in order to defeat the imperialist aggressor, it is imperative to trust in the unity of the revolutionary forces of the people in all countries, to attract to our side all the forces that can be won, to form the broadest possible international united front and concentrate our blows on the main enemy of the peoples of the world.”**

Under the guns of the glorious Red Army Nazi-Germany was shattered, Socialism and the dictatorship of the proletariat arose in up to Eastern Germany. The Red Banner of the Communist Party and the USSR waving over the shadowed and destroyed German Reichstag is an undeniable great moment of the international proletariat that symbolize the whole heroic and glorious epic of the struggle against fascism in defense of the USSR and for the development of the Proletarian World Revolution. The sentence made by comrade Dimitrov when he embarked in the direction of

USSR after the great victory in the Nazi Tribunal in Leipzig was thus accomplished: “*We will make Germany Soviet!*”.

'Army fighters Popular liberation guerrilla

Taken from [Dazibao Red](#), January 24, 2023

#####(Asuntos Internacionales / Comité Central, Partido Comunista de la India ) (Maoísta)(Maoísta), calls to condemn these brutal attacks against the indigenous peoples of Bastar and Saaranda and organize concentrations of protest before the Indian embassies on the so -called Republic Day of the India, that is, on January 26 worldwide.

Since last October, the exploiters Indian ruling classes, in particular the Hindutva forces, concentrated strongly on the movement Indian revolutionary. Under the leadership of the Indian Interior Minister, the Mr. Amit Sha, a special meeting was held in Surajkund, Haryana. In that meeting, the Indian prime minister addressed the police and the officers of Intelligence and ordered them to eliminate the Maoists, both those who have Weapons like those who have pen. For a few years, the forces Hindutva have introduced a new expression in India: Urban Naxal. Now him Prime Minister has once again used the same phrase, but in his own style of satirical speech, Kalamdhari(poseedor de bolígrafos).

Therefore, this indicates that the Prime Minister and Interior Minister of India are very eager to eliminate the Indian revolutionary movement to fulfill their Make in India dreams.

On December 11, the Indian Interior Minister held a crucial meeting high -level with Indian intelligence officers in New Delhi and clarified his Plan at that meeting. Said police forces are ready to enter In the Maad area of the Narayanpur district, Chhattisgad to take it under Your control.

On January 7, the same Indian Minister of Interior, Amit Sha, went to A public meeting in Korba, an industrial center of the state of Chhattisgad. At that meeting he declared that his government will create an Indian free of Maoist before the general elections of 2024. Meanwhile, they were carried out several meetings at the local level with police officers for a better Coordination of state and central forces in the next operations military

Finally, their maoist eradication operations began in forests border from the districts of Sukma, Bijapur and Dantewada, which is the area adjacent to the state of Telangana. In this great operation, the NSG(National Security Guards), Gray Hounds, Cobra and other armed forces of The Central Police, together with the Garuda Commands of the Indian Air Force. But the PLGA guerrillas retaliated with the full support of the local revolutionary town.

Indian ruling classes and their central and state governments are They hurried to eliminate the Indian revolutionary movement. Because it's him main obstacle in its looting and plundering of the country's rich resources. On the other hand, the indigenous peoples of India are fighting for their fair claims. They fight for their legal rights over their forests. They are in reactionaries of the center and the State, who work for the benefit of great corporations, are launching new and greater forms of attack against the village. Therefore, our CC [Central Committee] makes a new call so that you condemn these attacks and raise your voices against the forces Hindutva fascists.

In our country, democratic and revolutionary intellectuals, patriots, rights activists, students, young people, secularists, writers, artists, lawyers, defenders of indigenous peoples, the anti -imperialist forces that love peace and Ecologists firmly oppose corporatization, militarization of forests and, in particular, to the country's Hinduization. Therefore, it is the most favorable moment to develop

and consolidate the movement of Indian revolutionary solidarity in support of the Popular War throughout the world.

We bring an unofficial Danish translation of the [leader](#) From Ci-ic.org:

*Proletars in all countries, unite!*

## about the 80th anniversary of the victory in the Battle of Stalingrad

International Communist Association said correctly in its' political statement and International Communist Association's Principles': » *VI occupies President Mao's position on Comrade Stalin's role that he was a great Marxist. Moreover Should we remember that it was him who defined Leninism brilliantly. We, the Communists, today have the task of assuming the defense of his role in World War II within the Communist International, especially its 7. World Congress.* " The latter will be central to this article that celebrates The huge victory in the Battle of Stalingrad.

The weight and meaning of this great and heroic battle was properly established by President Mao TSetung: » **This blow is not only the turning point in it Soviet-German war or even in the present anti-fascist world war, That's the turning point in the whole story of mankind.** «

The war that the Soviet Union fought was, as it was quite correct Defined, a great Fatherland War War, a just defense war. Besides the glorious and heroic defense where the Soviet Union under the leadership of mate Stalin had to apply burnt country to defend its territory, in order to defend the socialist fatherland, which cost more than 25 million life, the anti -imperialist struggle developed violently in the oppressed nations during this period.

Chairman Mao TSetung thought to us fairly and correctly: » **the Soviet Union's Holy Resistance War against the Fascist Aggression not only led to Defense of the Soviet Union, but in defense of all the nations fighting To free yourself from fascist slavery. For communists in the whole world is the task now to mobilize people in all countries and organize an international unit front to fight fascism and defend the Soviet Union, defend China and defend the freedom and independence of all nations.** «

The World's People rose up for the righteous case and shed their precious blood not only in the war against the axis but also against their respective imperialist gentlemen, which initiated the great anti -colonial fight in the second half of the 20th century.

In the winter of 1941/42, the Soviet Union had under the leadership and command of mate Stalin already successfully rejected a malicious Nazi-German attack on it Western part of the country with a view to taking the capital Moscow. The Nazi Armed Forces that could not understand that any attempt to crush it Bolshevik steel that was hardened by the great Lenin and Stalin was doomed to fail, began an offensive against southern Russia in the summer of 1942. They put their sieve grain on Stalingrad because the city acted as an industrial the center of Russia, which, among other things, produced important goods, including artillery to the country's troops. The Volga River, which runs through the city, was also an important Ship route that connected the western part of the country with the distant eastern Regions. The Nazis wanted the armed forces to occupy Stalingrad as they So its value in propaganda when it bore Stalin's name. Of similar moral Reasons were a special need to defend it. The Arms of the Armed Forces 6th Army began their attack on August 23, 1942.

Comrade Stalin issued personally, as the top command, at the end of July 1942 order 227 to raise the sacrificed forces of the armed forces and fighting spirit to the level of the people:

»The enemy throws new forces to the front without regard to great losses and penetrates deep into the Soviet Union, occupying new areas, destroying our cities and Villages and violates, looting and killing the Soviet population. the fight continues in the region of Voronej, near Don, in the south and at the gates of the northern Caucasus. The German attackers are entering towers towards Stalingrad, to Volga and wishes at all costs to catch Kuban and the northern Caucasus with their oil and cereal. [...] Part of the troops on the southern front have followed the panic makers and abandoned Rostov and Novochhercask without serious resistance and without the order of Moscow, as they cover their tabs with shame.

The population of our country who loves and respects the Red Army begins to become discouraged in her and lose faith in the Red Army, and many curses The Red Army for having left our people under the yoke of the German oppressors And even flee to the east. Some stupid people by the front soothe themselves with talk that we can pull ourselves further to the east as we have a large area, a lot of land, very population, and that there will always be a lot of bread for us. The want to justify the notorious behavior at the front. But such a talk is a lie that only helps our enemies.

Each commander, soldier in the Red Army and Political Commissioner should understand that but people - workers, peasants, intelligentsia, our fathers, mothers, Wives, brothers, children. The territory of the Soviet Union that the enemy has conquered and intends to conquer, are bread and other products for the army, metal and fuel for industry, factories, facilities that supply the army with weapons and Ammunition, Railways. After the loss of Ukraine, Belarus, the Baltic Republics, Donetsk and other areas we have much less territory, many Fewer people, bread, metal, factories and factories. We have lost more than 70 million people, more than £ 800 million broke a year and more than 10 million tons of metal a year. [...] To withdraw further - means that we are wasting ourselves and at the same time wasting our motherland. Therefore it necessary to remove the talk of the fact that we have the ability to pull us infinitely back that we have a large area that our country is large and rich that there is a large population and that there will always be plenty of Bread. Such a talk is fake and parasitic, it weakens us and benefits the enemy, If we don't stop withdrawing we will be without bread, without fuel, without metal, without

**raw materials, without factories and plants, without Railways. This leads to the conclusion that it is time to stop The withdrawal. Not a step back![...] It is impossible to tolerate that Commissioners and Commissioners allow units to leave their positions. That are impossible to tolerate commanders and commissioners who admit that some Panic stockers determined the situation on the battlefield and led other soldiers with Say in departure and opened the front of the enemy. Panic makers and cowards should exterminated on site.**

**In the future, the fixed law of discipline for each commander, soldier in it should Red Army and Commissioner be the claim - not a single step back without order from the higher leadership. Company, Battalion, Regiment and Division commanders and the relevant commissioners who withdraw Without the order of higher command, are traitors of the motherland. This is ours Motherland Orders. To execute this order - means to defend our country that save the motherland, to eradicate and defeat the hated enemy.**

«

Our heroic red soldiers were initially able to slow down The protection of the armed forces during a series of matches north of Stalingrad, and sacrificed More than 200,000 lives, and they successfully kept the Nazi hordes back. That were decided not to escape but to keep up and therefore not to evacuate the more than 400,000 inhabitants of the city. The men and the women, even the youngest, in Stalingrad was involved in war -related activities - battle, construction, espionage, supply, etc. Even when Stalingrad's walls jumped in the air because of Luftwaffe's constant bombings or the heavy artillery attacks stood the population firmly.

Operation Uranus under the direction of Georgy Zhukov and Aleksandr Vasilevsky Organized Russian troops in the mountains north and west of the city. From here they initiated a counter -attack. By paying the necessary price was the Red Army in stand to surround the city at the end of November 1942 and catch the nearly 300,000 German and axis troops(hovedsageligt italienske og rumænske), strangle they hostile forces from vital supplies and essentially surround them in a still tighter loop.

Near Stalingrad, the Red Army won important battles, including In Rostov-on-Don, approx. 250 miles from Stalingrad. Thus the enemy forces were thinned out and stretched out on that part of the front, and Operation Little Saturn West

of Stalingrad was a success. With men, not weapons, which once again proved, that the Marxist principle of what is most important was correct, they tormented the attackers to the death and fought the greatest war beats in cities that ever is seen. It was a war not only from street to street, nor from house to house or from basement to basement, not even from floor to floor, but from room to spaces that produced the most heroic, chapters that have shaken the world.

About the meaning of the Battle of Stalingrad for the entire course of the war stated Chairman Mao: » ... In this current war is attacked on Stalingrad expression For the last desperate struggle of fascism for fascism itself. Also on this Turning point in the story are many people in the anti -fascist world front been mislead by the fuscism's fucking appearance and has not understood its creature. For 48 days, an unprecedeted battle raged unparalleled in The History of Man crossed the arch of the Don River and initiated the total attack on Stalingrad, over it September 15, when some German units broke into the industrial district of it northwestern part of the city, and right up to October 9, when the Soviet Information agency announced that the Red Army had broken the German surrounding line in this neighborhood. In the end, this match was won by the Soviet forces. During these 48 days the news grabbed about each one the hearts of people, and now it brought them anxiety, now it aroused them excitement. This blow is not only the turning point of the Soviet-German war or even in the present anti -fascist world war, that is the turning point in The whole history of humanity. During these 48 days the world's population has followed Stalingrad with even greater concern than they followed Moscow in October last year. [...] After the Battle of the Defense of Stalingrad, the situation will be Completely different from last year. On the one hand, the Soviet Union will launch one Second Winter Modoffensive on a large scale, Britain and the United States will no longer could delay the opening of the other front(selv om den nøjagtige dato endnu ikke kan forudsiges), and the populations of Europe will be ready to rise in response. On the other hand, Germany and its European accomplice do not longer strength to launch large offensives and Hitler will not have other choice than to change his entire policy to strategic defensive. «

We all know and we must remember that the fascist offensive that was led by the Nazis, and as the Italian and Spanish fascists as well as others who The Romanians, the Hungarians and also Bandera's bunch of rats from Ukraine

contributed to, and which used the whole subdued Europe's financial strength threw millions over millions, the cream of the German army, 75 % of its air force, into the invasion. But Comrade Stalin had wisely handled the diplomacy with great finesse.

It is worth noting the sharpness of the Soviet intelligence services and impact. What an intelligence service. They knew the exact day for the Nazi invasion.

The Soviet Union used a strategic defense along with burnt land so they not left other than bare land, mud, ash and the most brave, decisive And resolutely partisans behind enemy lines. They had that audacity and the courage To blow up monumental works such as the famous dam that connects Volga and Don, who have demanded so many years of effort, in the air. The Germans dreamed never if they thought this work would not be blown up in the air because It was too important and had cost a lot.

The dictatorship of the proletariat was at stake, the revolution was at stake, we cannot Stop up thinking, nor we can't just let us hinder as chairman Mao said, of the defense of inches of land. They struck down at the gates to Leningrad, at the gates of Moscow and Stalingrad; but not only burnt soil became performed but guerrillas and even simple individual men and women with their rifles, their ammunition and their vodka waited for the enemy. To destroy one of these brave heroes and heroines lost the Germans in average 10 men.

The fascist offensive was a military plan of very high quality, and therefore drafted the highest and most enlightened German military leaders this plan, and the German school has a many times proven war tradition: In three months planned they to conquer the Soviet Union.

Comrade Stalin's foresight he had already taken measures since the 1930s when a major transformation of the rural areas occurred and the industry they had already moved factories in addition to Ural and even predicted the opportunity to go so far as to Moscow, because it is true, everything was already in place if they ultimately couldn't defend Moscow, although It was the decision that was made it was already planned to move Management and Center to Ural; Then the first thing that was done was to meet Measures to Lenin's transfer, for he could not fall into the miserable Hell -sons' dirty hands he couldn't fall.

But the order, after they were penetrated to the above ports, was the order that they Didn't have to retreat further!It is very memorable and we have to always

remember how they on November 7, on the anniversary of the revolution, not had any place to celebrate it and it was considered impossible to complete the; Comrade Stalin said: 'But there is no platform there there are no seats there «, Comrade Stalin stepped up on a box and spoke for celebration of the revolution and said, "How many of us were there when we grabbed the power, which forces we had when we beat the imperialist aggression back Immediately after the October Revolution? We will crush them and we will destroy the beast in its own cave, in Berlin. "

These are things to remember to understand mate stalin to look at World War II. We all know how then the great resistance came, How the German lines were broken, how the siege of Stalingrad came, where the German commanders, Hitler themselves, ordered them not to withdraw back for these inferior sub - humans. These sub -humans, the barbarians, The Mongols, chased them like rats, and they had to surrender.

It's always good to repeat this: Stalin, the skilled and wise war manager, always took into account the moral element and he let all of them defeated, surrendered Nazis go into parade and threw their flags, their eagles and Defeat, but also a great moral defeat!The Nazi arrogance was been lowered in the mud and trampled down, it was the greatest moral blow, it had ever gotten and that was the beginning of the Nazi The collapse of the Armed Forces.

In February 1943, Comrade Stalin analyzed: » **three months ago launched the Red Army troops their offensive by the approach roads to Stalingrad. Since then, the initiative of the military operations has remained in our hands, and the pace and impact in the offensive operations of the Red Army has not been weakened. Today the Red Army is moving under tough winter conditions over a front of 1,500 km and achieves practically everywhere successes. IN north, near Leningrad, on the central front, at the entrance to Kharkov, in Donets-Belket, by Rostov, by the Azov Sea and the Black Sea, beats the Red Army blows after battle against Hitler's troops. Over the course of three months the Red Army has liberated Voronezj and Stalingrad regions, they are Chechen-English, North Ossetic, Kabardino-Balkarian and Kalmyca Autonomous Republics, Stavropol and Krasnodar territories, the Chechen, Karatjaxian and adygi-visuistic autonomous regions and almost all of Rostov-, Kharkov- and Kursk- the region from the enemy.**

[...] In the winter of 1942-43 the Germans lost over 7,000 tanks, 4,000 aircraft, 17,000 guns [...] Since the beginning of the war has set about 9,000,000 German-fascist officers and men out of the game, of which no less than 4,000,000 were killed on the battlefield.

[...] First, the weakness of the German Army is the lack of manpower reserves, And consequently, you do not know from which these losses will be replaced. [...] the Red Army has become a seasoned army. [...] Millions of men in the Red Army have become masters in their weapons [...]

It cannot be regarded as a coincidence that the Red Army's command not simply liberates Soviet soil from the enemy but do not let the enemy leave our land alive as it implies such important operations as a surrounding and the annihilation of hostile armies that may well serve as examples of Military art. This is undoubtedly a sign of our commanders' maturity.

There can be no doubt that only the correct strategy from the Red Army Command and the flexible tactics of our commanders who perform it, could have resulted in such an excellent fact as the surrounding and the destruction at Stalingrad of a huge collected army of Germans at 330,000 man. «

Our Brazilian comrades pointed out: the victory over fascism in other World War is one of the great historical events in the proletarian World Revolution's process, the imperialist camp found itself deeply beaten, Three important imperialist powers were defeated - Germany, Japan and Italy - which is to be studied seriously to gain a fair and correct understanding, It must be highlighted and celebrated.

China's Communist Party confirmed in terms of the evaluation of this Historical experience:

»First, showing the story of the anti -fascist war that it Socialist system has a huge vitality that can withstand the hardest trial, and that a state of the dictatorship of the proletariat is invincible.

Secondly, the history of the anti -fascist war shows that imperialism is the source of all wars of modern times that the aggressive nature of imperialism not will change and that it is therefore necessary to continue the fight against imperialism to defend world peace.

**Third** sure to win that it is quite possible to defeat the imperialist aggressors that imperialism is a paper tiger that is apparently strong, but in reality is weak and that the nuclear bomb is also a paper tiger and that it are the people and not the weapons, regardless of class that determines the outcome of the war.

For the fourth, showing the history of the anti-fascist war that it is in order to defeat the imperialist aggressor is imperative to trust the unity of revolutionary folk forces in all countries, to draw all the powers that can be won, to our side, to form the widest possible international unit front and concentrate our battle against the world's main enemy. «

During the glorious Red Army Cannons, Nazi-Germany was crushed, socialism And the dictatorship of the proletariat emerged throughout East Germany. The Communist Party and the Soviet Union's Red Banner Wing Over the Shadowed and Destroyed German Reichstag, is an undeniable great moment for the international proletariat, that symbolizes all the heroic and glorious epic of the fight against fascism In defense of the Soviet Union and of the development of the proletarian World Revolution. The phrase that mate Dimitrov stated when he went into walk toward the USSR after the great victory in the Nazi tribunal in Leipzig, became Thus completed: "We will do Germany Soviet!" .

FULLSTANDIG RAPPORT: [In Brazil, actions celebrate the foundation of the International Communist League\(atualizado 24/01\)](#) ### Germany - III 2023:  
"Live International Communist Association!"

Also this year, the LLL demonstration took place in Berlin in January. While this annual The event is first and foremost a settlement between the different powers of it Revolutionist movement in BRD, the Maoists this year had another

message: International Communist Federation - IKF is founded! One diverse International contingent preached this historical message under the demonstration, and fulfilled the requirement that had been set in the previous years at the same demonstration - also in the fight: for the new organization of it International Proletariat!

This message was not only severely spread but also with joy accepted by Many masses. Several times the masses asked for the flags of the IKF, which were carried under The demonstration in four languages - Spanish, English, Turkish and German. Some wanted Even buying them on site. An excerpt of IKF's political statement and Principles were distributed as a brochure, and Partizan comrades distributed printed Brochures with declaration in English and Turkish. This was the meaning of as III- The demonstration has used in BRD and parts of Western Europe to celebrate and spread This success of the Maoists.

The participants in the block now look full of joy and proletarian optimism towards to Develop work under new and better conditions for the goals of communists - Communism - and to continue the Association of International Communist The movement.

Wall newspapers are distributed in Kristiansand and a flag is set up in Vennesla.

*Proletarier i alle land, fører der!*

**LEVE MAOISMEN!**

**Lenge leve Internasjonalt Kommunistisk Forbund!**

De maoistiske maoistiske partiene og organisasjonene som deltok i den FORENTES MAOISTISKE INTERNASJONALE KONFERANSEN (CMU-UMIC), som følger samme vel som den andre internasjonalen støtter av den store Lenin, og de beste tradisjonene i den internasjonale kommunistiske bevegelsen, erklærer hoytidlig til det internasjonale proletariatet og verdens folk at den historiske og overvirkende angsten om å støtte den nye internasjonale maoistiske organisasjonen er tatt, grunngått under tre store og sterke røde faser: maoismen, kamp mot revisionismen og proletarisk verdensrevolusjon.

Med dyp kommunistisk overbevisning, støtter vi partier og organisasjoner som er gjennomført her, igjen og med hoytidelig beskrivelse, at vi vil opplyse verden om Den første maoistiske internasjonale konferansen, og forvare og utøvende den allmektige ideologien til det internasjonale proletariatet: marxismen-leninismen-maoismen.

Dette er en fast forpliktelse i den lange og intettede kampen for å trykke maoismen gjennom som ørste kommando og veileder for verdensrevolusjonen, den ørste dype røde og aldrig faltende faren som garanterer seieren for proletariatet, de undertrykte nasjonene og verdens folk i vår umøgelige martyri mot den gule og for altid skinnende kommunismen.

Den første forenede maoistiske internasjonale konferansen av maoistiske maoistiske kommunistiske partier og organisasjoner, har et historisk overordnende og dyp strategisk innhold. Det er en storstilt oppgave som samverket med den nye store bøgen av proletarisk verdensrevolusjon.

Med enorm entusiasme og overstromende av klasse optimisme og sterkt bevegelse, reiser vi det røde slagordet:

Den 1. Forente Maoistiske Internasjonale Konferansen er et grunnlag og marsjerer utstøttig mot å gjøre forenede kommunister i den internasjonale kommunistiske bevegelsen, en krigsmaskin, en maskin for kamp som reiser de aldrig faltende faren til marxismen-leninismen-maoismen og den uovervinnelige folkekrigene!!

<sup>2012-2021</sup>  
CASA DE GESTION  
RINCON TAGOLABA"

--- Image of community offices Rincon Tagolaba

On Sunday, January 29, 2023, by different media the aggression of which the agricultural community of Rincón Tagolaba was subject(Rinconcito), located in Tehuantepec, Oaxaca. Armed subjects on board more of 10 trucks arrived to the community with the clear intention of intimidate the population in retaliation for the collective determination of Defend natural resources such as trees and water.

The operation of armed men was headed by the Mercenarios brothers Anastasio and Sergio Gutiérrez García, colloquially known as \_ "tacho Basket and Sergio Canalla ", and identified by the government itself of the Republic as leaders of the \_ "poster of the dispossession" \_ that operates in different Municipalities of the Isthmus of Tehuantepec. [one]

The background of violence against the community are evident:

--- Talamontes deforested the community of Rincón Tagolaba

In retaliation on January 29, 2023 Tacho, Sergio and his group entered armed, remaining in the community for more than five hours collapsing the Posts and fences from the workshop land, destroying water hoses drinkable and access chains to the community. During their stay they made firearm shots and besieged the homes of the representatives Community, mocking them and challenging them out of their homes.

From these facts, the Government Secretariat of the State of Oaxaca was notified, The Attorney General of the State of Oaxaca, the Human Rights Ombudsman of the people of Oaxaca and the national mechanism for the protection of people Defenders and journalists, requesting their intervention to safeguard the life and integrity of peasant families.

The National Guard arrived at the scene after a long time, and Coincidentally the aggressors retired just a few minutes before, taking all the necessary time to collect the bullet caps percussed, but leaving the evidence of the damage and fires that caused against the population.

--- National Guard arrived after the aggressors had retired

Today again the situation is of anxiety as Sergio Gutiérrez García assures that will return to achieve its mission that is none other than impose on your lieutenant, illegally exploit the mount and strip his land to the community.

The Gutiérrez García brothers are a couple of bandits, converted into landowners based on violence and paramilitarism, and today operate at service of criminal groups, private companies and different levels of government than of One way or another they want to impose the interoceanic corridor of the isthmus of Tehuantepec(CIIT). For that reason they are committing all kinds of spoils of communal lands and small properties that are in the passage of Areas of affection of this megaproject.

We directly hold Anastasio and Sergio Gutiérrez García de Any new armed incursion or aggression against the community of Rincón Tagolaba, as well as the physical and emotional integrity of families Peasants that live there. the integrity of the community and its inhabitants, and put a definitive stop to This wave of aggressions, reminding them that the brothers Gutiérrez García are linked at least 4 criminal proceedings by the Santa community Cruz tagolaba.

We emphasize that before these aggressions of mercenary and paramilitary groups, and The complicity of the State, the response of the peoples is the organization and the Combative mobilization.

**High to the spoils and impositions in Santa Cruz Tagolaba!**

**High to the aggressions against Rincón Tagolaba!**

**Jail for the mercenary brothers Gutiérrez García!**

**No to the imposition of spoil and death megaprojects!**

Complaint of the torture prison and the killer prison, the government report Meloni/Nordio Enough with the application of 41 bis to political prisoners

We support the democratic movement that today claims the abolition of 41 bis

Like the militant solidarity actions in Italy and in the world for Cosenza.

At the same time we who are communist proletarians, and nor radical or anarchists, let's say clear that thinking that the hunger strike can abolish In general, 41bis and questioned the impedimental life imprisonment and the repressive state policy and government is an illusory line in the end reformist, and loser.

Only the change of the power relations between proletariat, masses, proletarians and State, can affect this medium and long -term battle.

But this requires that revolutionaries and communists work for the party, The united front/today anti -capitalist proletarian assembly, the militant force.

Thousands of Americans have gone to the streets of various cities in the country against police violence. Photo: Reuters/Jeenah Moon

Over the past week, thousands of American reasons have risen in Protests against police violence against the black people. The acts occurred in several cities in the United States(USA)Shortly after the release of the video of the Murder of Tyre Nichols, a 29 -year -old worker who died after be beaten by the genocide police in the city of Memphis, Tennessee, on the day 07/01. During the recent protests, protesters blocked important roads and bridges, attacked vehicles and demanded the conviction of the police killers and the end of police violence.

Protests are a growth of a mobilization started by the family of Nichols on 1/14, which guaranteed the resignation and conviction of the police killers and the removal of two other reactionary military personnel involved in the Case and three firefighters who were slow to provide help.

Last week protests began on January 27, hours After the video filmed by the police camera of the police are released. Hundreds of pasta took the streets of Memphis and blocked the I-55 bridge, which Connects the states of Tennessee and Arkansas for about 3 hours. After out of the bridge, protesters blocked the city streets and demanded conviction of the police in front of the police station. Signs and posters with say **people demand: end with police terror!** and **justice for type Nichols** were erected during the protests.

Still on 01/27, Georgia's reactionary governor, Brian Kemp, fearful of a large mass survey in the country, decreed a state of emergency preventive for the state.

### **Protests spread across the country**

Police car was attacked during protest in New York. Photo: Fatih Aktas/Anadolu Agency

The next day, the protests spread throughout several cities in the country. In New York, protests took *time Square*, central area of the city, and Points like *Washington Square Park*. A car was destroyed by Protesters during the protest and at least three people were arrested. Screams of order like **without justice, without peace!** They were sung and posters against the Police violence were erected.

In Milwaukee, a protest occupied the *RED Arrow Park* and headed to the barracks general of the city's police department, where protesters demanded Justice for Tyre Nichols and the end of police violence across the country. Arturo Meboza, a protester, reported to the press monopoly *Milwaukee Journalism Sentinel* that police violence against the black people is constant: "I've lived here for a long time and what happened to Tyre Nichols, I've seen happen several times in Milwaukee".

In Washington, USA's capital, protesters gathered in front of the house White to condemn the murder of Tyre Nichols and the police violence in the It uses, especially against the black people of the country. The protests also occurred in the cities of Detroit, New Orleans, Baltimore, Boston, Los Angeles, Raleigh, are

Francisco and Charlotte. On 01/29, protesters gathered again in front of a Memphis police station.

**Murder of Tyre Nichols widens class character of imperialism Yankee**

Tyre Nichols and his mother, Rowvaughn Wells. Photo: Reproduction

Tyre Nichols was beaten on 01/07 by five police from Memphis. At occasion, Nichols was in his car and was stopped by the police under the accusation of "driving irresponsibly". Early in the approach, The police pointed the weapons to the young man, opened the car door and they ripped out. Under screams of incessant orders and often contradictory, Nichols was surrounded by the five police officers, who tried to immobilize and soon after, they attacked him with Pimenta. Desperate by brutality of the approach, Nichols managed to get rid of the police Assassins and run away, even after being hit by a taser .

After eight minutes of persecution, the young man was again overthrown by group of five police officers. On the floor, Nichols was the target of a beating that He continuously lasted for about three minutes. The police shot with kicks all over their body and head, raised the boy from the floor and they hit multiple times with cassettes. After the beating, Nichols took Around 15 minutes to be attended by a healthcare professional. O Video shows that there was a constant increase in the force employed by the police during the beating, even with the worker having not offered danger to reactionary military. Tyre Nichols worked for 9 months at Fedex, company correspondence from USA, had a 4 -year -old son and was, according to the family and friends, a "happy and kind" person. stating that a man had been taken to the hospital after "two clashes" During a police approach. On 01/10, Tyre Nichols died.

What followed the death of the young man was a mobilization by his family members, friends and supporters for justice to Tyre and access and Advertising of the video recorded by the police camera of the police. In day 14/01, a protest occurred in front of the Memphis police station for the video be made available. Two days later, a new protest occurred, this time at the city's civil rights museum.

On 01/20, Memphis police announced that the five killers had been dismissed. On 01/23, the family and lawyers inspected the video and They publicly denounced the brutality of the scenes. One day later, the police of Memphis announced that he had removed two more police officers who were involved in the investigation of the nichol process. One of the police maintained the remuneration During the period of removal, being, in practice, in "paid clearance". On 01/27, one day before the video was released, the police were indicted for second degree murder(quando um assassinato ocorre sem ser

premeditado), kidnapping, official oppression, beating and lack of conduct. On 01/27, the video was made available.

## People get up against police violence

Popular rebellion grows in USA as the number of murders by Police increases.

Photo: Laure Andrillon/ Reuters

Nichols' death occurred less than three years ago of George's murder Floyd, in 2020, the year in which thousands of American masses rose in the whole country to demand the end of the murder of the black and poor population for police. Since then, the country's police forces have raised the terror against the country's masses in an attempt to prevent a new Rebellion: Between 2020 and 2021, the number of deaths from USA police rose from 43 to 57.

However, as the police violence against the black people of the country, also rises the popular resistance against constant murders: in December 2020, [hundreds of people went to the streets of the country](#) after the murder of a 46 - year -old man for Police in Ohio; In April 2021, in Minnesota,(cidade vizinha à que George Floyd foi assassinado), the masses rose again after the murder of

20 -year -old Daunt Wright by the police ; in February 2022, another protest brought together thousands of people to condemn the murder of a young black in Minneapolis; the same occurred on two occasions in July 2022 after the murder of Jayland Walker, 25, in Ohio , and a Swat operation in New Mexico, which victimized Brett Rosenau, 15 years old .

Images: []

Ukraine an interimperialist war between the USA/NATO/EU - including Italy and Russian imperialism. The Zelensky government with the Nazis inside is a pawn of imperialism and therefore does not defend nor the right of self -determination of nations and less than ever the interests of the proletarians and popular masses e So we support all those who fight him on a proletarian part inside, as well as the similar forces in Russia that are against The invasion and the dominant class in Russia.

Zelenskyy has imposed personal sanctions from the Security Council e National defense to a series of religious figures of the UOC-MP [the Church Ukrainian Orthodox of the Patriarchate of Moscow]. The most striking penalties do not They concern both the clergy and the Oligorca Vadym Novynskyi.

Vadym Novynskyi, a deacon of the UOC-MP, is the richest Ukrainian eighth, with one luck of over one billion US dollars. Has accumulated its capital in Many

sectors: from gas production, profitable in a moment of crisis energy (la società è Enwell Energy), to participate of 25% in Metinvest [giant of steel and iron], which he shares with the largest exploiter of the country, Akhmetov.

The sanctions imposed by the President decree caused a series of negative consequences for the businessman: the blockade of goods, the impossibility to withdraw capital from Ukraine, the suspension of all operations commercial, the cessation of all licenses for the use of the subsoil, the ban on privatizing state properties and even the acquisition of the properties of land plots. The goods of Novynskyi will be saved only thanks to the early transfer of theirs management to the child and some legal peculiarities, but only until the state authorities will not begin to investigate his relatives and his manager. Among other things, the sanctioned oligarch has successfully transferred the goods of his holding at a Cypriot trust 6 days ago, which would have been impossible if the president had hurried to sign his order. But We are not "daring", and therefore we know that the president defends always and only the interests of the people and that there may not be his own intrigues for business reasons. But because the capitalist Ukrainian state punishes His opponer, who is an oligarch-monopolist?

The reasons have already been indicated in our numerous materials: **the pressure of the debt forces [the government] to transfer the profits to the wallets of the Western imperialists through the mediation of state enterprises**. IS was this economic interest, and not the fight against Russian spies in the UOC-MP, to lead to the repression of this religious community, beyond that to sanctions against individuals. These events are also a signal For Mr. Akhmetov, because the example of his commercial partner/competitor clearly shows what our oligarchs awaits in case of disobedience, that is, if they do not accept they have a secondary role with respect to western multinationals and their will, which is imposed through The legal reforms of "European integration".

And the working class? We must perhaps support the defeat of the hated Novinsky speculator? Or it is better to take over with the weakened oligarchy for form a "large anticolonialist democratic front"? Our answer to These proposals are resolved: "No!".

After all, all the parties in conflict only fight to increase it exploitation of common salaries, to profit from the war, which has caused a huge increase in the price of raw materials, which are Exporting from the country with unprecedented enthusiasm. And these forces are even solidarity on the question of sending us to the front to die for "the democracy, freedom and connection with the EU ". A democratic front Effective and large antimperialist(dal momento che il 99% degli ucraini non appartiene ai circoli più stretti dell'oligarchia finanziaria)it's possible Only on condition that, under the flag and the slogans of internationalism proletarian and the establishment of a direct government of the working class, the waged slaves of the capital Formino Militanti, organizations For the defense of their rights, Marxist circles, etc. Such a front can be guided only by the conscious part of the proletariat, that is, by a party militant and determined proletarian. This is exactly the type of party that we want!

## **Text 2 Message from the workers of the Marxist Ukraine- Leninist at the Rome event of 3 December**

Dear Italian companions,

We, the Marxist-Leninist organization in front of Ukraine workers, We write this letter to the Italian workers and communists in relation Ukrainian workers and Russian workers kill each other for their profits of the oligarchs that the restoration of capitalism has generated. This situation [of war] is used by the leaders to strengthen the apparatus repressive and introduce neoliberal antioperative laws, attributing the cause of everything at the "war time". However, the war did not hit only i Eastern Slavic peoples, who once had participated in the revolution of October and fought side by side against the fascist yoke. In Europe yes makes the pressure of the sanctions felt, which many of you perhaps already have tried in person. While Russia wants to make one with military means redistribution of influenza spheres, the western imperialists do not only do not want to lose their influence in Ukraine, but they also succeed in get the maximum profit from the supply of weapons. War opens new markets to the bourgeoisie. If the Ukrainian government wins, the imperialists Westerners will strengthen their position in our country; If the Russian government, Russia will get new markets. And to every simple worker It will be up to tolerating any humiliation and sanction. It doesn't matter who it is: Ukrainian, Russian or Italian. Not for nothing the wife of our president, Elena Zelenskaya, said the Ukrainians are ready to be without light and Heating for

two or even three years. Regardless of the outcome of the events, the bourgeois ruling class will receive the maximum benefit, while the working class of all countries will feel even more the weight of alienation and exploitation. Even more the proletarians will begin to hear the inequality on their skin, and anyone who does not agree will come repressed by force.

This shows us once again that the workers of the different countries have Many more things in common between them than with their capitalists.

That's why it is very important to fight against the escalation of conflicts from All fronts of these conflicts. European communists must fight against the introduction of NATO troops and the supply of weapons, while at at the same time the Russian Communists must fight against the mobilization of people at the front, develop feelings against war, and we communists Ukrainians we must develop the class consciousness between the masses. Supply of weapons, the introduction of the NATO troops will lead only to further Blood spreads and the strengthening of the imperialist block. The crisis yes it will develop even more. Ukrainian, Russian and European workers do they will drown each other in the blood, and even more the mothers will not be they will be able to wait for the return of their children from a war that will not bring Nothing good. With the strengthening of the imperialists, the wars do not they will end. Capital needs to increase, and imperialist countries they are always ready to commit any crime that brings a profit of the 300%, right? This will only start the next wars.

However, there is one key to putting an end to this cycle [of war and exploitation]: the socialism, in which every human being is brother of the other human being. We greatly appreciate the fact that the Italian companions understand the meaning of this conflict and how important the international unit of workers. Italian communists, trade union activists, workers and students Marxists, we wish you patience and determination in the fight against i neo - fascists recently risen to power. Clearly distinguish between the social scorests who will always support their government or that of someone else, for a doubt gain, betraying the interests of workers. The importance of the struggle against socialscioviniism is the key of the success of the revolutionary movement. It is necessary to explain to the workers Because social scores are the enemies of the workers. It is also important Explain to workers that neo -fascists are not their friends.

The fascists love to launch the left populists of the left, gaining like this the support of the people. This is how our extremists were deceived right, and yours act in the same way. Meloni's interview she was very revealing, when she said she was very worried about the fact that French colonialism still exists, ignoring the presence of Italian multinationals in the countries of the suburbs. Our old left generation, which existed before 2013-2014, failed to cope with this task. Many have openly supported the LDPR or the Maidan's coup, many have underestimated the far -right forces because of their marginality. However, we have the opportunity to fix Everything, just like Italians have a great chance of strengthening the Communist movement.

In conclusion, I would like to recall a classic quote that will never lose its relevance until the workers fight against this system of \_ The translations in Italian are taken from **Red sting** \_

## **1**

It will never be late enough, will never be excessive or sufficient, the effort in denounce - to the four winds - the deletion and tergiversation strategies conveyed by the media and advertising(públicos e/ou privados)from the bourgeois press; as well as through their ideologues and 'Institutes of teaching and research ', or through their agencies and programs of financing to distribute research and training scholarships, advanced studies, curriculum packages, credit lines to contemplate the always new reinterpretations about the historical past and its unfolding to the reading of the present. Sometimes, such a mechanism imposes itself on insidious and sublime form. Other, under the decrees Official ordinances, policies entered by shift governments. Is Operate arrangements, adjustments, corrections and conversions, frames to the conclusion. One is populating in layers and layers of toxic smoke the unstoppable primacy of the facts.

## **two**

Jorge Amado, in his soap opera The Death and the Death of Quincas Berro D'Agua(1959), offers us needle and line to this argument - albeit from the prism of the Literary fabulation. Is that one time, one day like any other, perhaps that after a homerical boring of a bad cachaça, perhaps that the accumulation of the mishaps and unruly, behold, the patriarch of the dirty and Ratches of the Port Zone, Mretricity and Ladeira do Tabuão, no longer He raised the body of his nail bed. It was hopelessly dead. Without Prior announcement, without the early verdict of a diagnosis that condemned it. This is simply dead. Who knows if a fulminating or a sudden harm. To the companions of all hours, Curió, Black Pastinha, Cabo Martim, Foot of Time, Master Manuel, Quiteria of the wide eye, the day out of Scare, suspension, drunkenness and evocation. However, this was just one of the halves of the death of Quincas. The other half would be that of the adjustment, the arrangement, the corrections in the color palette, that of its gradual mixture in the intensity and tone control. Is that the family of yore(a que Quincas abandonara há tempos por não lhe suportar as injunções de classe...)He had advanced and took to himself the reins of the situation. It would be necessary to clean the dead under the pretext of care for memory; It would be essential to leave it the expertise of the skillful hands of the funeral farm experts; arrange a priest to the pasture of his soul under perdition; It would be necessary to wear it in casimira suit, sock and thin -toe shoes, a scarf in the

upper pocket, the cushion that encourages the neck's discomfort; the appared of nails, the haircut, the concealer to the dark circles, the base of the face; it would be labels and good manners to perfum it to the arrangement of field lilies, the Preparation of the campaign, the crowns of flowers, the phrase written by the tomb. In one word, it was necessary and urgent to end once and for all Screaming of water, ending it from end to head and resurfaced, even though stillborn, Joaquim Soares da Cunha, that good, shy and obedient husband and father. As in the terms of Jorge Amado:

It didn't even seem like the same dead(<https://anovademocracia.com.br...>)It was like finally tamed Quincas, as if the reins had again, those that he She had ripped off a strong hand from Otacilia [his wife], laughing in her face. THE Shadow of a smile emerged on Vanda's lips [her daughter].(<https://anovademocracia.com.br...>)Felt avenged from everything that made the family suffer, especially own and Otacily. That humiliation of years and years. Ten years took Joaquim This absurd life. King of the Bahia Tramps ... I wish Vanda at this time of Intimate satisfaction, of pure victory, being generous and good. Forget the last ten years, as if the competent men of the funeral home had purified them with the same wet rag in soap with which they removed the dirt from the body of Quincas [1].

Photo: Reproduction

In his book Rodolfo Walsh - Los Años Montoneros, Hugo Montero and Ignacio Portela draw attention to a certain cleaning and adequacy operation for much of the Argentine essay literature about its recent past and, more specifically, about Rodolfo Walsh's 'path' closed on March 25, 1977.

About this fateful day we evoke some data: it had passed exactly a year(e um dia)the coup d'état that inaugurated the last of the military dictatorships in the Argentina, euphemistically self-enhanced national reorganization process; Rodolfo Walsh, 2nd Officer of the Military Political Organization Montoneros, Head of Intelligence sector, active activist of its information structure, He had worked intensively in the construction of a bomb letter in which publicly denounced the crimes of life injury planned by its policy and incarceration in concentration and extermination camps, mass murders and forced disappearance of thousands of workers, political militants, Leaders and union and student staff. The letter, the trip of train from the Bonaerense periphery to Estación Constitución, with a folder containing two dozen mimeographed copies, packaged in envelopes closed with several destination and left in

mailboxes on the streets of the Argentine capital. Walsh would still have a meeting with a companion from Organization, however, this meeting had not been given. Is that the militant had been arrested, And under torture, he had denounced a local time and the 'with whom' of the meeting. It was Walsh, a large fish, hyper sought after, living in clandestinity clenched. To the schools of the school's tasks group Armada Mechanics(ESMA)It would be the opportunity arranged to the top hat. From among the sicaries was Alfredo Astiz.

Rodolfo Walsh had resisted bravely making use of his Walter PPK pistol, 22 caliber on the other side, endless gust and spill it. Walsh It would not be one of the kidnapped, would not be one of the captured. However it will not take with the cyanide tablet that saved so many of the horror of the denunciation under The most atrocious of physical and mental tortures. Nor did it carry the hand grenade that, according to his companion Lilia Ferreyra, he used to leave reserved for the last minute - in which a meeting with the jokes if we armed a Inviolable siege. To that March 25, 1977 had been the last time the Rodolfo Walsh. Your body would never be found. There were testimonials that They attest to the ultimate courage of this Montonero Walsh.

Despite this, and in the course of the historical fact, let's see what points out the testimony of Hugo Montero and Ignacio Portela:

Evidently that there is a certain factor that bothers the progressive perspective of the Argentine history. Particularly, that of some chroniclers of the recent past who are concerned with rescuing the transcendent literary work, the rigorous craft journalistic and the unalterable intellectual commitment, but that is embarrassed, doubt and choose euphemisms and ambiguities to account for the last steps of Walsh in the guerrilla. Like a hedgehog that pierces everyone who touches the these violent times, the combatant role of Rodolfo Walsh restless, molest, bother. Is that something of all this does not fit the reconstruction politically correct from the chroniclers of the past, those who want to entangle the Walsh, at most, in the parameters of commitment and audacity, but that, of skilled form, avoid defining it as guerrilla. [2]

Species of operation cleaning in the fashion of the house in which the good manners strives. Make the dead man's dead or heroic death rumors. Dismiss gives him the reasons in which he was entered. And it is made it chant like in a vibrate a Joaquim Soares da Cunha there where what was all waved Boosts to scream for water. And Norberto Freyre, teacher retired English, name password

of the clandestinity of the 'Walsh path', there where the canon is supported by the great writer Rodolfo Walsh, to sit at the table with Jorge Luis Borges - who, on the occasion, had greeted the genocide Jorge Rafael Videla with your bird, Caesar! And cleaning and rescue is made at one time. However, it is not a question of rescuing the historical fact to the contradictions and the conflicts that made him inevitable. First, it is about chasing it to Eyes of later - as one who enters the floor incaining traces and traces. Will define the will of submitting what was, in its severity, in its weighing, in its intensity and strength, to the moral and judicial sieve that season History to the sweet flute of the narratives.

To make use of the poetic word, it would risk saying that despite this deletion, of this contuman tergiversation, of this malicious laundry fabulation, so many and so many times will escape a balloon a halo where will shout us the unavoidable spectrum of the fact. This one that accumulates inheritance of the people who fight.

Therefore the complaint complains will never be enough. This is what suggests to us Word needs Rodolfo Walsh:

Our ruling classes have always sought to make workers not Have history, do not have doctrine, do not have heroes and martyrs. Each fight should start over, amputated from previous fights: the collective experience Loses, the lessons are forgotten. The story in this way becomes property private whose owners are the owners of all things.

Proletarians of all countries, unite!

On the 80th anniversary of the Victoria de Stalingrad

In its 'political declaration and principles' the International Communist League, just z correctly declared: "We assume the position of President Mao on The role of Comrade Stalin that he has been a great Marxist. Also, have in mind that it has been he who brilliantly defined Leninism. The Communists today have the task of assuming the defense of their role in the second World War, in the Communist International, particularly in its VII World Congress. "The latter will be central to this article that celebrates the Tremendous victory in the battle of Stalingrad.

The weight and significance of this great and heroic battle were correctly established by President Mao Tse-Tung: "This battle is not just the point of inflection of the Soviet-German war, or even of the current war anti -fascist World, is the turning point in the history of the entire humanity."

The war fought by the USSR, as it was absolutely defined Correct, it was a great homeland war, a fair war of defense. In addition to the glorious and heroic defense, in which the USSR under the direction of the Comrade Stalin had to apply the burned land to defend his territory, to defend the socialist homeland,

which cost more than 25 Millions of lives, the anti -imperialist struggle was greatly developed in the oppressed nations during this period.

President Mao Tse-Tung thought fairly and correctly: „The sacred war of resistance of the Soviet Union against fascist aggression is not only in self - defense, but in defense of all nations fighting for free yourself from fascist slavery. For communists around the world task now consists of mobilizing the peoples of all countries and Organize an international united front to fight fascism and defend the Soviet Union, defend China and defend freedom and Independence of all nations. ”

The peoples of the world rose for the fair cause and spilled their beautiful blood not only in the war against the axis, but also against their respective imperialist masters, which initiated the great anti -colonial struggle in the Second half of the 20th century. TH

In the winter of 1941/42, the Soviet Union, under the direction and command From Comrade Stalin, he had already successfully rejected a fierce Nazi-German attack On the western part of the country, with the aim of taking the capital, Moscow. The Nazi Wehrmacht, unable to understand that every attempt to crush The Bolshevik steel tempered by Great Lenin and Stalin was sentenced to Failure, set up an offensive on southern Russia in the summer of 1942 . They put their sights in Stalingrad, because the city served as a center Industrial in Russia, producing, among other important goods, artillery For the country's troops. The Volga River, which crosses the city, was also an important sea route that connected the western part of the country with its distant oriental regions. The Nazis wanted the Wehrmacht to occupy Stalingrad, seeing its value for propaganda purposes, since it carried the Stalin name. For similar moral reasons there was a special need to defend it. The 6th Army of the Wehrmacht began its assault on August 1942.

Comrade Stalin, as a supreme command, personally dictated order 227, to end of July 1942, in order to raise the level of sacrifices and the Armed forces struggle at the level of the people:

„The enemy launches new forces in front regardless of the great losses and penetrates deeply into the Soviet Union, seizing new regions, destroying our cities and villages, and violating, looting and killing the Soviet population. It fights in the Voronej region, nearby of the gift, in the south, and at the gates of

the northern Caucasus. The invaders Germans penetrate to Stalingrad, at the Volga and want at all costs to catch Kuban and the Northern Caucasus, with their oil and cereals. [...] Part of the South Front troops, following panic sowers, have abandoned Rostov and Novochercassk without opposing hard resistance and without orders from Moscow, covering its banners with shame.

The population of our country, who loves and respects the Red Army, begins to discourage in it, and lose faith in the Red Army, and many curse the Red Army for leaving our town under the yoke of the oppressors Calman speaking that we can retire more to the east, since we have A lot of territory, a lot of land, a lot of population and that there will always be a lot of bread for us. They want to justify the infamous behavior in the front. But Such words is falsehood, useful only for our enemies.

Each commander, soldier of the Red Army and political commissioner must Understand that our means are not unlimited. The territory of the State Soviet is not a desert, but people: workers, peasants, intellectuals, our fathers, mothers, wives, brothers, children. He territory of the USSR that the enemy has captured and intends to capture is bread and other products for the army, metal and fuel for the industry, factories, plants that supply weapons and ammunition to the army, Railways. After the loss of Ukraine, Belarus, the republics Baltic, Donetsk and other areas have much less territory, much less People, bread, metal, plants and factories. We have lost more than 70 million people, more than 800 million pounds of bread a year and more than 10 million tons of metal a year. [...] Back more - means wasting us ourselves and waste our homeland at the same time. Therefore, It is necessary to eliminate the speech that we have the ability to retreat endless, that we have a lot of territory, that our country is great and rich, that There is a large population, and that bread will always be abundant. Such speech is false and parasitic, weakens and benefits the enemy, if we do not stop We will go without bread, without fuel, without metal, without subjects premiums, without factories and plants, without railways. This leads us to Conclusion, it's time to finish back. Not a step back![...] Is impossible to tolerate that the commanders and commissioners allow the units Leave their positions. It is impossible to tolerate that the commanders and commissioners admit that some panic propagators determined situation in the combat field and took other soldiers in departure and They opened the enemy against the enemy. The propagadores must be exterminated in situ of panic and cowards.

Hereafter, the solid law of discipline for each commander, soldier of the Red Army and Commissioner must be the requirement: not a single step back without Superior command order. Companies of Companies, Battalions, regiments and divisions, as well as the corresponding commissioners, which They go back without orders from the upper controls, they are traitors to the homeland. These are the orders of our homeland. Execute this order - means defend our land, save the homeland, exterminate and conquer the hated enemy."

Our heroic red soldiers initially stop the advances of The Wehrmacht during a series of skirmishes north of Stalingrad, offering more than 200,000 lives, and contained Nazi hordes successfully. It was decided not to flee but resist and, therefore, not evacuate the more than 400,000 people of the city. Men and women, even the youngest, Stalingrad joined war -related activities: Combat, construction, espionage, supply, etc. Even when Stalingrad walls burst by the constant bombings of the Luftwaffe Or the strong artillery attacks, the people remained firm.

Operation Uranus, directed by Georgy Zhukov and Aleksandr Vasilevsky, He organized Russian troops in the mountains north and west of the city. From there they launched a counterattack. Paying the necessary price, the army Red was able to surround the city at the end of November 1942, catching The almost 300,000 German and axis soldiers(principalmente italianos y rumanos), drowning the enemy forces of vital supplies and essentially surrounding them in an increasingly tight rope.

Near Stalingrad, the Red Army won important battles, even in Rostov del Don, about 250 kilometers from Stalingrad. Thus, the forces enemies were thinned and stretched on that part of the front and the operation Little Saturn in western Stalingrad succeeded. With men, not with weapons, demonstrating once again than the Marxist principle about what is most important was correct, they strangled the invaders until death and They fought the greatest war battle in cities ever seen. It was not a war Only of street by street, neither from home by house or basement for basement, nor Even from floor on the floor, but room in room, generating the largest Heroism, chapters that have shuddered the world.

On the importance of the battle of Stalingrad for the entire course of the Guerra, President Mao declared: „... In this current war the attack on Stalingrad is the expression of the last desperate struggle of his own fascism. Also at this

decisive moment in history, many people from Fascism and have not known how to discern their essence. For forty -eight days He fought an fierce battle unprecedented in the history of mankind: Since August 23, when all German forces crossed the curve of the Don River and initiated the total attack against Stalingrad, until 15 of September, when some German units broke into the district industrial of the northwestern part of the city, and until October 9, When the Soviet Information Office announced that the Red Army had Broken the German fence line in that district. Finally, this battle was won by Soviet forces. During those forty -eight days, News from each setback or triumph of that city seized hearts of countless millions of people, sometimes causing them anxiety, sometimes causing euphoria. This battle is not just the turning point of the Soviet-German war, or even the current anti-fascist World War, It is the turning point in the history of all mankind. Throughout These forty -eight days, the peoples of the world observed stalingrad with an even greater concern of what Moscow observed last October. [...] After the battle for the Defense of Stalingrad, the situation will be totally different from last year. On the one hand, the Soviet Union will launch a Second large -scale winter counteroffensive, Great Britain and states United can no longer delay the opening of the second front( aunque todavía no se puede predecir la fecha exacta), and the peoples of Europe will be prepared To get up in response. On the other hand, Germany and its accomplices Europeans will no longer have strength to mount large -scale offensives, and Hitler You will have no alternative than changing your entire political line towards the Strategic defensive. "

We all know, and we must remember that the fascist offensive directed by the Nazis, to which the Italian and Spanish fascists contributed and others like The Romanians, the Hungarian and also the Panda of Flag Rats of Ukraine, and that used all the economic power of the Europe submitted, launched to the Invasion to millions of millions, to the flower of the German army, to the 75% of its Air Force. But comrade Stalin had wisely handled the Diplomacy with great subtlety.

It is worth highlighting the sagacity and penetration of the intelligence service Soviet. What an intelligence service. Knew the exact day of the Nazi invasion.

The Soviet Union applied a strategic defense together with the burned earth, that left them more than destroyed land, mud, ashes and the more partisans brave, determined and resolved behind the enemy lines. They had the boldness, the value of flying monumental works such as the famous dam that unites the

Volga with the gift that cost so many years of effort. The Germans never They dreamed, they thought this work would not be flown, because it was too much Important and had cost a lot.

The dictatorship of the proletariat was at stake, the revolution was at stake, We cannot stop to think, nor can we simply make ourselves hinder, like President Mao said for the defense of centimeters of land. HE They crashed at the gates of Leningrad, at the gates of Moscow and Stalingrad; but not only that. The burned land was carried out, but the guerrillas and even simple individual men and women with their rifles, His ammunition and vodka waited for the enemy. To annihilate one of those Brave heroes and heroines, the Germans lost an average of 10 men.

The fascist offensive was a very high quality military plan, thus, the most High and enlightened German military chiefs elaborated this plan and the school German has a war tradition often proven: in three months They planned to conquer the USSR.

The forecast of Comrade Stalin, had already taken measures since the 30s When the great transformation of the field and industry occurred, already They had transferred factories beyond the urales, even providing for the possibility of reaching Moscow, because it is true, everything was

already underway in the end they could not defend Moscow, although that was the decision made, it was already planned to transfer the address and the center to the Urales; So the first thing that was done was to take provisions for the Lenin's transfer, because he could not fall into the dirty hands of the miserable Children of hell, I couldn't fall.

But the order, after they had penetrated to the aforementioned doors, The order was not to go back anymore!It is very memorable, and we must always remember how on November 7, anniversary of the revolution, they had nowhere celebrate it and it was considered impossible to carry it out; Comrade Stalin He said: "To the station", "but there is no platform, there are no seats", the Comrade Stalin got on a box and spoke to celebrate the revolution, saying: "How many of us were there when we took power, what After the October revolution? We will crush them and annihilate the Beast in his own den, in Berlin. "

These are things to remember, to appreciate Comrade Stalin you have to look to World War II. We all know how the great resistance, the rupture of the German

lines, the Stalingrad site, where German commanders, Hitler himself, ordered them not to retire before those lower subhumans. Those lower, the barbarians, the Mongols, They hunt them as rats and had to surrender.

It is always good to reiterate it: Stalin, skilled and wise war manager, It always took into account the moral element and made all the Nazis parade defeated and rendered and threw their flags, their eagles, their swastikas to the Lenin's mausoleum feet; Not only a great military defeat, but a

Great moral defeat! Nazi arrogance had been sunk in the mud and trampled, it was the greatest moral blow I had ever received, and that was the Beginning of the Nazi Wehrmacht.

In February 1943, Comrade Stalin analyzed: „Three months ago the troops of the Red Army began their offensive in the access to Stalingrad. Since Then the initiative in military operations has remained in our hands and rhythm and attack of the offensive operations of the Red Army have not weakened. Today, in hard winter conditions, the Red Army advances on a 1,500 kilometers front and gets successes practically everywhere. In the north, near Leningrad, on the front Central, in the accesses to Kharkov, in the Donets basin, in Rostov, in the Real and Black Sea Sea shores, the Red Army advises coup after Hitler troops blow. In three months the Red Army has released from enemy the territory of the regions of Voronezh and Stalingrad, the Autonomous Republics of Cheheno-Ingushetia, northern Osetia, Kabardino- Balakaria and Kalmyk, the territories of Stavropol and Krasnodar, the regions Cherkess autonomous(Circasia), Karachaisu and Adygeisu and almost all of The regions of Rostov, Kharkov and Kursk.

[...] Only in the winter of 1942-43, the Germans lost more than 7,000 tanks, 4,000 airplanes, 17,000 cannons [...] since the beginning of the war, has Fighting about 9,000,000 officers and German men fascists, of which no less than 4,000,000 died in the field of battle.

[...] First, the weakness of the German army is the shortage of labor reserves and, consequently, it is not known which sources These losses will replace. [...] The Red Army has become an army experienced. [...] Millions of red army men have become Masters of their weapons [...]

It cannot be considered a coincidence that the Red Army command not only release the enemy's Soviet floor, but not allow the enemy He leaves our soil

alive, carrying out such important operations as the siege and annihilation of enemy armies that can well serve as Examples of military art. This is, without a doubt, a sign of the maturity of Our commanders.

There is no doubt that only the correct strategy of the Red Army command, and The flexible tactic of our commanders who execute it could be as a result as an outstanding fact as the fence and annihilation in Stalingrad of a huge army chosen by Germans, which had 330,000 men. "

Our Brazilian comrades pointed out: the victory against fascism in the World War II is one of the great historical events of Proletarian world revolution process, the imperialist field was found deeply beaten, three important imperialist powers were defeated - Germany, Japan and Italy - what has to be seriously studied for its fair and correct understanding, it has to be highlighted and celebrated.

The Communist Party of China said, regarding the evaluation of this Historical experience:

„First, the history of the anti -fascist war shows that the Socialist system has enormous vitality that can resist the most Severe and that a state of dictatorship of the proletariat is invincible.

Secondly, the history of anti -fascist war demonstrates that Imperialism is the source of all wars of modern times, that the aggressive nature of imperialism will not change and that, therefore, to Defend world peace is necessary to persist in the fight against imperialism.

Third, the history of anti -fascist war demonstrates that war of the peoples is safe to achieve victory, which is completely possible to defeat the imperialist aggressors, that imperialism is a paper tiger, apparently strong, but really weak, and that the pump Atomic is also a paper tigress and it is the people and not the weapons, of Fourth, the history of the anti -fascist war shows that, to defeat the imperialist aggressor, it is imperative to trust the unity of the revolutionary forces of the peoples of all countries, attract our side to all the forces that can be won, form the single front broader international possible and concentrate our blows on the enemy main of the peoples of the world. "

Under the weapons of the glorious red army, Nazi Germany was shattered, the Socialism and the dictatorship of the proletariat arose even in the Germany of the This. The red flag of the Communist Party and the USSR waving on the

overshadowed and destroyed German Reichstag is an undeniable great moment of international proletariat that symbolizes all the heroic and glorious epic of the fight against fascism in defense of the USSR and for the development of the World proletarian revolution. The phrase pronounced by comrade Dimitrov when he embarked on the direction of USSR after the great victory in the Nazi court in Leipzig was fulfilled as follows: "We will Soviet to Germany!"

Manifestation of drivers and application delivery on 01/30 in Salvador(BA).

Photo: Reproduction/ good morning ba

During the month of January, application delivery people throughout Brazil held strikes and demonstrations in the capitals of the states of São Paulo, Rio Janeiro, Bahia, Acre, Rio Grande do Sul, Piauí, among others. You workers are demanding the most elementary rights to exercise profession. In cities in the state of São Paulo, tired of overexploitation, the deliveries even declared strike indefinitely until they had their Requirements met by monopoly *Ifood* . In Salvador(BA)the delivery They blocked the main roads of the city on several days.

Among the claims of all these workers were: increased rate minimum paid for delivery of \$ 6 to \$ 8; end of double or triple deliveries, When the delivery man performs two or more races being paid only by one; insurance in case of an accident or death, since the coverage offered by the *Ifood* do not work in practice; and end of logistics operators(OL's), what function as intermediaries between delivery and applications and are responsible for the outsourcing of workers.

Application deliveries have struggled for these basic rights for years. You delivery monopolies, in turn, seek to prevent in all ways that workers conquer these rights, since, in the face of another crisis on a world scale, monopolies dependent on foreign companies(imperialistas), like *Ifood* and *UBER* , seek to achieve profits each time larger to escape the crisis.

The situation of these workers is aggravated by the crisis of capitalism Brazilian bureaucratic, which through the different reactionary governments of All spheres throws the consequences on the back of the popular mass of the serious

situation in which the country is sunk. In 2022, a Survey of *Fairwork* Brazil showed that platform workers Digital earn an average of \$ 5.50 per hour and less than one minimum wage in the month.

Government after government promises to regulate the profession. None of them comply to make the relationship between delivery and monopoly as a de facto employment bond. The Government of Ultrareactionary Jair Bolsonaro even promised to demand from the platforms contribution to the Social Security. Opportunist Minister Luiz Inacio told companies that "They were not scared", because the proposal would only be to bring "social protection" to worker. In any case, the situation only worsens day after day.

With the current strike and protests, the deliveries demarcate their independence, classism and combativity against the opportunistic position to promote the Immobilism in exchange for meetings and crumbs.

**Check below how the delivery manifestations were country:**

**SP: Deliveners perform four days strike**

On 01/25, in São Paulo(capital), hundreds of deliveries performed a strike all day. The protesters gathered in the parking lot of the Shopping Metro Itaquera, on José Pinheiro Borges Avenue. They claimed receive for each delivery and better working conditions.

Geronimo Lima Gusmão, 32, leadership of the East Zone delivery Paulo, said that "there is a huge gulf between the government, the state and the motorcycles of self-employed applications, *Ifood* is giving four orders to People deliver and we will only receive [payment for] two. Only customers They paid for four deliveries. And it was not like that [earlier]. We received all deliveries. A year ago it changed. "

Geronimo has been working for three years in the profession and has suffered five accidents in work schedule. "We are exhausted, we can't take it anymore," said the Worker on the lack of rights to local radio Itatiaia.

In cities in the interior of the state, as in Diadema, the deliveries continued on strike until 01/29. In Indaiatuba, the workers said that will remain on strike indefinitely, until the motoboys are served by *Ifood*.

In the city of Santa Bárbara d'Oeste, the deliveries concentrated in front to Tivoli Shopping on 01/25. Delivery Rodrigo Cucatti, 38, said to the local newspaper

every day: "Today is being a warning. If they do not help Guys, let's extend to Friday, Saturday and Sunday. We want an improvement and an answer from *Ifood*. We are tired of taking two deliveries and *Ifood* Pay only one. Two deliveries that was supposed to be \$ 12, iFood pays \$ 6 for us. It's been over three years since they have a promotion. "

Delivery strike in Santa Barbara d'Oeste on 01/25. Photo: Reproduction/ All day

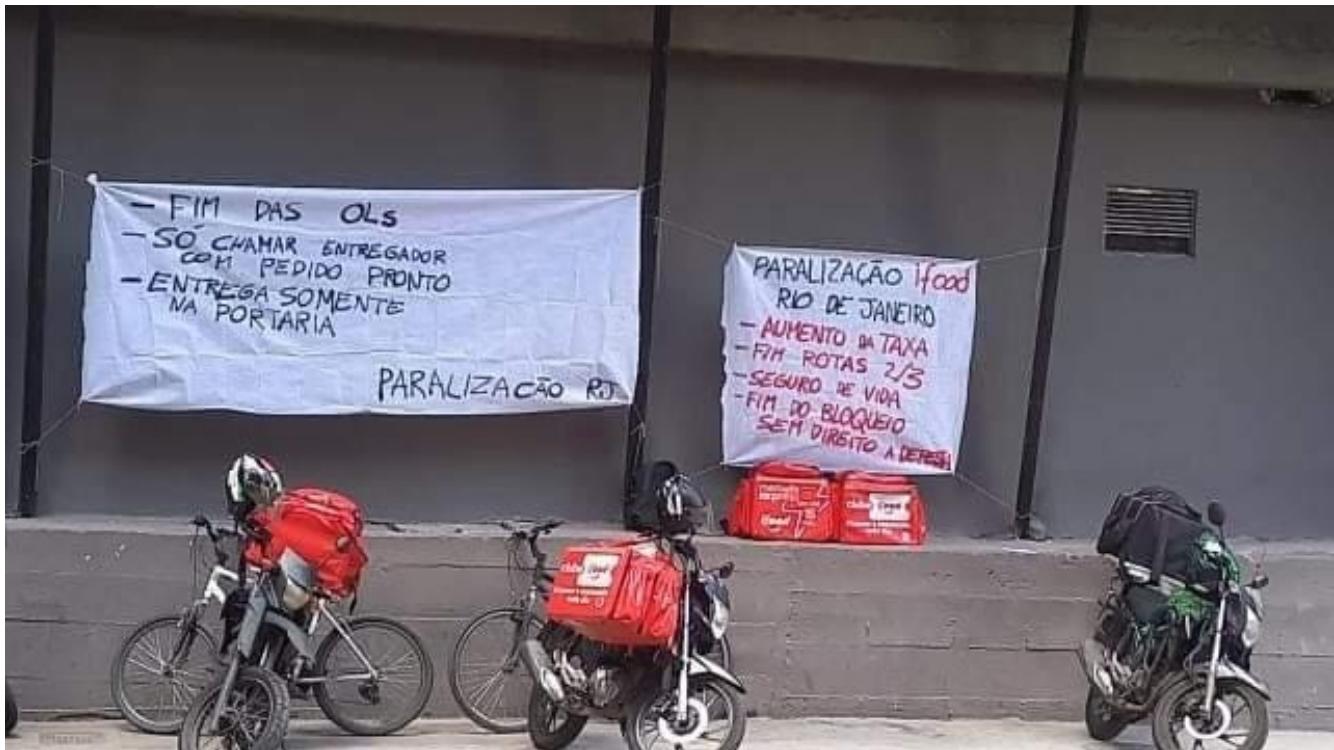

#### RJ: Protests face police intimidation

Drivers and delivery by application perform demonstration in Niterói(RJ). Photo: Disclosure/2R major demonstration in front of the city, requiring the guarantee that 99 Moto and Uber Moto will continue to work in the city. Workers too They claim more parking and cyclopoints, as well as other claims. On 06/01, the city had informed that it would notify Uber to Suspend the passenger transport service in motorcycles in the city.

The president of the two wheels movement, known as Leo "Familia", demarcated that "the class deserves to be treated with more consideration" and that were the application workers who "raised the city and made the currency turn" during the COVID-19 pandemic.

The Niterói Municipal Guard, in turn, tried to intimidate the workers, with an agent even turning off the motorcycle of one of the protesters. The troop of Military Police shock was also present with *SPray de Pimenta*. To the Attempts to contain the workers' protest were useless.

Application delivery people perform demonstration in the northern zone of Rio de Janeiro. Photo: Reproduction/ Great Tijuca

On the same day, application delivery of Rio de Janeiro performed a Manifestation in the Greater Tijuca region, North Zone. Protesters required better working conditions, such as life insurance, increased rate of delivery, and end of account blockages in applications without the right to defense, just as they claimed the end of the companies contract with the OL's.

6th BPM police officers(Tijuca)and Tijuca agents present intimidated the Deliverers all the way, following them.

### **BA: Blocks of avenues and protests in front of Salvador City Hall**

In Bahia, drivers and application delivery people conducted protests in the Days 27 and 01/30 in the capital, Salvador. On the 27th, a blockade of the Avenida Tancredo Neves and, on the 30th, on the call to Paralela Avenue. Us Two days the demonstration went to the city hall. The delivery claimed the end of the seizures of motorcycles by the city during the Services provision for Uber and 99 motorcycle.

### **Deliveries block bridge in Acre and go on strike in Rio Grande do South**

Manifestation of drivers and application delivery in Cruzeiro do Sul(AC). Photo: Reproduction/ o Juruá in time

On 26 and 25/01, in the states of Acre and Rio Grande do Sul, cities of Cruzeiro do Sul and Porto Alegre, deliveries performed strikes and protests. In Southern cruise(AC), drivers and application delivery Union bridge as part of national manifestations. In Porto Alegre, Capital of RS, strikers on strike held a demonstration near the downtown.

### **PI: protest against improper increase in fuels**

At the beginning of January, drivers and delivery by application held a demonstration on the 5th, in the east of Teresina, against the improper increase in the price of fuel by local gas stations. THE Act began in Praça de Fátima and went to the headquarters of the Public Prosecution Service from the state of Piauí(MP-PI). Participants promoted a horns during the route through the avenues of Our Lady of Fatima and Lindolfo Monteiro. Second entities representing delivery and passenger drivers for application, there are about 20 thousand people linked to these functions only in Teresina.

## Oggi il dibattito su ergastolo e caso Cospito

MARINA GRECO

**D**a oltre 100 giorni in sciopero della fame, l'anarchico Alfredo Cospito, detenuto in regime di 41 bis nel carcere di Sassari, è destinatario di iniziative e incontri in tutta Italia. A Lecce, oggi pomeriggio, nell'incontro "Morire di carcere" si partirà dal caso Cospito per parlare di detenzione, ergastolo e 41bis. L'appuntamento è alle 19 presso la Casa del Popolo "Silvio Picci", in via

*Lunedì 'an assembly in Lecce organized by the Casa del Popolo was held. with the intervention of the lawyer Gianluca Vitale, legele of the college of defense of the defendants of the "Scripta Manent" trial and the companion of Taranto, Margherita Calderazzi, for proletarian red rescue. After the presentation And these two interventions were questions to the lawyer. Vital, others interventions, debate .*

### **We report here the intervention of Taranto's partner**

They are from the Slai Cobas SC and the Slai Cobas supports and it is part of an organism created some time ago, the proletarian red rescue that carries on one battle of solidarity and support for struggles against the repression of State, in particular towards political prisoners.

Unfortunately, they have become a little "expert" of 41bis, because for a while of years, since 2015 we have started to make a continuous campaign and gradually extended to Nadia Lioce which is one of the few political prisoners in 41bis, Among other things, the only woman who has been in 41bis for 18 years. We made a series of initiatives, principals to L'Aquila where Nadia Lioce, events, is held, We brought the Nadia Lioce issue in national events, in particular those of women on November 25 in Rome, etc.; for this 31 companions and companions were reported for having made these principals e initiatives and the process is still underway.

But there was a question. Nadia Lioce in order to have a minimum of entry in A period had made jokes with a plastic bottle on rallies of his cell, for this he had been tried. To this process We have made constant protest initiatives together with others, extending mobilization also towards the area of democrats, lawyers; we collected signatures before the courts saying that Nadia Lioce was brigatist, that it claims to be of the BR, but has been in many years in 41bis without having objectively the possibility of interning or having influence on the external organization given that, as the lawyer also said Vital, this Organization of the BR has been no longer for a few years.

In our opinion, solidarity was important. And here in part I start to respond to the question that the partner who introduced this Assembly placed before: what do we do? On that occasion we saw that We do not accepting the prohibitions that the

Police imposed, for example. not to make garrisons in front of the prison of L'Aquila, Entering the court, the solidarity has weighed; at least this process He did not end with a further sentence; Of course we are talking about "further condemns "when Nadia Lioce still is in 41bis and for her it is a life sentence, but they wanted to further weigh down his condition. Not they succeeded.

This must give us strength and trust. It looks like, and here I come to Alfredo Cosato, as they are dealing with Alfredo's situation, for the fury from revenge that the state, the government are making, for recent statements of Meloni, it seems that there is no possibility that Alfredo comes out of 41bis. We do not accept this!

We think that initiatives are important, of all kinds and types, and here Everyone is good that he does what he can do and that he is also in tune with the own ideology, politics, practice, from the actions that the anarchists, as struggling with positions, complaints, sides that come made, for example, also some artists, as the first lawyers, some intellectuals, etc., to the principals, events, etc.

Because this is the path that we must continue and extend, bringing it forward articulatedly, because every action, from a signature to the signature to A heavier action is needed.

We have also had another experience on this in past years. Years ago there was a partner who had launched a bowler hat towards a military base, He had only blacked the wall but had been sentenced to dozens, tens of years, The campaign that was made in that case, very extensive, without resigning facing the difficulties led to the liberation of the partner.

Coming to the affair of Alfredo Cossed, we called 41bis "Torture Bianca ". It is a torture that has the only purpose of revenge towards Those who do not regret, do not collaborate with the state, rather claim the their revolutionary militancy, and this Alfredo so does it.

A revenge towards companions who objectively and subjectively launch a message, to fight against the repression of the state, not to yield, of pursue this battle.

In Taranto, where we started making initiatives, even putting We will do others, we are saying together with; "Outside Alfredo thus from 41bs. No to obstacle life imprisonment "," save his life and his political identity ". I want to underline this

last sentence: its political identity ", why As Cospito's letter also says: life does not make sense in this grave of the living.

So his political identity. Now, we are not anarchists and we have relevant differences in ideological, political, strategic, terms of perspective with anarchists. But the problem is not this now. The problem is The political identity that the bourgeois state wants to erase and hit.

In this sense I add to what vital denounced on the matter Judicial, which this of Cosenza is a political question. And because therefore it is It is right that solidarity is also solidarity with political identity Revolutionary of Alfredo Cossed.

Because it is the state that puts it on a political level, it would not make sense if not It was political. Now torture, 41bis have no relationship with the crime in itself: what relationship is there between the fact that he has blacked a wall and the end life? what relationship there is between the "bond, influence towards the outside" of Cosenza e The 41bis regime? Nothing!We are seeing it in these days: the anarchists They are doing various actions without Alfredo influenced them; then one can have A positive or negative judgment, but they are doing it. The problem that the bond with the outside is more creating the action of the judiciary, of Government, of the state that Alfredo Cosenza.

So if there is no longer the bond with the crime, it actually emerges that The only purpose is political. "Cut" the heads of revolutionaries, detainees politicians, because for the mere fact of carrying out their battle, they allude to the question that this state must be reversed, allude to the fact that the state cannot be reversed with words but with the struggle Army, mass. Therefore, for the mere fact that it alludes, for better or worse, a This truth must then be silenced in a tomb. Why this Both a message both inside the prisons and outside.

Of course, the Alfredo so -called issue was not born with the Meloni government, but now It is fully taken in hand by the Meloni government. In the sense that today It must be prevented that there are struggles that also go beyond the needs concrete, daily, immediate, concrete, which pose the problem of power, of what power, if this power can or cannot be improved, reformed, Because it is a power of the dominant class that does not have the right to exist. AND Today there is an objective situation that increasingly raises this question, because Not only is the crisis, now there is war, and things are changing quickly; and in a sense this, on the front of both needs daily work, salary, of not having

caravan, of rights elementary, both of the most general rights, to democracy, rights of immigrants, women, health, school, etc., creates a malaise heavier among the workers, among the popular masses.

In this situation, those who want to give a perspective must be removed To this strong malaise.

I read you a excerpt released a few days ago, in which Nadia's lawyer Lioce, Caterina Calia, resumes what is written in a provision that confirmed the 41bis for Nadia: \_ "must be evaluated with the utmost prudence the temporary excluded of the brigatist phenomenon that suggest not to exclude the Possibility of a recovery of the armed struggle in the medium and long term, also in consideration of an overall panorama of social clashes, of a ever growing gap of living conditions and little opportunities for Work"\_\_

And you say it ...!And what should we say? Well yes'. The problem is that the situation is worsening and now the war is also, there is participation to the war of Italy who wants to be in the front row.

This can be a ground in which not only struggles can develop trade unions, but more heated, tougher struggles and these struggles can then be meet with the revolutionaries, the communists or anarchists who place the problem of a more general struggle, of a struggle to make it really With such a barbaric situation.

I remember what some time ago in a long interview made to Vitale, at a certain point the discussion that the action of the judiciary was made, the repressive action is internal to the class struggle, to the class war. Then if it is internal to the Class struggle, force relationships count.

In the 70s the same judiciary or because he was convinced or because he had fear was a little calmer, or at least there was a rift, between whom He also wanted to condemn the revolutionaries to life and who instead understood that Behind those struggles there was a condition of profound injustice, inequality, of deep attack on rights.

Then the judiciary is also influenced by strength relationships. it concerns the condition of workers, workers, women, of young, they are not good, there is a defense condition, even when there are struggles we are unable to tear effective result nor can we conquer Positions of strength compared to the government, the state.

So the problem of how to continue, how to prevent Alfredo from continuing to stay in 41bis or even worse, how we can prevent there for others companions this white torture, for our part it is a question of being tenacious for extend this battle, to snatch concrete results and call everyone to put our face on it, put our hearts, put our heads, but in the same time we have to change the strength relationships.

We want to bring the condition of political prisoners to the workers, to factories, and I can tell you that when we did it a few years ago for the torture to some brigatists, then made also by burning cigarettes on body, one for everyone, Cesare Di Lenardo, the workers were heard us, interested, solidarity. We led him to the workers of Ilva di Taranto And we said it was a question that touched them too.

Even now we are starting to bring the story of the fact to the factory, Telling to the workers: look that they are talking about you, so you have to deal with Of this, it's up to you.

We are talking that the application of 41bis is also a violation of the Constitution, but the government is speaking these days of changing, upset the Constitution, Meloni said he wants to introduce the presidentialism or semi presidentialism, and in the near future certainly they will want to change the fundamental articles, those on anti -fascism, anti -racism. We are denouncing that they violate their own laws, The Constitution, but in the meantime they are changing it.

For example, what Nordio wants to do is very serious, but in the meantime he is By doing, and you don't see that reaction against which it would be necessary. There issue of telephone interceptions is serious, they want to remove it, because they must guarantee them, to the corrupt politicians, to the fascists who have inside Parliament and the main institutions, to legal criminality. These they must not be controlled, wiretapping should only be made to the mafiosi And to the "terrorists", then we are seeing what is meant by "terrorism" for that you just need to throw a bowler back ... evidently we have a vocabulary different.

So our problem, also to answer what to do, is to extend to 360 degrees the mobilization for Cosenza, from Democrats, to workers and to whom He wants to make more incisive initiatives; At the same time start changing the strength relationships, both now and especially for the future.

But to have strength relationships in our favor, in particular among the workers, the important question is the unit of workers, without the unity without an autonomous organization from the control and line of the union leaders confederal, if there is no unit of the factories in the first place and then with all social sectors that fight, want to fight, who have a condition Heavy, it is difficult to change strength relationships.

We are already traveling this path, we are trying to improve the strength relationships. We have convened a proletarian national assembly anti -capitalist in Rome, in which the various struggles, especially of the workers, yes they unite. I want to invite you to be there to this assembly.

If we begin to be many, to put ourselves together, with the debate, the Discussion, combining the struggles, perhaps we can save many "Alfredo".

**Latin American Groups in Norway(LAG)Recently published a report above The consequences Statkraft's renewable energy projects in Brazil have for nature, The climate and locals.**

In [report](#) have layers examined how these projects, which create energy from renewable resources As water, wind and sun have affected the environment, nature, indigenous peoples and farmers in the areas. Chairman of the Board, Larissa Avelar, points out that renewable is not the same as sustainable and that even if it is not released greenhouse gases, it has great Consequences for the lives of people, the environment and nature.

Team writes that the resistance to the development of hydropower and wind power in Norway has motivated Statkrafts to invest more abroad and that while the Norwegian state Historically has valued public ownership of energy production, it contributes to the privatization of the sector in Brazil. They write that it seems apparently look like it's good for the people with great state ownership and with a large proportion of renewable energy but even if we do not hear much about it in Norway it is are there major conflicts around this in Brazil

as well, and Brazilians are among the in the world that has the most expensive electricity.

Statkraft tries to waive the responsibility of the destruction of most their facilities were established by others from before and not it was those who stood for Deforestation and forced people. The people were promised jobs, energy and better economy, and Statkraft led to an important part of their projects is to ensure that "the local community should be better than before they came". Most The interview subjects in the survey tell that what they are left with is the damage from the projects, while the resources and profits disappear out of The region.

Statkraft has also said they should stay away from the rainforest in the Amazon, but has at the same time purchased in facilities that have, among other things, built dams in indigenous areas and large parts of the Atlantic rainforest in Rio Grande do Sul. An indigenous leader says that they can no longer live as indigenous peoples, that they forced to live in a world that is not theirs and is about to lose its culture because of the destruction of Statkraft's plant Monjolinho.

Statkraft is wholly owned by the Norwegian state, and has power plants in 16 countries in Europe, Asia, and in Latin America, where they also operate in Chile and Peru. They have Operated in Brazil since 2009 and now has 18 power plants in the country. On the website say they write that by 2025 they will expand the business in Brazil through Procurement and participation in public auctions for new projects.

*Kart showing the number of power plants Statkraft has In the various countries of Europe, Latin America and Asia.*

Statkraft is not the only Norwegian company that profits at the expense of The people and nature of Brazil. A large number of Norwegian companies in finance, Mining, fishing, agriculture, oil, gas, shipping, telecommunications, Commodity production and energy do the same. According to a calculation made by Brazil-expert Torkjell Leira, could 11 thousand Brazilian families bread for it Norwegian companies take out profits in Brazil.

More about Norwegian companies in Latin America:

by Giorgio Beretta

30/1/2023

**Italy nuclear risk: the new bombs in Ghedi and Aviano**

They are about to arrive from the United States also in Ghedi(Brescia)and Aviano(Pordenone)The nuclear bombs of "new generation" B61-12. They will replace the Old B61-11 located for years in the military bases in Belgium, Germany, Netherlands, Turkey and Italy as part of the so -called doctrine of nuclear sharing,

NATO's "nuclear sharing".

They are called "tactical nuclear devices", but are no less dangerous than "strategic nuclear bombs" present in the Arsenals of the United States, Russia, China, France, the United Kingdom, India, Pakistan, Israel and North Korea.

The "adjustable power" of the new B61-12 varies from 0.3 to 50 kilotons, five times higher than the Hiroshima bomb. But - they report peace and disarmament network e ICAN campaign - they can explode under the earth's surface by increasing Thus their destructive ability until they reach the equivalent of a weapon bursting on the surface with a yield of 1,250 kilotons, that is about 83 bombs Like the one used in Hiroshima.

### **Today Italy is a possible nuclear target**

All this makes **ghedi e aviano** , but also reflected **Brescia e Pordenone** , **Possible target in the nuclear war** . An eventuality Today no longer so remote: in recent months the Russian authorities have shown The possibility of using tactical nuclear bombs in Ukraine.

In response, the administration of Joe Biden has decided to keep in the possibility of using nuclear devices first, thus renouncing to introduce the no First Use rule. Not only that: the rapid change of the world scenario is also leading to the use quote of nuclear weapons to defend what the American leaders and Europeans define the "order -based order".

Nuclear bombs, even the "tactical" ones, can therefore no longer be consider a tool of mere deterrence, but expose the populations of territories in which they are stored to be targets of the "first shot" or of Further retaliation.

**The war in Ukraine continues during the Russian winter offensive. This is a Limited offensive, and both parties are preparing for harder battle this**

## **spring. The game of Sweden's NATO membership continues starring Turkey, and The political crisis has taken a new turn in the UK.**

After months of debate, Germany has concluded that the Zelenskiy government Must get leopard tanks. Germany has prohibited resale of such weapons, so They have thus had some form of veto to other countries that have leopard, Including Norway. Chancellor Scholtz yes means a number of countries will send these The tanks of Ukraine, including Norway and Poland. The tanks should enable the Zelenskiy government to recapture areas such as Russian Imperialism dominates today. Zelskiy this week also deposited a number of officials and politicians accused of corruption.

Turkey President Erdogan has stated that Sweden can forget their support to NATO membership, after racist Rasums Paludan burned the Qur'an outside it Turkish embassy in Stockholm. The Turkish government is particularly large Emphasis that Paludan did this with the protection of Swedish police. Erdogan using Sweden's application for NATO membership to obtain their own gain, both to other countries and internally in Turkey. The election campaign is underway, and Erdogan's line to Sweden, with the requirement of the extradition of Kurdish activists for that Sweden will join NATO, is popular with many. Swedish authorities will now wait until after the Turkish choice to make new attempts to Erdogan.

Prime Minister Rishi Sunak is in severe weather after another political scandal. This The hallway is the chairman of the Conservative Party, Nadhim Zahawi, who is accused of evading taxes. Sunak has tried to get rid of the matter by referring it to "independent investigation". Sunak became prime minister when Liz Truss had to retire after record card time by power, and she took over after Boris Johnson's scandalous prime ministerial period. The land is in deep economic And social crisis, and for months have been characterized by strikes against animal times.

The military junta in Burkina Faso has given France a month to pull their Military forces out of the country. French imperialism has had forces there in a decades, under the pretext of "fighting jihadists" in the north of the country. Now Burkina goes Faso same way as Mali: They throw French forces out of the country, and want Russian forces from Wagner welcome. There have been many popular protests where French flags have been burnt and Russian flags have been lifted up to the sky. French imperialism is notoriously unpopular among the masses in

the west- Africa, and both Mali and Burkina Faso have been French colonies and are today semi -colonies in which French and Russian imperialism rival with each other and With Yankee imperialism and Chinese imperialism.

## Concrete work and work in abstract

Author: carga

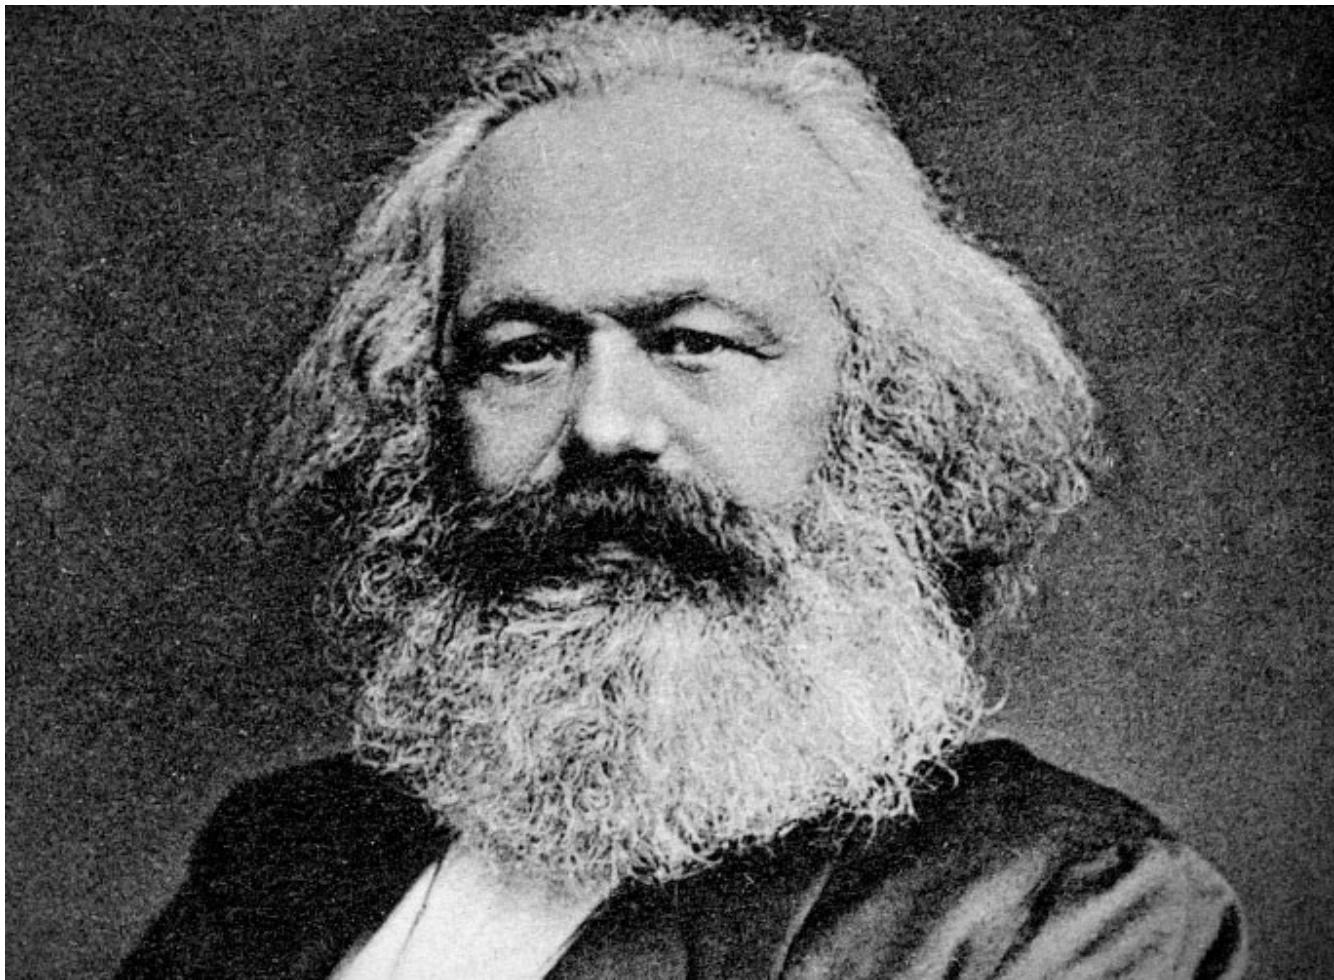

Time: 2023-02-01T83:00:00

Head Description: Continuamos con la reproducción de estas notas, elaboradas por el camarada Eugenio Gastiazoro, director de nuestro semanario y miembro del Comité Central del PCR, fallecido recientemente. Las mercancías son objetos que sirven para satisfacer necesidades y, como tales, tienen un valor de uso. Pero, a su vez, son objetos que sirven para el cambio y, como tales, tienen un valor de cambio. A primera vista, el valor de cambio se presenta como una relación cuantitativa en que cambian los valores de uso y que se modifica constantemente según la época y el lugar. Pero no es así. Un artículo se cambia por una gran variedad de otros a la vez. El valor de cambio expresa algo que le es común. Si dejamos de lado sus valores de uso, las mercancías sólo tienen una propiedad común: la de ser producto del trabajo humano abstracto. Los siguientes extractos del tomo I de El Capital, la obra magna de Carlos Marx, se refieren al doble carácter del trabajo representado en las mercancías.

Description: We saw at the beginning that the merchandise had two faces: the use value and the exchange value. Then we saw that the work, being expressed in the value, no longer possessed the same characteristic features that distinguished it as a creator of use values. (...) The use value of each merchandise & Hellip;

Images: ['[Marx-w-1.jpg](#)']

Type: article

We saw at the beginning that the merchandise had two faces: the use value and the of exchange value. Then we saw that the work, being expressed in the value, no longer possessed the same characteristic features that distinguished it as Creator of use values. (...) The use value of each merchandise contains useful work, that is, activity productive of a certain type exercised with a purpose also determined. Use values cannot enter into relation as merchandise If they do not contain qualitatively different useful works. In a society whose products generally take the form of goods, that is, in a Society of merchandise producers, this qualitative difference between various useful works done independently of each other, such as own and exclusive activities of many other independent producers, It develops until a complicated system, a social division of the job. (...) All elements of material wealth not supplied directly by Nature owes its existence to a specific productive activity, exercised with a concrete purpose, an activity that seizes particular materials of nature and put them at the service of certain human needs. As creator of use values, work It is a useful job, it is a necessary and independent condition of all forms of society for the existence of

the human race; it is a necessity perennial, imposed by nature, without which there can be no material exchange between man and nature or, therefore, life human.(...) Man can only act as nature does, that is, changing the form of matter. Moreover, in this work of modification of the form, counts constantly with the collaboration of natural forces. We see, then, Work is not the only source of material wealth, of use values produced by work. As William Petty said, work is the father and the earth the mother.

Let us now move from the merchandise considered as use value to the merchandise considered as value.(...)\*

If we dispense with the special form of productive activity, that is, the work utility, there is no more than the spending of human force of job. The work of the tailor and the weaver represent activities qualitatively different productive, but they have one thing in common: they are a Productive expenditure of human brain, muscle and nervous energy, etc. In This sense are human work. They are two different forms of Application of man's work force.

Naturally, to be able to apply in this or that way it is necessary that the Human work force reach a greater or lesser degree of development. Now Well, in itself the value of merchandise only represents human work, Human work expense, simply. In this sense, it occurs with work human the same that happens with man in bourgeois society: as a man It barely means anything; It is only quoted, it only plays an important role as General, or as a banker.

Human work is the use of that simple work force that He has every ordinary man, in general, in his body, without the need for No special education. The simple average job changes, without a doubt, character according to the countries and culture of each era. But it always exists in a certain society. Complex work is nothing more than simple work intensified or, rather, multiplied: a small amount of work Complex can be equivalent to a lot of simple work. The experience shows that this reduction from complex work to simple work It is a phenomenon of every day, every hour.

A merchandise can be the product of a very complex work, but its value I immediately equate the product of simple work and, as such value, only It represents, therefore, a certain amount of simple work. The various proportions in which different classes are reduced to the unit of Simple work measure are established through a social process that It operates behind producers.

Therefore, they believe them established by custom. For simplification reasons, we will consider, now in ahead, the workforce, whatever, as a direct expression of the simple workforce; Thus we will save the discomfort of having to reduce it to unit. (...) In relation to the use value, the work represented by the merchandise only Qualitatively account. Regarding the magnitude of the value only counts quantitatively, once reduced to the pure human work unity and simple. In the first case, it is the class and the quality of the job; in the second of the quantity, of the duration. (...) The leveling of The most different forms of work is only possible if we dispense with their Human workforce, abstract human work. Weekly today in ° 1948

## BRIEF AND CONCISION: Two virtues

Author: carga

Time: 2023-02-01T84:00:00

Head Description:

Description: What does it mean to be brief and concise? Not say a word more or less than necessary and express each idea with the minimum words. Briefing is a fundamental virtue, because the newspaper of the proletarians is formed by a few leaves that must collect all the palpitations of world life that & Hellip;

Images: ['[Julio\\_Antonio\\_Mella.jpg](#)']

Type: article

What does it mean to be brief and concise? Not say a word more or less than that is necessary and express each idea with the minimum of words.

Briefness is a fundamental virtue, because the newspaper of the proletarians It is formed by a few sheets that must collect all the palpitations of the World life that have interest for the working class. If you are not Brief steals space, prevents other interesting news from being set or more than yours. Not be concise, that is, write more than necessary, It also constitutes a serious fault in a journalist. The weekly newspaper or Diario is a conquest of modern life. And, at this time of great industries, transatlantic flights in less than 40 hours, everyone who lives Really, live something quickly. Therefore, if you, dear correspondent, Write something more necessary, you will not get your work to be read For all, what should be the aspiration of a good journalist.

## **Unit**

How to be brief and concise, while expressing what is necessary? We are going to Try to say how.

Each article, information or chronicle must have a single central idea.

This central idea must guide the writer throughout the development of the job. You must take care that new "parasitic ideas" do not come to your mind and are

as fungi or other plants around a thick trunk. Thus It will have won the conciseness. Nothing out of what is necessary to explain the idea Central will take place. It is useful to recommend that the articles write two times always. First, a draft. Once this is finished, it must be corrected The following aspects, according to the above, to see if it is brief and concise. Everything superfluous must be removed. A second review will be for choose the terms and words well; It will be seen, first of all, if every word Indicate what the writer had in mind.

A good way to do this work is to "forget" what is written and put in the disposition of a reader who will know what we have written. That way You can account for any correspondent of the effect you will cause in your Readers written.

# The Chinese Revolution and the Environment

Author: carga

Time: 2023-02-01T85:00:00

Head Description:

Description: We saw in previous notes some of the experiences of the Chinese revolution headed by the Chinese communists led by Mao Tsetung, in particular the battles starring the masses to solve millenary problems of drought and floods, and the advanced experiences of popular communes. These experiences, and many others, had the & Hellip as a guiding principle;

Images: ['[Chinese\\_Revolution\\_Posters-7-proteger-el-bosque-1970.jpg](#)']

Type: article

We saw in previous notes some of the experiences of the revolution China headed by the Chinese communists led by Mao Tsetung, in particular the battles starring the masses to solve problems millenaries of droughts and floods, and the advanced experiences of the popular communes.

These experiences, and many others, had as a guiding principle the continuation of the revolution in socialist society, and the confrontation Between two lines in the party and in the state, the followers of the road capitalist, and the revolutionaries.

All this had its correlation in the defense of the environment, with successes and Errors as Chinese communists themselves recognized. While there was no talk In these terms, as spread in the West from the 1970s, And the term ecology was used, the Chinese revolutionaries showed Since the beginning in the areas that were releasing, and then in the set of China, a great concern for forest preservation, small Hydroelectric dams that revolutionized the obtaining of energy in the rural zones,

It was important in this sense the use of organic fertilizer over the chemical compounds, and the diffusion of biogas(combustible obtenido de desechos orgánicos), which allowed progress in reforestation in vast areas rural, and give

the battle against indiscriminate felling of trees, used By millennia for the peasants to obtain firewood.

In cities, in full cultural revolution, that gigantic process of struggle For power in the conditions of a dictatorship of the proletariat, the Maoist, while displaying the political and ideological struggle so that The masses will effectively take the direction of the levers State keys, campaigning to "strive to collect the scrap and other waste. "

All this today has disappeared, since from the tragedy of the capitalist restoration in China from 1978 and the voracious development of an imperialist bourgeoisie that undergoes the Chinese people and seeks its expansion Throughout the planet, environmental problems and pollution have Multiplied greatly.

### **The fight against the "four pests"**

Towards the end of the 1950s, in 1957 the president of China Mao Tsetung promoted the campaign against "the four pests"(mosquitos, moscas, ratas y gorriones)as one of the paths to promote hygiene and care of The crops. He did it in the midst of the campaign for the "great leap forward" of The economy and socialist society, which has been the subject of the most absurd defamations by the imperialist powers and their scribes academics, who speak of a famine of millions.

Launched the campaign mobilizing the masses, the Chinese verified that the Extermination of sparrows had been a mistake, because not only the grain seeds, but a great variety of insects that affected the Plantations.

In 1960, the Socialist State and Mao himself recognized this error, and They raised to change the extermination of sparrows, which were reintroduced into China, for bed bugs.

Learning from mistakes, Chinese Maoist, with Mao at the head, The popular communes were promoted since the beginning of the 60s, and then They launched the Chinese proletarian cultural revolution, as the program raises of the PCR: "It was a great revolution starring millions of men and Women, youth and older, workers, peasants, students, etc. that a From 1966 they moved that country and the world. With her it was possible to prevent the capitalist restoration and sustain the dictatorship of the proletariat for more ten years old, taking it to its most advanced point. "

## **China at the First International Conference on the Environment**

In 1972 the first United Nations conference was held on the Human medium in Sweden. This went down in history as the first conference of The UN on the environment. There, in an international context in which There were two superpowers(EEUU y la Unión Soviética ya transformada en socialimperialismo), several debates were given. Among them, about the use of nuclear weapons. In front of a statement proposal that "recommended" to leave On the side, essays with nuclear weapons in general, the delegation of the People's Republic of China raised, without hypocrisy, that "the superpowers They continued the armament career and that China had to carry out rehearsals of weapons for your own defense, but that, contrary to superpowers, He had promised not to be the first to use nuclear weapons "and "He insisted that the draft declaration had failed to specify the cause main of the contamination of the environment, namely, the pillage policy, aggression and war

that the imperialist, colonialist and neo -colonialist countries practiced, And the Chinese representatives with a statement proposal, which He lost the vote, which said: "In order to protect humanity and Human medium, it is essential to prohibit the use of weapons sharply inhuman biological and chemicals that seriously contaminate and harm the medium, and proceed to its complete destruction; prohibit and destroy

completely nuclear weapons and, as the first measure for this, to achieve that the states that have nuclear weapons reach an agreement of no use of them at any time and under any circumstances "(Informe de la Conferencia de las Naciones Unidas Sobre el Medio Humano, Estocolmo, 5 a 16 de junio de 1972. Naciones Unidas, Nueva York, 1973).

## **Standards for Environmental Protection**

Also in 1972, in the middle of the proletarian cultural revolution in China, the Then China Prime Minister, Zhou Enlai(Chou En - Lai), great defender of environmental protection with a revolutionary perspective, promoted some political criteria that were discussed throughout the country, In addition to motorizing a national conference on environmental protection that It was carried out in 1973, and a specific State Council that promoted the creation of government management institutions, both for study problems to control industry pollution, cities and hydraulic resources.

Chinese revolutionaries sought to resolve the contradiction between the development of agricultural and industrial production, to guarantee Independence of the people and the nation, and the protection of the environment, thus as the contradiction between immediate results and interests to medium and long term.

On this basis, they established rules around planning trying of compatible relationships between industry and agriculture, urban and rural areas, production and human life, development economic and the protection of the environment and the maintenance of the ecosystem.

With the experience in the fight to dominate the "harmful" rivers, and generalizing to other areas the resolution of the "dialectic between water and soil," they said that the pollution and destruction of the environment are due to the exploitation and irrational use of natural resources and Energy.

To advance this fight, the central was the confidence in the masses and their initiatives, both in the protection of the environment, in the fulfillment of Laws and regulations linked to these issues.

A concrete fight that occurred in the midst of the development of the communes popular, with the examples of the commune of Tachai in agriculture and that of Taching(producción petrolera)In the industry, it was the theme of the contradiction between cities and rural areas.

This fight to solve one of the fundamental contradictions of the Society divided into classes had concrete roads in revolutionary China, that went through promoting small and medium cities discouraging the large, surround industrial centers, as well as promote industries in rural areas.

The restoration of capitalism in China in 1978, which closed a stage in the development of the revolutionary movement of the world proletariat, swept a process with the great conquests achieved with the revolution, and in concrete as regards environmental pollution and climate change, China is today one of the main imperialist powers responsible for the dire consequences of the capitalist exploitation system and Imperialist, first of all about their own population, and above all Peoples of the world.

**Departure from the streets, the claim of Unity to defeat macrismo at the polls. That popular claim led to the Constitution of the front of all, with the participation of 17 games politicians, including the PCR-PTP. This was a great success of our CC, which allowed us to travel a period of political unity with the Peronist masses and its leaders, which is still ongoing.**

The 2019 elections showed the importance of the Personerías again of the work and town party, in each province, not only because they are A demand for the electoral system, but is also a tool for The political struggle in the masses.

In the primary of August 2019, the FDT beat Macri for 15 points of Difference, this generated great joy. Macrismo won the streets in the "30 days - 30 cities" campaign carried out a brutal devaluation of the Weight, announced by National Chain, stating that "the world no longer trusts us". At the same time the direction of the FDT calls "not to make waves", ironing the electoral campaign. All this allowed to reduce the difference from 15 points from the step to 8 points in the general elections.

So deep was the hatred of the Argentine people to macrismo that, despite the loan of 44,500 million dollars that Trump made, then President of the United States, and the IMF, could not prevent defeat electoral. That money went to a fraudulent financial bicycle and neither A single dollar came to the town.

Before delivering the government, on December 7, 2019, the macrismo made An act to say goodbye to the government by filling the Plaza Mayo. It was a demonstration of forces, where it was clear that they were not willing to resign power and that they were going to consolidate a right -wing opposition pole, also disputing the street.

### **A new political scenario**

The triumph in the first round of the front of all in the elections of 27 of October 2019, with the formula Alberto Fernández President and Cristina Kirchner Vice President, generated expectations in popular masses, about All in the Peronist masses.

On November 11, 2019, a coupled coup d'etat occurred in Bolivia in the US, against the government of Evo Morales. Before assuming, it was decisive Alberto Fernández's intervention, along with López Obrador(presidente de México)To save the life of Evo Morales, who as of December 10 He was received in Argentina as a political refugee.

Among the first measures were the creation of the Ministry of Women, Gender and diversity and the restoration of the Ministry of Health and Work, from the popular struggle. Also among the first measures There was the suspension of retirement mobility, negative aspect.

Although elected legislators were mostly representatives of the Kirchnerism also entered as deputies the comrade of the PCR-PTP and national coordinator of the CCC, Juan Carlos Alderete, by Buenos Aires, and the Comrade Lía Caliva, by Salta. In the Chaco, the provincial deputy was elected Comrade of the PCR-PTP Rodolfo Schwartz, and three communist councilors Revolutionaries of the Qom community. And they were elected communist councilors Revolutionaries and companions of the CCC in several locations. Some and some representatives from other organizations also entered popular

Everyone's front was born as the need for the working class and the people to Electorally defeat the Macri government. The great popular masses no They wanted to continue living in Macrista Hell.

We said in our report of the Central Committee of January 2020: "If we fight because the crisis is paid by those who filled the pockets we cannot leave the streets and stay waiting. The defeat of macrismo in the streets and at the polls, and the triumph of everyone's front creates better Conditions to fight to solve, first, emergencies [...] Our practice of every day we have different pressures. We start from the basis that in the decisions made by the new government, we do not have Participation or consulted. [...] We are still part of the Front of all. We do not put the new government in the target, but we say and We argue what we do not agree. [...] And we reaffirm that we start from no leave the streets and put the center of our actions in the fight for Solve emergencies.(Informe del CC del PCR, 4 y 5 de enero del 2020).

The PCR/PTP in the front of all we hit macrismo and its partners. It We do political independence, disputing the political leadership of the masses for our line of accumulation of revolutionary forces, so that The PCR is known and recognized by those masses.

### **The Government of the Front of All and Alberto Fernández**

Alberto Fernández's government assumed in a very difficult situation and We from the beginning reaffirm that we continued directing the blow main of the popular struggle to the sector that politically expresses macrismo, which hegemonizes the block of the ruling classes. A sector of landowners, monopolies of agribusiness and exporters of grains, the mining, oil, the main branches of industry, banks and financial organizations, etc., which are mainly

held in the Yankee and English imperialism, and are the most recalcitrant sector and more Dangerous for the working class, the people and the Argentine nation.

We also propose in the January 2020 report, which in the front of all We did not join popular sectors, but we also hit together With sectors of the ruling classes, which fought to recover hegemony and with those who agreed on the need to defeat Macri.

The intermediary bourgeoisie sector expressed by President Alberto Fernández is a supporter of the diversification of the agency(buenas relaciones con todos los imperialismos)And it is mainly at Imperialisms of Europe. During the government of Nestor Kirchner he played his side. With Cristina Kirchner she broke in 2008, and met in 2019 when, to Return from a trip to Cuba, he appointed him as a candidate for president aware that this unit was necessary to succeed.

The intermediary bourgeoisie sector expressed by Cristina Kirchner arrived at Government in 2003 and ruled for 12 years; It was hegemonic, in alliance with Other sectors, among the ruling classes until the triumph of Macri in 2015. Directs important sectors of Peronism, where it expresses a real current and It lies mainly in Chinese and Russian imperialisms.

Together with these two sectors, which hegemonizes the government, there are other sectors of intermediary bourgeoisie and provincial bourgeoisies, as minor partners in the government. There is also the intermediary bourgeoisie sector that represents Sergio Massa, and who has gained positions in the government.

For treatment we start from politics, always taking into account that These are an important part of Peronism, where they direct currents that express national bourgeoisie sectors, patriotic sectors, leaders and Popular and national union currents. And above all that are the Direction of important sectors of the Peronist masses with which we fight Unite on a revolutionary path.

Type: article

**When inflation reaches historical records in the region (y en el mundo entero), workers in Europe are determined that their salaries are not The adjustment variable. In France the demonstrations against reform pension are historical. In Spain, health personnel are starring in Important struggles. And in Britain the struggles do not stop and are more and more the unions that call strikes. The conservative government cannot contain The fight and wants to draw a law that removes the right to strike, disguised as "Guarantee of minimal services." It was already approved in the Chamber of Deputies.**

In the United Kingdom, 2023 began with historic strike days Railways, with national strikes up to 5 days. Inflation It reaches historical levels, with greater index in food, fuel, services and rentals. In many cases, there are sectors that had no increases salary in ... 10 years!

Following the example of rail workers, nurses, paramedics, border forces and mail workers They also joined and organized from below unemployment days. Also They called for bus drivers, luggage manipulators in Airports, postal workers and Amazon workers. The media journalistic consider that this is the largest movement of strikes from the ultra conservative government of the pirate Margaret Thatcher.

For example, health services were paralyzed in health. Only emergency services operated where patients treated Chemotherapy, dialysis and intensive care, during January 18 and 19. Is It is important to highlight that the strikes that began last year in this sector, They were first approved in 106 years by the Nursing College. The ambulance drivers also called unemployment.

On the other hand, 70,000 workers from 150 British universities called Strike for 18 days between February and March.

In that increasing framework of struggles, the government declared that it will not allow salary increases that match or exceed inflation. The unions are not They are left behind in this fight, and declared "we have so many people on strike and so many people suffering that only the government can change it, or a change of Government(...)We are in this long term. "

To stop the wave of strikes, the British government seeks to approve a new Law that gives the police to suppress the most "disruptive" protests and expands the legal definition of "severe disturbance." And wanting to advance more Even, on Tuesday, January 17, a Rishi Sunak Conservative Premier Project, which promotes the implementation of "minimum services". This law goes against the right to strike, since if a worker is notified as "essential" and declares himself on strike, he can dismiss for breach of contract.

It is important to note that the people fight more force in front of a government weak that intends to strengthen. During the last year the English had Three changes of governments by different scandals. They are still scheduled strike days by sectors throughout February.

PERSPECTIVAS DE LA ECONOMÍA MUNDIAL, OCTUBRE DE 2022

# PROYECCIONES DE CRECIMIENTO POR REGIÓN

(VARIACIÓN PORCENTUAL)

IMF.org/social

Fuente: FMI, Perspectivas de la economía mundial, octubre de 2022.

Nota: Las barras de cada grupo corresponden (de izquierda a derecha) a 2021 y proyecciones para 2022 y 2023.

**The increase in the price of energy caused by aggression** Imperialist from Russia to Ukraine, which mainly affected Europe, Restrictions on mobility in China against COVID and monetary policy Contractive in Europe and, mainly, in the USA in front of the inflationary jump have contributed to the cooling of the economy in those countries and at the level global.

The year 2022 has been marked by a general increase in inflation to global scale, with increases above 8% in the price index to the US consumer(8,1%), at the euro area(8,3%)and the United Kingdom(9,1%), all right above the long - term goals of 2.0% of their respective banks Central The barbaric aggression of Russian imperialism to Ukraine caused a strong rises in the price of oil and gas, as well as a new jump in the quotation of the grains, contributing decidedly to the increase in the world inflation. However, in the last months of 2022 they have been reduced oil prices and - even more - of gas, contributing to moderate Inflationary pressures in Europe and worldwide. Remember that even 2021 The large majority of countries recorded years of very low inflation, Except for some aberrant cases such as Argentina

To deal with inflation(siguiendo las recetas de política económica burguesas), most G-20 countries have carried out the cycle of more intense contractive monetary policy in decades, with strong increases in Interest rates(desde valores cercanos o iguales a 0%)and withdrawing market liquidity(en oposición

a las políticas de “expansión cuantitativa”). In the US, the current contractive cycle is the fastest and forceful of the last forty years, according to the Central Bank of the Argentinian republic.

Interest rates are contributed to "cooling" the activity economic, by more expensive credit and consumption, at the same time that the load of existing debts turns heavier; In particular, rates paid by dependent countries for their heavy external debts. In This framework continued to invest the performance curves of the bonds Treasury in the US(bonos de largo plazo con tasas de interés inferiores a los de corto), differential that usually anticipates a recession in the northern country.

In early January, the director of the IMF, Kristalina Georgieva, warned that A third of the global economy would be in recession in 2023, including half of the European Union. He also said that “this year will be much harder than the that we leave behind ”, since the three main economies -United States, China and the European Union- are slowing down simultaneously. Further Recently, in the Davos forum, he ruled out the possibility of a recession Global for this year(como en 2009 o 2020, cuando cayó el PIB mundial), it which does not reduce the seriousness of the situation anyway.

In its October 2022 report, the IMF predicted a growth of 2.7% for this year. For its part, in January the World Bank cut its forecast to only 1.7%(desde el 3,0% proyectado en junio de 2022). He also warned that “Given the fragile economic situation, any new adverse event -As a higher inflation than the one planned, abrupt increases in rates of interest to contain it, the resurgence of the Covid pandemic or the intensification of geopolitical tensions- could push the economy World recession. It would be the first time in more than 80 years that occur two world recessions in the same decade. ” About dependent countries -a which bourgeois economists call “emerging and in the process of Development ”- The World Bank recognizes that“ they face a period of several years of slow growth driven by a heavy burden of debt and scarce investments ”, which" will aggravate the setbacks in terms of education, health, poverty and infrastructure, which are already devastating, as well as The growing demands derived from climate change. ”

The UN director, which last week also reviewed his Global growth forecast by 2023 to 1.7%, highlighted the growing Income inequality in the world, which continued to sharpen between 2019 and 2022. Oxfam International said that

"the richness of billionaires has increased at a disconcerting rhythm "; Since 2020 63% of the new wealth generated was captured by the richest 1% of the world's population, even more than in the last decade(54%)And the richness of billionaires has grown up in 2.7 billion dollars per day. The World Bank admits that we could be Faced with the greatest increase in global inequality since the Second War world.

## **Perspectives of the main economies**

In 2022, the Yankee economy fell in recession in the first half, and then following six months, closing the year with an average increase of 2.1%(-2,8% en 2020 y +5,9% en 2021). However, both the World Bank and Bloomberg(promedio de proyecciones de Bancos y Consultoras)They expect a rise of only 0.5% by 2023. Inflation, which had already begun to increase by 2021 in the Post - pandemic economic recovery frame, the most was last year elevated since 1981. However, it has been moderated in recent months(6,5% interanual en diciembre), trend that is expected to continue towards forward.

In 2022, the Chinese economy grew by 3%, affected by the policy of confinements against Covid, which caused a setback in the second quarter; After recovering in the next three months, GDP returned to stagnate in the fourth quarter, also due to problems in the sector real estate(que representa una quinta parte de su economía). Except for the year 2020, China's growth in 2022 has been the lowest since 1976. For 2023, the World Bank projects a growth of 4.3%(5,1% Bloomberg), under the forecast of a lifting of mobility restrictions that encourage consumption, but already far from the average rhythm of 7.7% they exhibited in the second decade of 2000. unlike the main economies of the Planet, inflation has remained low in that country(2,0% promedio en 2022).

Europe has been seriously affected by the energy crisis unleashed from From the invasion of Russia to Ukraine, given the close dependence of Russian gas, in particular, by Germany. Gas prices in Europe reached Cut from 2021, since Russia cut its supply at less than 20% Regarding that year. After an estimated growth of 3.3% in 2022, the area Euro would have a null increase of GDP this year, according to Bloomberg and the bank World. An inflation reduction is also expected.

Russia, bogged down in Ukraine thanks to the heroic resistance of this country, He had an estimated fall around 3.0% in 2022 and would show a Similar

decrease in 2023, according to the different sources. Japan's GDP(tercera economía mundial), which decreased in the third quarter, closed 2022 with an average rise estimated at 1.3% and similar performance is projected to this year. For the United Kingdom, which would have entered recession in the third 2022 quarter, Bloomberg projects a 0.9% GDP drop in 2023.

Consequently, clouds increase the world economy. The strong current economic slowdown, with a high probability of recession in the US and much of Europe, added to the economic problems that They persist in China, threatens to lead to a new world economic crisis, that always hits the dependent countries like ours. TO In turn, this increases war factors, since history has shown again and again that imperialist powers try to get out of the crisis forcing new distributions of the markets and spheres of influence, in a dispute that transcends the economic level and inevitably leads to conflicts armed, both inter -imperialist wars and imperialist aggression against The oppressed countries, such as the one carried out by Russia in Ukraine.

## **Peru: where the only possible thing is "impossible"**

Author: carga

Time: 2023-02-01T91:00:00

Head Description: Reproducimos extractos de una nota escrita por Luis Molinas, secretario del PCR de Santa Fe. Ver completa en [www.pcr.org.ar](http://www.pcr.org.ar)

Description: When Pedro Castillo won in the presidential ballotage of Peru, a great debate was opened because that was believed "impossible." It was a triumph against the expectations of the right and a part of the "progressivism" that another candidate in primary school had. Electoral triumph considered "impossible" in a country where the right seemed omnipotent. Peru & Hellip;

Images: ['[perú-protests-enero-2023.jpg](#) ']

Type: article

**When Pedro Castillo won at the presidential ballotage of Peru , He opened a great debate because that was believed "impossible." It was a triumph against the expectations of the right and of a part of the "progressivism" that had another Primary candidate.**

Electoral triumph considered "impossible" in a country where the right seemed omnipotent. Peru was shown, together with Sebastián Piñera's Chile, like The best triumphant examples of the policies of entertaining in struggle against the foggy "populism."

No inflation, with a stable dollar, with a permanent increase in investments foreigners and exports. And above all without popular struggles, apparently. It was said that the left did not exist anymore, and so It seemed, when an earlier ballotage was reached among the murderer Keiko Fujimori and the ultra reactionary Vargas Llosa.

But Castillo won. The impossible.

The presidency was as it was. All the sensible ones thought that Castillo was going to Fall very soon, like a ripe fruit for a series of brave arguments: He had

been elected candidate because there was no possibility to win, they were saying.

It did not have an organic and solid political force. His party, Peru Libre, He divided immediately by the disputes over the cabinet. With minority in the Congress, in the two Supreme Courts, on the FFAA. Without a diary or a radio of province in his favor. Looked with contempt on the projequi right and with quite indifference of Latin American progressivism.

Many of his relatives even part of the family abandoned him. Was a "Indian," without experience. With antipheminist features. Initially, next to Fair measures made innumerable concessions to his campaign program. He gave the conservatives the Ministry of Economy.

And the most serious, did not call and organized the people to defend the positive, as main measure of self -defense. To earn the sympathy of the military, allowed the ashes of Abimael Guzmán to be thrown into the sea and reinforced The brutal conditions of his partner's prison.

But the right with his fine class smell, tried one hundred provocations from on the same day of the assumption. Corruption!It was the war cry. In a Peru where of the last 10 presidents, one committed suicide when they were going to stop(Alan García), another is imprisoned(Fujimori), two on bail and three processed The only unprocessed one was 5 days in exercise.

Finally, the self -fulfilled prophecy happened. With the betrayal of their most intimate collaborators.

When, already cornered, and before they dismissed it, tried to use the Constitution that allowed him to dissolve Congress, an army statement and of the National Police of Peru notifying that they would not comply with their orders, consumed the military and institutional coup. Immediate recognition of the American ambassador, who assumed in Peru after being 9 years director at the INC.

But the impossible happened again. Instead of everything returned to the place of Where he had never left, Peru burned.

The center is the area that goes from Ayacucho to Puno. It is the main region of the Insurrection of Tupac Amaru, which extended to Alto Peru. There it passed main of the 10 years of war of the people against the Spaniards.

There the main thing about the armed struggle of the Shining Path was carried out.

Since then years of peasant resistance. And battle against miners.

But also in that area and further north by the mountain range, are the new Mining and Camisea Gas, and east is cocaine in the VRAEM(así se denomina la zona especial de los valles de los ríos Apurímac, Ene y Mantaro).

The brightness is in Lima, but true production, which matters fundamentally to imperialisms and native reactionaries that oppress Peru today are under fire.

### **The actual situation**

Everyone speaks of the South, but the uprisings have spread to the north. Where the great resistance to the Conga mining project and Cajamarca of Where is a native Castillo.

And also to the east, towards the VRAEM, Mother of God, Amazonas. Where is it the coca and the paved route that San Pablo joins in the Atlantic with Lima in the Peaceful.

And the big surprise, the mass of the protest in Lima and in Arequipa(reservas políticas y electorales del fujimorismo y la derecha en general), where for the first time in many years, the protest broke out in universities and professional centers. Police ran over the National University of San Marcos(todos los claustros exigen la renuncia de la rectora), but the National University of Engineering(UNI)It is still a resistance center With his rector to the head. 13 University Student Centers of Lima, the Callao and Cusco demand the resignation of Boluarte

The front constituted on the bottom is very wide. The CGT of Peru, miners, RONDEROS, graduates(veteranos de guerra), students, informal miners and And women who play a very advanced role with their centers and federations.

The ruling classes are united to crush the uprisings, but divided by making new elections this year or in 2024(Boluarte). They try to calm with that and see. In a discredit panorama General of Parliament and political parties.

85% repudiate Congress and 71% to Boluarte.

It does not seem to be an easy task, queen alarm for the use of "hazelnuts", Homemade artisanal miners, similar to the "puppy" of dynamite of the Bolivians.

## **The Peruvian model. The Latin American model**

What is Peru for imperialisms and ruling classes?

Fundamentally mining, is the second world copper producer, and now They go for lithium and uranium. Gas and oil.

Cocaine. 80,000 hectares of coca cultivation. Displaced Colombia as the first world producer and is the first cocaine exporter to the US. And a little more: Tourism, organic food, etc.

For most of the 32 million people left over there is misery and Hunger, subsistence agriculture, "commerce", etc.

The impossible is not rebellion. The heroic Peruvian people have shown that impossible, the "utopian", the "fool" is to believe that this can be achieved by Always without fighting, without resistance. With their advances and their setbacks.

### **The fight**

The defense of the model unites all imperialisms, landowners and Peruvian right. But divides them to death for the benefit of who is going to consummate the dispossession. And that increases day by day in a world where superpowers have to grow permanently not to disappear. Although That leads the world to war.

The traditional domain of Yankee imperialism is being confronted growing by voracious Chinese imperialism.

China is already today the main commercial partner of Peru. And it has a very Advanced to consolidate this predominance through increasing investments direct capital especially in the new mining and a brave letter: the Chancay port.

A new overlap at 90 km north of Lima is in full construction that It would displace the traditional port of El Callao. The owner company and Constructora is made up of 60% by the Chinese company COFCO and 40% by the Glencore company. We both know them in our ports.

There would be 50% of China's trade with Latin America that is already 580,000 million dollars annually.

Keep in mind that by the Panama Canal including the new locks, only panamax ships can pass and paying nearby values to a million dollars per freight.

In Chancay they could dock the super bulkters and super tanks, and the new Portenero who cannot go through Panama.

And it should never be forgotten that by the ports of El Callao, Paita and the flights Illegal, 80 % of cocaine leaves today, mainly to the US. All that It would now go through Chancay. With a great fear of the ruling classes of Chile, because it would move to San Antonio and Valparaíso. And to Guayaquil in Ecuador.

But in addition, it was a generalized comment that these days signed With Chinese companies a letter of intent to the construction of the Pacific Railroad, Tumbes(frontera con Ecuador)a Tacna(frontera con Chile). Railroad that could be joined with Puno and from there to Bolivia and Argentina, in addition to the Arica La Paz railroad, or the jump- Antofagasta, both operable today with some difficulties.

To account for the hurry of the coup you have to keep in mind that they expire this year the main concessions of Fujimori, like here those of Menem. The Chinese They are already in mining, they go for more, and the Yankees want to keep what that have.

### **The exit**

For the umpteenth time the peoples and reality determine to demonstrate that In Latin America there is no easy, reformist exit.

You cannot respond to the minimum needs of the great masses without Break even partially the dependent and reactionary model. But The time, it is not possible to break that model even partially if I do not unleashes and displays all the combative potential of the exploited and the humiliated Of the huge masses of workers, peasants, native, women, Students, small and medium -sized national entrepreneurs, etc.

To the brave Peruvian people he has to show again that sovereignty and Social Justice are two faces of the same currency in a Latin America subjected by imperialism and landowners. Without sovereignty you can't make or reforms(como lo vemos todos los días en nuestro país), and without Unleash the struggle for social justice cannot even dream of sovereignty.

It will be a new and exciting task for the working class and the Peruvian people who knew how to have revolutionary leaders such as Mariátegui.

We have the total and selfless solidarity between two villages that Latin Americans for freedom, independence and justice.

And our best contribution will be the advances in the revolutionary struggle of our country.

## The health promoters of the CCC

Author: carga

Time: 2023-02-01T92:00:00

Head Description: Entrevistamos a la compañera Vanina Campos, responsable nacional de las promotoras de salud de la CCC, que tienen planificada una reunión nacional para el 4 de marzo.

Description: Vanina, which is from the killing, begins telling us that “I integrate into the process of health promoters from the pandemic, and a while ago I am in the task of the National Coordination of Health Promoters. From fear of the virus, the issue of community health training & Hellip came out;

Images: ['[promotoras-de-salud-en-el-Congreso.jpg](#) ']

Type: article

Vanina, who is from the killing, begins telling us that “I integrate into Health promoters process from pandemic, and I am some time ago in the task of the National Coordination of Health Promoters. Starting From fear of the virus, the issue of community health training came out To prepare the companions, to have tools in front of this that it was something new. Many of the companions already came with a health task, and the Pandemia threw them to the prominence while in the front line with the pots popular

“The promoters, unable to be on the street, we take as fighting measures hold the pots against hunger, train us in prevention, and give it Fight to that right that denied the virus. We met different health problems, and turning what learned in the territory. They left Armando sanitary posts, crisis committees, articulating with the rooms and Health centers of each place, to fight an integrated type of health.

“Situations in the country were different. The common thing is that we needed training, and we do different. A community training in Health, which we did with the University of Avellaneda, also with the Pan American Health Organization and based on all that effort in Pandemia recognition was obtained within the Casa Rosada for the work of the companions and how they played on the vaccination issue,

"The work that was armed throughout the country leaves us a path traveled where We now come with a lot of achievements, such as that, from having taken the health in their hands, begin to discuss the role of promoters within hospitals and health rooms.

"In several areas we have won that companions can move to a permanent plant. We have participated in the presentation of the Law Sanitary Agents and Promoters of health, that we understand that they are two different instances that we think They are integrated into public health.

"Health promoters are partners who train to prevent and raise awareness, address social problems, detect a disease, accompany. And health agents are companions that they know how to put injections, take pressure and some that are already vaccinating.

"The law that was presented is also important because in addition to recognition that has been achieved in some places, we are fighting that the companions are paid, as part of the health system.

"We participate in a national health meeting in Entre Ríos, with companions De La Plata, Mar del Plata, Rosario and other places. It was fundamental for know the discussions between doctors and other professionals from Health, where we propose the importance of our role in the system sanitary".

### **Health is a very serious problem in the economic time that we are**

We ask Vanina where the promoters of Health, and told us: "Health is a very serious problem in economic time that we are, because one suffers one larger and we are very Focused more than anything in the fight for law.

"Now we go to a national meeting of health promoters of the CCC, which was resolved at the National Movement Table. There we expect power share all the experiences of these years and be able to discuss the issues policies from health, and how the political health influences. And from there Be able to define our objectives together. Because there are different situations in each neighborhood or each province. For example in Rosario and Misiones there are Companions who passed to the permanent plant, in La Plata the companions are Very articulated with the Faculty of Medicine of La Plata, with the municipality. In Some places are more dedicated to the gender issue, in others to consumption problematic, food theme, different situations ".

Vanina also told us that the work of the presentation of the law It promoted together with the Cayetans and other social organizations that They work in health. "Particularly we raise the problems of The neighborhoods, which is where we are. The bill is wide, because it covers to health agents and health promoters, of which we have a Mug, and not only in social organizations. "

Another issue that our interviewee raises us is to address situations that occur in the places that the promoters have entered the plant permanent, such as in Mar del Plata "where do they do work As a social worker, even going to see people deprived of their liberty. Because The national meeting that we have scheduled for March 4 is so important, To see all the experiences we have been doing since the Pandemia, and be able to get together in the objectives. "

On January 24 Sebastián Saldaña received a note at his private home of death threat, addressed to the person of him and the direct family nucleus of him. Next to the note left a bullet attached with tape.

Given this fact of net mafia cut, which wants to intimidate and shut up a Social fighter was sought as the first measure, making it public, surrounding us from the broader solidarity and support from guilds, human rights organizations, political parties, religious and civil institutions and local referents, provincial and national of the popular field. We demand at different levels of State, and to immediate justice clarification of what happened, the shelter of the physical integrity of our partner and his family.

The CCC of the city of Santa Fe and its coordinator have become the last years in the most important reference of struggling to recover our sovereignty to conquer genuine work, in the fight for a worthy future for the most humble and in a concrete tool of struggle to face adjustment, end inequalities and conquer rights important. We understand that this fact is not isolated, but occurs in a city with 77,000 people with unemployment problem and in a province that Bate records with more than 400 crimes in 2022. The advanced drug trafficking, situations of violence and intimidation with notorious impunity and without Clear responses from the provincial and municipal government are current currency. A This adds a context of persecution and criminalization to organizations of the

people and their referents, where the reactionary right is emboldened in His offensive against popular organizations and political leaders for return to the government and carry out its policy that has done so much damage to our town.

### **Strong support of guilds, social organizations, union and policies**

On 25, in the cultural corner we held a press conference demanding answers. Solidarity was overwhelming, more than 100 union leaders, Directive commissions, personalities, deputies and councilors and institutions They supported the order and shared the concern about what happened.

They accompanied us in person and sent their support: the secretary general of ATE Santa Fe Jorge Hoffman, General Secretary of the Workers' CTA José Testoni, CGT Santa Fe, the Autonomous CTA with the Secretary General of the Santa Fe Leandro Goldsack City, Rodolfo Rosselli Director of the region of Health Santa Fe, representatives of the Social Pastoral Archdiocese of Santa Faith, Juan Carlos Alderete National Deputy and Coordinator of the CCC, provincial and local officials of the Human Rights and the Ministry of Social Development of Nation and Province, the councilors of Citizen Unit Federico Fulini and Barrio 88 Guillermo Jerez, Germán Vaglio Guild Secretary of the CTA to Santa Fe Capital, Luciano Orellano of the Forum by The recovery of Paraná, Eduardo del Monte CCC Rosario, referents of the Siprus, Amsafe Capital, Oscar Vallejos General Secretary of Adult, Union of the meat, Acceptssafe, Moi, Medh, forum against impunity and for justice of Santa Fe, Innuma, Association of Fishermen. The Birri, Casita de Luján, or A kid for the drug Santa Fe, Alde, the technological current, front Citizen for health, octagon leadership of CEFHUC, neighborhood front cta t, Enrique Pichon Riviere Social Psychology School, referents of the Organizations that make up UTEP: Evita Movement, Standing neighborhoods, our America, Mob, Mtl, Dignity, united people, MUP, political parties such as PCR, PTP, Common Force, Citizen Unit, Barrio 88, Equality, PC, We are Patria, Po, MST, CCC National Table, Juan José Valle Front, Network of MERCOSUR communicators, North Huellitas Popular Garden, not a kid Less for the national drug, the Santa Fe cultural corner, popular house Casilda, the seedlings Rosario, the factory of the future Villa Governor Gálvez, Amsafe Rosario, Santa Fe subsidiary, CD of the Cultural and Sports Association ISRAELITA ARGENTINA «I. L. Peretz », Ana Bogado Representative of the Community - Dr. Mira and López Hospital Council, state of state René Salamanca, Fabian Belay Priest of Rosario, Pastoral of Popular Barrios de la

Archdiocese of Rosario-Padre Claudio Castricone, Assembly Nac. Of former prisoners Trelew Héctor Chinche Medina Heroes Politicians, White Turquoise List Telephone Rosario, Permanent Commission for Memory Human Rights and Social of Villa Governor Gálvez, among other organizations and referents. The provincial deputies Carlos del Frade, Leandro approached their solidarity Busatto, Tonioli, by Ponti, Rubeo, Bruera, Mercede Meier(MC), Verónica Benas(MC)among others.

Interviewed by some media, Sebastián Saldaña said: «We are not alone, I appreciate everyone's support and solidarity. This does not have to be unpunished arrive to silence those who are thoroughly in the fight to transform this such unequal reality and that it hurts so much ». Thus, to the date of the date We continue mobilized, since we have no clear answers and explanations for part of the State and justice. However, we are convinced that it is necessary the unity and prominence of everyone to demand justice and speed in research, as well as to end impunity and the inequality to which we want to get used to us so much.

**We had football, recreation, exchange, discussion of the difficult situation** that crosses us, the struggles we have been giving, the advances and the Strengthening a great youth of the FNC that is a tool for thousands of young people throughout the country.

With great effort, doing finance activities, asking for contributions, Delivering petitions, we were making the initiative that we discussed come true at the National Youth Table of the FNC to make a great camp. It was not easy, but with the prominence of the young people of the field and the help of The FNC could achieve it.

Between rounds of mates, beach, tournaments, stove ... we make commissions of debates. In them we discuss the importance of all young people We can discuss politics, our problems as young and peasants, the reality that we live daily.

The rise of land rentals, seeds and other inputs; the hard that is continued to study for the economic situation, the distances, Lack of transport and help to continue with our studies.

We also discuss how our knowledge to the organization and peasantry service. The lack of access to sport and spaces recreational As well as the issue of lack of access was also discussed of health and mental health.

Experiences of the different places where young people organize and fight to get ahead, the path of the prominence and fight to advance the needs we have and built a youthful needs program:

Access to land to produce, recreational spaces, access to health and Mental health, training workshops, shelters for young people who are going to study To other cities, national student ticket, school kits

We argued to go to the National FNC struggle day on the 15th of February and participate in the Earth Congress.

We are going for a great youth of the National Peasant Federation, which is Tool of thousands and thousands of young people throughout the country!

## Tucumán

We share Tucumán PTP-PCR statement.

From the PTP - PCR we sympathize with the Peruvian people in its fair struggle for their rights and dignity, as well as we express a total repudiation of Repressive government.

Deep Peru has aroused, as Evo Morales said, claiming justice, democracy and recovery of its natural resources. Before these orders, the Representatives of the oligarchy repress brutally.

This struggle of the Peruvian people moves our Latin America, which is being crossed by the dispute of imperialisms to continue the looting of their natural resources and appealing to these puppets, which before the claims of the People, do not hesitate to repress.

But the fight of the liberation of peoples, as history indicates, Follow and develop until the triumph is crowning. That is why we want to remember the Liberator of Latin America, José de San Martín, and the War of Recovery of our Malvinas, as symbols of the union with the people Peruvian.

A huge greeting and our solidarity, until victory always.

PTP / Labor Party and the PCR People / Revolutionary Communist Party

## Imperialist powers predate our seas

Author: carga

Time: 2023-02-01T96:00:00

Head Description:

Description: Year after year, hundreds of Chinese, Spanish, British, Korean, Taiwanese, etc., predate our sea, appropriating more than one million tons of “migratory species originating from the ZEE (Argentine exclusive economic zone)”. Cesar Augusto Lerena, a specialist in the subject, adds that the amount of this illegal fishing has “a FOB value of 4.320 & Hellip;

Images: ['[Pesca-ilegal.jpg](#) ']

Type: article

**Year, hundreds of Chinese, Spanish, British, Korean ships, Koreans, Taiwanese , etc., predate our sea, appropriating more than one million tons of "migratory species originating from the ZEE(Zona Económica Exclusiva Argentina)" Cesar Augusto Lerena, specialist in the subject, adds That the amount of this illegal fishing has "a FOB value of 4,320 million US \$ and of 24,000 million US \$ in the final market(Mercado Central de Valencia, 11/22), to which 325,000 tons of fishery resources are added they extract annually in the Malvinas area with British illegal licenses, For a value of 1.5 billion US \$ fob that, in the final trade, They transform into about 9 billion per year. "**

A few days ago, on January 10, Infobae.com published a report on fishing illegal of hundred Chinese ships on the edge of the exclusive economic zone of Our country, in the so -called "Mile 201". They come for squid, hake and Other valuable species. Strikingly, the note does not dedicate a line to the British colonialist occupation in our Falkland Islands, Georgias and South Sandwich, from which the governments of the United Kingdom grant Fishing licenses in the South Atlantic, including the Antarctic sector to ships of different nationalities, especially Spanish.

Lerena affirms, in several articles published by the Institute of Studies Nationals of the patriotic and popular forum, that "the devastating effects of the Illegal fishing and the capture of migratory resources from the Exclusive economic

zone(ZEE), by foreign ships that, form subsidized, fish in the Argentine Southwestern Atlantic. And, in fishing Illegal are not only economic, biological, environmental and social damages, but these practices cause violations in slave labor and drug trafficking, in addition to impairing the sovereignty of riverside states. ”

The dispute around the construction of a “multipurpose” port in Rio Grande, Tierra del Fuego, agreed with the Fueguino government and the company Chinese state Shaanxi Chemical Industry Group, shows another aspect of progress of this imperialist power about our sovereignty, and has points of Contact with the favor of illegal fishing. The Minister of Production and Environment of that province, Sonia Elizabeth Castiglioni, said in November past that this “multipurpose port is thus raised because the quantity of services that can give a port in these latitudes to the entire Atlantic South is important and will position Argentina. Regarding the 201 mile I I see how a work opportunity in the territories: today Malvinas, Punta Arenas and Uruguay offer services and we see it pass ”([www.escenariomundial.com](http://www.escenariomundial.com)).

From the national government they have already expressed their opposition to construction From this port, which according to Minister Fueguina would be “an investment of 210 million dollars from the Argentine firm Mirgor Sacifia, whose main Shareholder is the businessman Nicolás Caputo. ”

### **illegal fishing**

Lerena says, in another article in which he analyzes the Convention of Nations Together with the law of the sea(Convemar), of which Argentina is Signatory: “It is understood as illegal fishing, and with Indnr's technicalism(ilegal, no declarada, no registrada)to that which is done by violating national, regional and/or international laws; when they are not declared or It is made in an inaccurate way, operations; When there is no control of captures and/or landing, because it is done without observers and inspectors unleashed or transfers are carried out in the sea; the one that receives subsidies of the state of origin, facilitating this type of fishing; the fishing of Youth or unauthorized sizes; When using nets with meshes lower than those approved for the species in question; When they are discarded fish to the sea, because it is incidental or non - commercial fishing; when They replace the species or falsify the statements; the one that overexploit the available stocks or there is no way to determine it; the use of flags of convenience to evade controls and penalties; The one that is not

known origin nor the traceability of the products; which is done without control of good fishing practices; When appropriate for third parties countries and/or are affected by developing regions or that in their economies have in This resource an important means of livelihood; The one that causes pollution Marine; which is done with slave labor or other irregularities Environmental, ecological, social and economic. ”

And the specialist adds “77% of those fish are ships that come from China, Japan, the European Union(España), South Korea, Taiwan, Great Britain and Russia, and, all of them, they protect themselves in this convention that protects them and that, In addition to appropriating - in most cases - of migratory resources annual subsidies, an amount equivalent to 35% of the world market and, where 84% of these subsidies are destined for large fishing companies that have freezing and processor ships, capable of moving to long distances. A very high amount that exceeds that of all exports Fisheries in Latin America.

“Fishing ships do not pretend autonomously. They are the countries that They subsidize and promote illegal fishing and convey, reserve the countries of origin of these ships the criminal sanction, which does not make ”.

The continuous predation of the maritime species that occurs in our sea is part of the imperialist action that loots our resources, and occurs in the middle of the resolution of the dispute by the South Atlantic, in these times that The war drums of the main powers resonate strongly, which They seek to reinforce their war devices worldwide, and also in the South Atlantic and Antarctica. National Government concessions, and provincial governments, in favor of one or another power only exacerbate that Dispute, and go against a sovereign policy about our resources.

As we have said repeatedly, there is no sovereign policy in our seas Without the complaint of the Madrid agreements signed by the Menemist government With Great Britain, and without advancing, as proposed by the ten measures of our PCR In a “new fishing law that protects work, resource and sovereignty About our National Caldero. Renewal of the Fisheries Fleet and Promotion of the naval industry. All ground fish for manufacturing for Generate jobs. Zero discarding law that reinforces the fight against hunger”.

Images: ['[comunidades-mapuches-mendoza-1.jpg](#)']

Type: article

Last week the National Government delivered 21 thousand hectares to the

communities Mapuches in southern Mendoza. The measure was held in a deep study of the original families that had long claimed the recognition of their ancestral lands.

Cornejo, who has the ability not to be confused in the defense of oligarchic interests, questioned the measure, silver that "harmed south from the province". On the one hand, not only denies the historical rights of Original communities, but has promoted their eviction. For Another part, Cornejo is altered when lands are delivered to the peoples native, but it seems extremely "normal", that land is delivered to the great foreign and private corporations, as happened with the 12 thousand have who gave up to the private group in Malargüe for a tourist entrepreneurship, or the support and collaboration of Macri's attempt to deliver land in the Traces that belong to the army for private ventures.

It is clear that as a faithful representative of the oligarchy and capitals External, Cornejo is a retrograde that has the ability to never make a mistake of side. They are samples of the policies that defends and the sectors to the that benefits.

In a province where 5% of the owners have 93% of the land, The right to land to live and work is a fundamental fight. The Fight for Earth is a fight not only of the original communities, but of the thousands of producers who do not access it and the hundreds of thousands of families who find deep obstacles to have a Lot to realize the dream of your own house.

Type: article

**was made in a massive act in the city of Cipolletti**, where The main referents of the parties that make up the regrouping, such as the Labor and People Party, part with Magdalena Odarda, organized community with Silvia Horne, Peronist Action with José Luis Berros, Solidarity Party, Communist Party and several adherents. The Intendenta de Roca, María Emilia Soria, of Peronist Action, also integrates This space.

The leader of the Evita Rionegrino movement and current director of Affairs Parliamentarians from the Ministry of Foreign Affairs of Nation, Silvia Horne, will be the candidate for governor and Raúl Rajneri, president of the party of work and people(PTP), will go in the first places on the sheet as a deputy candidate. They will also apply for other districts PTP companions, members of the class

current and Combative(CCC)and of the women's movement, campaign for emergency in Violence.

Everyone's front considers deepening the path of unity and fighting for sovereignty and popular emergencies, holding the flags and FDT foundational program. While a justicialist party sector Rionegrino, led by national senator Martín Doñate, joined with him Together we are Río Negro(JSRN)by Alberto Weretilneck and Arabela Races, the parties that make up the front hold the fight to isolate the macrismo and prevent its return to power. In the case of Río Negro, JSRN not only He was a political ally of macrismo during his government, but is his partner local.

With a popular and sovereign program built from the bottom up after Several meetings by town and workshops for theme, it was made clear that the The main objective of the alliance is the unit.

"Today I say with all the force that Peronism is alive, that they do not take it Post and less opportunists. Peronism wants unity, and for that We are going to work, "said Silvia Horne, who heads the formula and the list.

The Electoral Front not only contains Peronist political parties and other popular aspects, but provincial legislators, groups, Social movements, union referents and professional associations.

## We launch Formula for the Interior

The Labor and the People Party(PTP), together with the matches that we integrate The front of all in Río Negro, we publicly announced everyone The rionegrinos who will be our candidates for governor and vice For the general elections of April 16.

Silvia Horne, referent of the Evita and former national movement, will be the candidate for governor and bariloche Peronist Leandro Costa Brutten will be The applicant to Vice Governor in the formula.

The alliance that we integrate from the PTP; together with organized community- Evita Movement; Peronist part and action, the PJ sector led by María Emilia Soria; is close to registering in the electoral justice with a countless adherent parties, groups, guilds and organizations social.

The list sheet for provincial deputies will be composed in the First positions for Ayelén Sposito, José Luis Berros, Magdalena Odarda and Our partner and president of the PTP, Raúl Rajneri.

From the PCR and its JCR and all the mass movements we participate, we promote throughout the country & Hellip;

Images: ['[pintada-por-Perú-en-Quilmes-Berazategui-Varela.jpg](#)']

Type: article

**1. Long live the rebellion of the Peruvian people Enough of repression!**

The rebellion of the Peruvian people follow in the streets and the Repression with more than 63 killed, thousands of prisoners and injuries.

From the PCR and its JCR and all the mass movements of which we participate We promote a great mass campaign in solidarity with the Peruvian people, repudiating the fierce repression.

The coup d'etat overthrew President Pedro Castillo and imposed the Dina Boluarte de facto presidency. The Congress, controlled by the right Fascist, rejected the possibility of a new election this year.

All imperialisms recognized the coup government. They dispute associated to different sectors of the Peruvian ruling classes, but they converge to the time to suppress popular mobilization and quell the rebellion.

In Peru the imperialist dispute stains the situation of the country. The traditional Right Proyanqui has given ground to the advance of imperialism Chino, who has become the main commercial partner of Peru and controls Copper(Perú es el segundo productor mundial)And it has important strategic investments, including the construction of the port of Chancay About the Pacific, key to the advance of Chinese penetration on America from the south and for its imperialist dispute over the Pacific.

Also Japanese imperialism has important investments that advanced mainly during the presidency of Fujimori.

The rebellion of the labor movement and the originals and peasants of the interior of the country, it has been mobilizing large caravans from the provinces Andean and the popular neighborhoods of Lima.

To that popular mobilization was added a caravan of reservists and graduates of the armed forces, of more than 10,000 members and say that they would reach Lima 30,000. A fact of enormous importance, that fractures the structure military and adds to the popular claim to sweep the government and congress coup plotters

The president of Mexico, López Obrador, requested the release of the president Overthrown, Pedro Castillo. Democratic claim that could not be approved in the Recent CELAC meeting.

The depth of the rebellion of the peasant masses, originally, workers, Student and popular Peru claims deep changes. Until where This fight will arrive will

depend on a avant -garde capable of opening a Revolutionary path. But surely nothing will be the same in this Brother country.

Our duty as revolutionary communists is to raise this situation between The masses in each workplace, study and militancy, so that there are hundreds of pronouncements in solidarity with the heroic struggle of the people Peruvian and **to demand the Argentine government to claim Pedro's freedom Castle and repudiate the coup d'etat. The Peruvian people are the sole owner of your destiny.**

## **2. The Russian invasion to Ukraine and World War**

“War is a failure of politics, a failure of humanity, a shameful claudication, a defeat against the forces of evil. If we think that in this last century there were three world wars, 1914 to 1918, 1939 to 1945 and **This current one that is a World War.** ” The statement belongs to the Pope Francisco for Russian invasion to Ukraine.

**Putin underestimated the Ukrainian people that endorsed that patriotic war.** Russian imperialism has used much of its missile reserves to destroy buildings and kill the civilian population, looking for a genocide that Sow fear and get a quick triumph. And it was quite the opposite.

**Russian invasion to Ukraine places the world on the edge of a new war world.**

The United States will now send 31 Abrams tanks. The Biden government He decided after Germany agreed to send 14 leopard tanks of his own arsenal. The German government had said that the Leopard was not going to send to less than the United States made the Abrams available.

In total, France, England, the United States, Poland, Germany, Holland and Sweden will send around 160 tanks and armored vehicles.

Russian imperialism responded to these ads with a new wave of Missile and bombing attacks on kyiv and other cities, and prepares a Great offensive that moves forward to the arrival and commissioning of the tanks.

**Out of Ukraine Russian genocidal imperialism!Out of imperialism Yankee and NATO!Long live the heroic patriotic struggle of the Ukrainian people!**

## **3. The CELAC and the new scenario of Latin America**

Last week, the meeting of the CABA was held at the Hotel Sheraton de la Caba Community of Latin American and Caribbean States(CELAC).

Alberto Fernández presided over CELAC for a year. Was designated as successor Ralph Gonsalves, imposed by Mexico. It is the Prime Minister of San Vicente and the Granada, a small island of the Caribbean, of English speaking, that still Gonsalves maintains good relations with Cuba and Venezuela, and reiterated support from his country to the Argentine demand for the resumption of negotiations with the United Kingdom regarding the sovereignty of the Falkland Islands.

The presence of Lula, the new president of Brazil, opened changes in the Region: proposed to resume and strengthen Mercosur, negotiate first with the European Union and then with China. Mercosur integrates it: Argentina, Brazil, Paraguay, Uruguay and Venezuela(suspendida desde el 2017). And how Associated states: Chile, Colombia, Ecuador, Guyana, Peru and Surinam.

With Lula, negotiations for commercial exchange and the possibility of financial aid to Argentina. It was important Presence of Evo Morales, the former president of Bolivia.

Chinese President Xi Jinping sent a video to CELAC in which he said "The world has entered a new period of turbulence and transformations" and He called to "boost South-South cooperation."

Social and union organizations discussed and presented a document with his claims and his anti -imperialist positions, as the partner said Ramiro Berdesegar, leader of the CCC and the PCR. And on 24/1 they mobilized massively to the Sheo, the CCC, the Evita Movement, the CTA and other forces popular

#### **4. Disputes in together for change**

The pro and together for change are a "cat bag" and live a fierce Dispute for charges for this year's elections.

After the triumphalist climate for victory in 19 provinces in the elections Of 2021, the internal dispute with the rebellion of provincial leaders grew: Tucumán, Chubut, Salta, Córdoba, Río Negro and others.

Patricia Bullrich(PRO), Gerardo Morales(UCR), Maximiliano Ferraro(Coalición Cívica)and Miguel Ángel Pichetto(Encuentro Republicano Federal)They met This Wednesday, as presidents of the forces that make up together for the

Change. They agreed to "sanction" those who do not comply with the internal rules of The alliance for early elections. They try to put a limit to disputes over the lists of the provinces.

Macri was planted: "I'm in the ring and I'm going to fight." Elisa Carrió, marked the court to together for change: she wants to be a candidate for president to search unit".

Manes asked to expand JXC, and asked Schiaretti to not move on the Elections in Córdoba.

The former Buenos Aires Governor María Eugenia Vidal, who is also noted in the Presidential career, speaks of a pension reform "because the system is broken ", and wants to" discuss "the compensation system.

This 12/2 are made internal in La Pampa, in which together for change it goes to decide its candidates between radicalism and the Pro. The Front Pampas justicialist unified his lists with little democratic discussion and not It goes to internal.

Beyond its internal disputes, macrismo and the sectors that support it They want to return to the government to deepen adjustment, hunger and delivery. **It is those who direct the main blow of the popular struggle.**

## **5. The trial of the Supreme Court**

Congress began to deal with the possibility of a political trial to the Court Supreme Justice. On February 2, the complainants will present and on 9 will vote.

The government needs two thirds of the Senate and deputies to approve the political judgment, but it does not have or follow half of each of those Chambers with what the political trial is hard to prosper.

Beyond this, this discussion puts on the table the corrupt actions of the Argentine Justice and its Supreme Court, which show the rot of the institutions of this state of the ruling classes, which It is used by the different sectors in your dispute, and also to repress and discipline social and political organizations such as CCC and PCR to through judicial causes tailored to its adjustment policy.

## **6. Unit in the streets against adjustment, for bread, work and sovereignty**

Quilmes neighbors looted trucks with cattle and the meat is distributed in the Street: They don't have to eat.

They continue to increase food, rentals, fuels, rates, prepaid and telephony. The price of the cow increased 17%, which The meat would rise to 40%.

In the agrarian areas the drought left the worker without work and the chacarero indebted. They lost the initial crops and now they are losing the late Many poor peasants and small producers leave their fields and The concentration of the Earth grows in the hands of the pulses and large landowners.

It is urgent financing, subsidies and soft credits, hitting the sector of the Earth owners, which are carried out as income 7 billion dollars, with a special tax. Also a rural lease law that allow the producer to rediscuse the rent in emergency cases such as the Current drought.

The **social emergency** is not the center of government policy. The and other outsureres from outside and inside, cutting social plans, salaries and retirement.

\*\*

With that great lie that the exit to this situation comes from the Diversification of the agency, the agreements that take over our natural wealth and our sovereignty.

A court approved the exploitation of oil in Mar del Plata: to the Shell! The company of those who colonize our Malvinas and our sovereignty in the South Atlantic and in the Antarctica sector. They celebrate the delivery of lithium in Gross, when Bolivia exploits him with a national company.

Imperialist oil companies impose fuel prices with Super Profits. Vaca Muerta and Cerro Dragon continues to dismembered at the hands of the Imperialist companies.

The dispute for our resources grows. The government gives in to the export monopolies and about the control of the so -called hydrovy. He Government of Tierra del Fuego negotiates with China the construction of a port strategic. And Lewis continues to take over Patagonia, giving it to the English imperialism.

With this policy the government has lost popular support, because it does not touch the interests of the powerful and hunger, poverty and delivery of Our national sovereignty. This emboldenea to the reactionary right in their plans to deepen the adjustment, as Milei did announcing his "plan chainsaw "to reduce

the State and eliminate health ministries, Education, work and women and diversities.

The workers, peasant, native, young people, of the young people, of the women, the struggles in defense of our sovereignty. There are thousands in Argentina Those who come starring their claims and join in the streets

**We continue in the fight to advance these struggles and join with all the popular and national sectors so that these converge and impose from the streets that the crisis is paid by those who are taking it in shovel and breaks The infamous agreement with the IMF and all anti -informed agreements with different Imperialism. Only in this way can we advance in solving emergencies and in the Defense of our national sovereignty.**

## **7. Follow the head of the struggles and not underestimate the enemy**

Companion Sebastián Saldaña, coordinator of the CCC of the city of Santa Faith, he received at home a threat of death to him, his son, his baby and all his around. The note carried a bullet stuck with tape. Dozens of organizations Santa Fe union and policies, the national table of the CCC and the PCR They repudiated this fact, demanding from the different levels of the State the prompt research and protection of the partner and his family, the clarification of the fact and the punishment of those responsible.

This happens a few days after the murder attempt by fellow Lautaro Nahuel Ardura, in La Pampa. They are facts that show that there is a fascist right that Try to hit us, and an enemy state of popular forces.

They also advance in different parts of the country judicial causes against Companions and companions of the CCC and the PCR driven by macrista and others of justice.

The ruling classes use the entire state apparatus -the "legal" and the MAFIOUS-To isolate and attack those who lead the popular struggle. This demands that we continue in the fight fighting the widest unit as expressed with the great solidarity received from these attacks, and lift the guard to guarantee the continuity of popular struggles for bread, land, work and sovereignty.

## **8. Our goal is the National and Social Liberation Revolution**

At the close of this edition, hundreds of companions of Río Negro and of different parts of the country made the seventh multisectoral march to Hidden lake, repudiating the presence of the English magnate Lewis and reiterating The sovereign claim in that area of our homeland.

On February 1, dozens of organizations, including the CCC and The PTP-PCR, march to the Supreme Court in CABA and the Federal Courts of The whole country demanding the cessation of persecution to social organizations and union, and its leaders.

With the resolutions of the 13 PCR Congress we go to meet the great political debate in the masses around what is the exit in favor from town.

Putting the center to lead the struggles and accumulate revolutionary forces, We propose affiliation to our party and its youth to all the colleagues and Companions with whom we share the daily struggle.

We address that mass discussion with a proposal expressed in our DIEZ PROGRAM MEASURES\_. This debate includes the electoral proposals of each district, which are carried out in many provinces, and the national election. But that goes further, because what is at stake is to advance in the unit to the struggle of the popular sectors, on the path of a revolution that State, in the hands of the working class and the people.

UNIR-SE SOB O MAOISMO!  
VIVA A REVOLUÇÃO PROLETÁRIA MUNDIAL! ⚡

Full Report: <https://www.anovademocracy.com.br/noticias/18567-acoes-Celebrated-Fundação-da-Lci-No-Brazil-ATTACTI-12-01> ## GERMANY

This year again the LLL demonstration took place in Berlin in January. While this annual event is primarily a showdown of the various forces of the revolutionist movement in the FRG, this year the Maoists had a different message: the International Communist League - ICL was founded! A manifold international

contingent proclaimed this historic message at the demonstration, fulfilling the demand that had been made in the previous years at the same demonstration - also in the struggle: For the new organization of the international proletariat!

This message was not only powerfully spread, but also joyfully accepted by many masses. Several times masses asked for the flags of the ICL, which were carried on the demonstration in four languages - Spanish, English, Turkish and German. Some even wanted to buy them on the spot. An excerpt of the ICL's Political Declaration and Principles was distributed as a leaflet, and Partizan comrades handed out printed brochures with the Declaration in English and Turkish. Thus, the radiance that the LLL demonstration has in the FRG and parts of Western Europe was used to celebrate and spread this success of the Maoists.

The participants of the contingent look now full of joy and proletarian optimism into the future to develop under new, better conditions the work for the goal of the communists - the communism - and the unification of the International Communist Movement to push further.

Dazibaos were distributed in Kristiansand and a flag was put up in Vennesla.

*Proletarier i alle land, fører der!*

**LEVE MAOISMEN!**

**Lenge leve Internasjonalt Kommunistisk Forbund!**

De maoistiske maoistiske partiene og organisasjonene som deltok i den FORENTES MAOISTISKE INTERNASJONALE KONFERANSEN (CMU-UMC), som følger samme vel som den andre internasjonalen støtter av den store Lenin, og de beste tradisjonene i den internasjonale kommunistiske bevegelsen, erklærer hoytidlig til det internasjonale proletariatet og verdens folk at den historiske og overvirkende angsten om å støtte den nye internasjonale maoistiske organisasjonen er tatt, grunngått under tre store og sterke røde faner: maoismen, kamp mot revisionismen og proletariat vedrørsrevolusjonen.

Med dyp kommunistisk overbevisning, støtter vi partier og organisasjoner som er gjennomført her, igjen og med hoytidelig beskrivelse, at vi vil opplyse verden om Den første maoistiske internasjonale konferansen, og forvare og utøvende den allmektige ideologien til det internasjonale proletariatet: marxismen-leninismen-maoismen.

Dette er en fast forpliktelse i den lange og intettede kampen for å trykke maoismen gjennom som ørste kommando og veileder for vedrørsrevolusjonen, den ørste dype røde og aldrig fahrende fanen som garanterer seieren for proletariatet, de undertrykte nasjonene og verdens folk i vår umøgelige martyri mot den gule og for altid skinnende kommunismen.

Den første forenede maoistiske internasjonale konferansen av maoistiske maoistiske kommunistiske partier og organisasjoner, har et historisk overordnende og dyp strategisk innhold. Det er en storstilt oppgave som samverket med den nye store bøgen av proletariat vedrørsrevolusjon.

Med enorm entusiasme og overrømmende av klasse optimisme og sterkt bevegelse, reiser vi det røde slagordet:

Den 1. Forente Maoistiske Internasjonale Konferansen er et grunnlag og marsjerer utstøttig mot å gjørefore kommunistene i den internasjonale kommunistiske bevegelsen, en krigsmaskin, en maskin for kamp som reiser de aldrig fahrende fanene til marxismen-leninismen-maoismen og den uovervinnelige folkekrigene!!

Seinamaalaus/](https://punalippu.noblogs.org/post/2023/01/26/tampere-malainen-Seinamaalaus/)

More acts were made in São Paulo in Campinas, Guarulhos and the West Zone of São Paulo, in São Cristóvão and Rio de Janeiro, in the state of Rio de Janeiro.

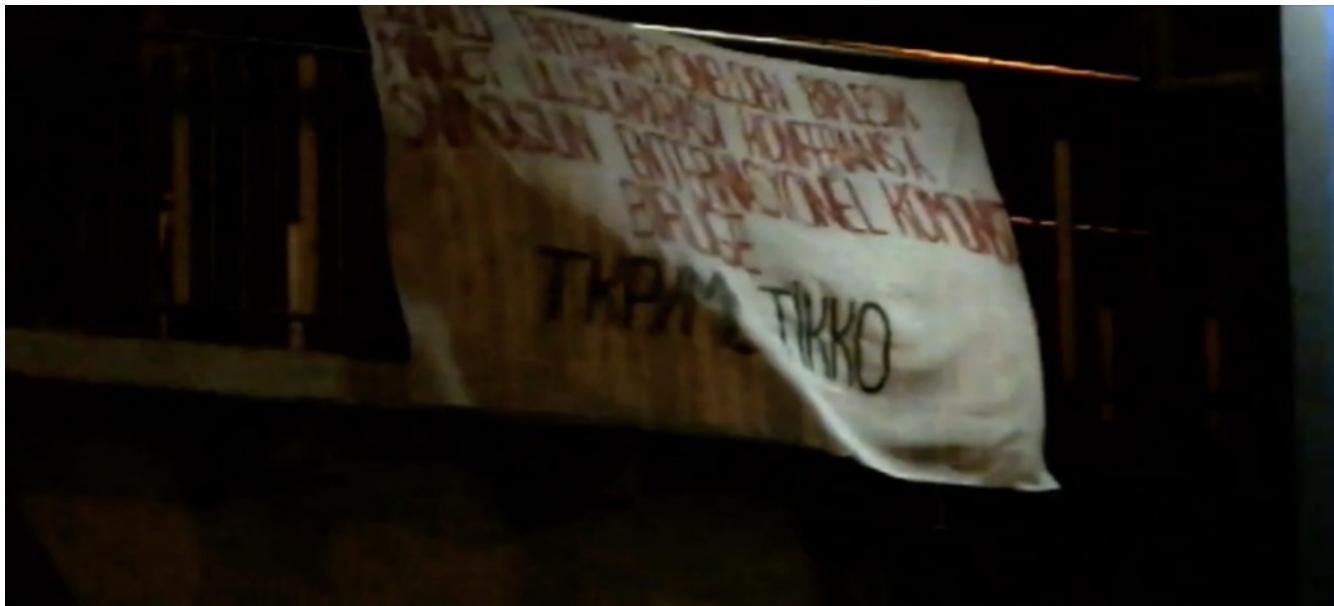

## ## Turkey

TKP/ML militants greeted the martyrs of revolution and communism with banners they hung in Linz, Austria, and the establishment of the EKB they hung in Basel, Switzerland.

TKP/ML militants greeted the establishment of the International Communist Union(EKB). They hung a banner on the road "Avcılar Metrobüs yolu" where they saluted the establishment of the EKB. TKP / ML militants congratulated all the components in the EKB and called for a tighter embrace of duties and responsibilities.
